

Apache Spark and Its Role in the Enterprise Data Hub

Mike Olson, Chief Strategy Officer, Cloudera mike.olson@cloudera.com, @mikeolson

Spark Unifies and Simplifies Hadoop

```
cloudera-5-testing — root@ip-172-31-11-254:~ — ssh — 85×22
                                                                                                           Batch
      root@ip-172-31-11-254:~
                                       root@ip-172-31-11-254:~
[root@ip-172-31-11-254 ~]# /opt/cloudera/parcels/SPARK/pyspark
                                                                                                       Processing
Welcome to
                                                                                                          Stream
Using Python version 2.6.6 (r266:84292, Sep 11 2012 08:34:23)
                                                                                                       Processing
Spark context avaiable as sc.
>>> file = sc.textFile("hdfs://ip-172-31-11-254.us-west-2.compute.internal:8020/user/
hdfs/ec2-data/pageviews/2007/2007-12/pagecounts-20071209-180000.qz")
. . .
>>> file.count()
                                                                                                         Machine
856769
>>> file.filter(lambda line: "Holiday" in line).count()
                                                                                                         Learning
101
```

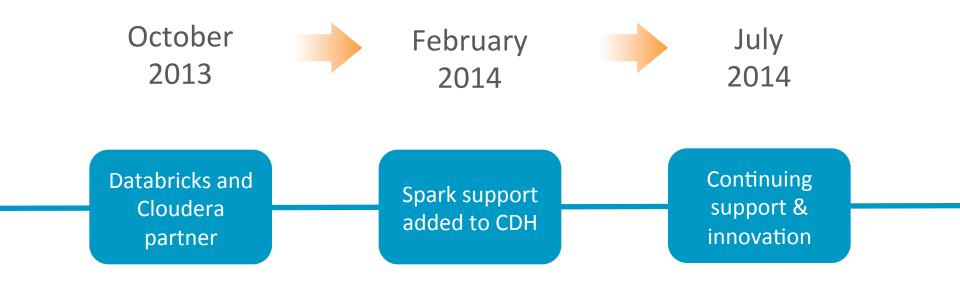

Developing and supporting Spark together to ensure customer success

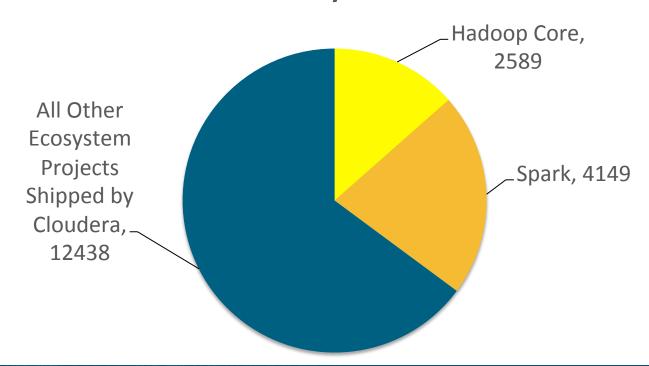

Spark at Cloudera

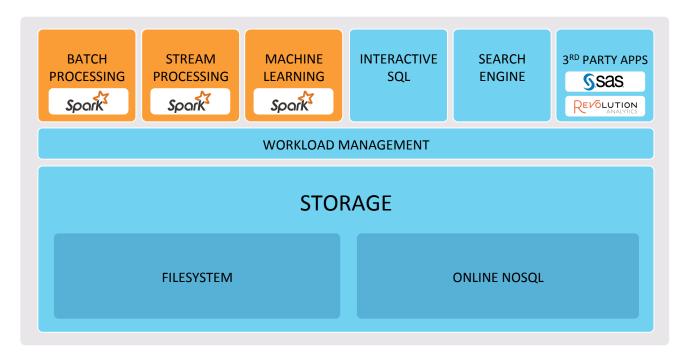

Spark is a Core Component of Hadoop

Commit Activity Past 12 Months

Fully Integrated into CDH

- Integrated and supported part of our platform
- Diverse use cases in production
- Well-trained support and external trainings

Customer Adoption

Search personalization through machine learning investigations

Fast processing of millions of stock positions and future scenarios

Genomics research using Spark pipelines

Predictive modeling of disease conditions

Cloudera Developer Training for Apache Spark

The only hands-on deep dive into building unified applications with Spark

Public GA: Aug 5, Redwood City

Dell In-Memory Appliances for Cloudera Enterprise

- Simplifies and speeds up complex cluster deployments
- Includes Cloudera Enterprise and ScaleMP's Versatile SMP (vSMP) architecture
- Built on the Intel(R) Xeon(R) processor-based Dell R920 hardware
- Optimized for Spark

cloudera®

Spark as the Standard Processing Engine

Bringing the Communities Together

The Hive and Spark communities are coming together to drive consolidation in the Hadoop ecosystem

Hive on Spark

cloudera®

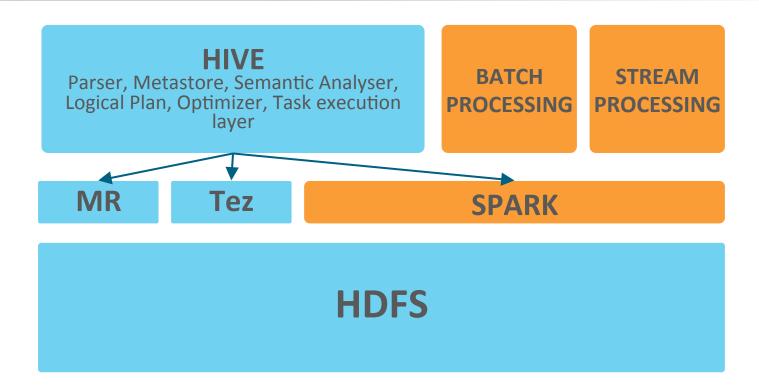

Architecture

Our SQL on Hadoop Vision

BI and SQL Analytics Batch Processing

Mixed Spark and SQL Applications

Thank you!
