

# REGULATORY REPORTING OF ASSET TRADING USING SPARK

Sudipto Shankar Dasgupta &  
Mayoor Rao – Infosys Limited

## Regulatory Reporting – Current Challenges

Financial Institutions need to report asset trade based on defined regulations

Reporting has to comply within a time window from the trade execution

Rules are subject to change and adjustments based on the change in regulations

The transaction volume is high  
Transactional systems are diverse

# Case Study

Leading global Financial Institution engaged in around 6 million trades a day in the financial markets

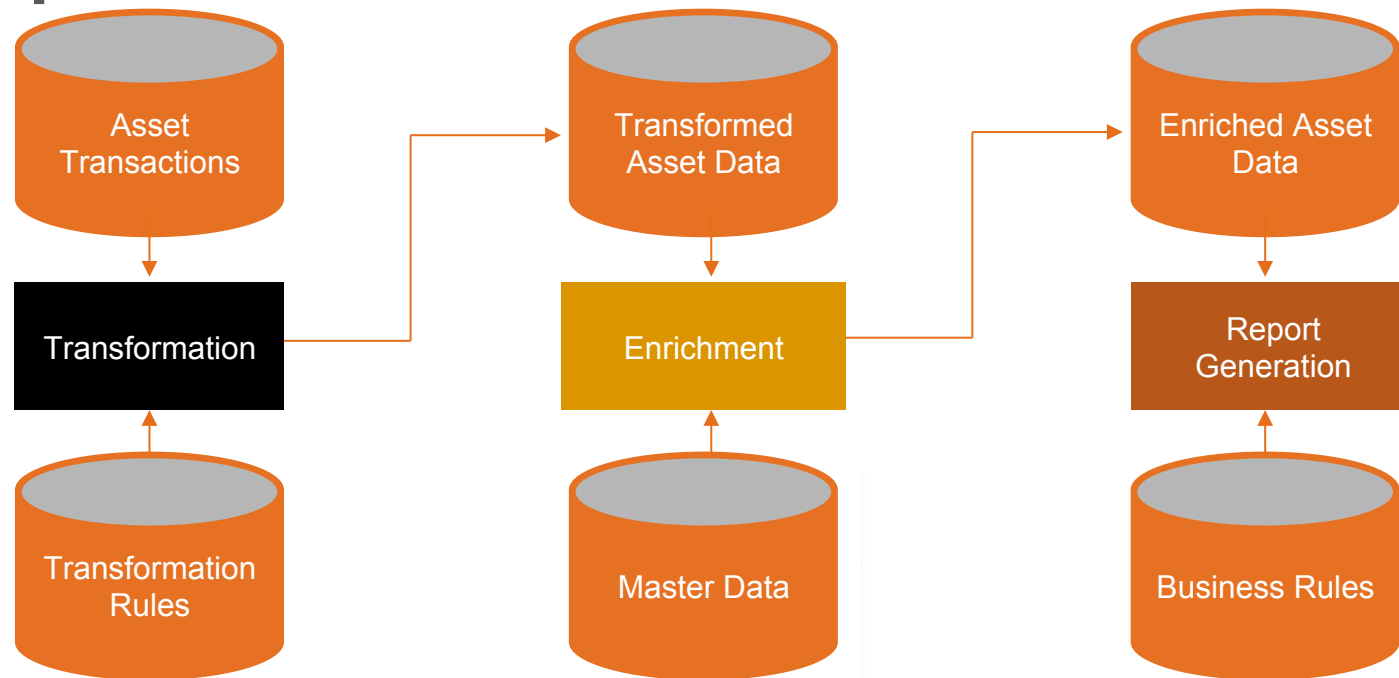

Regulatory requirements necessitates reporting in a specified reporting format within a 15 minute window

The trades are identified for reporting based on steps

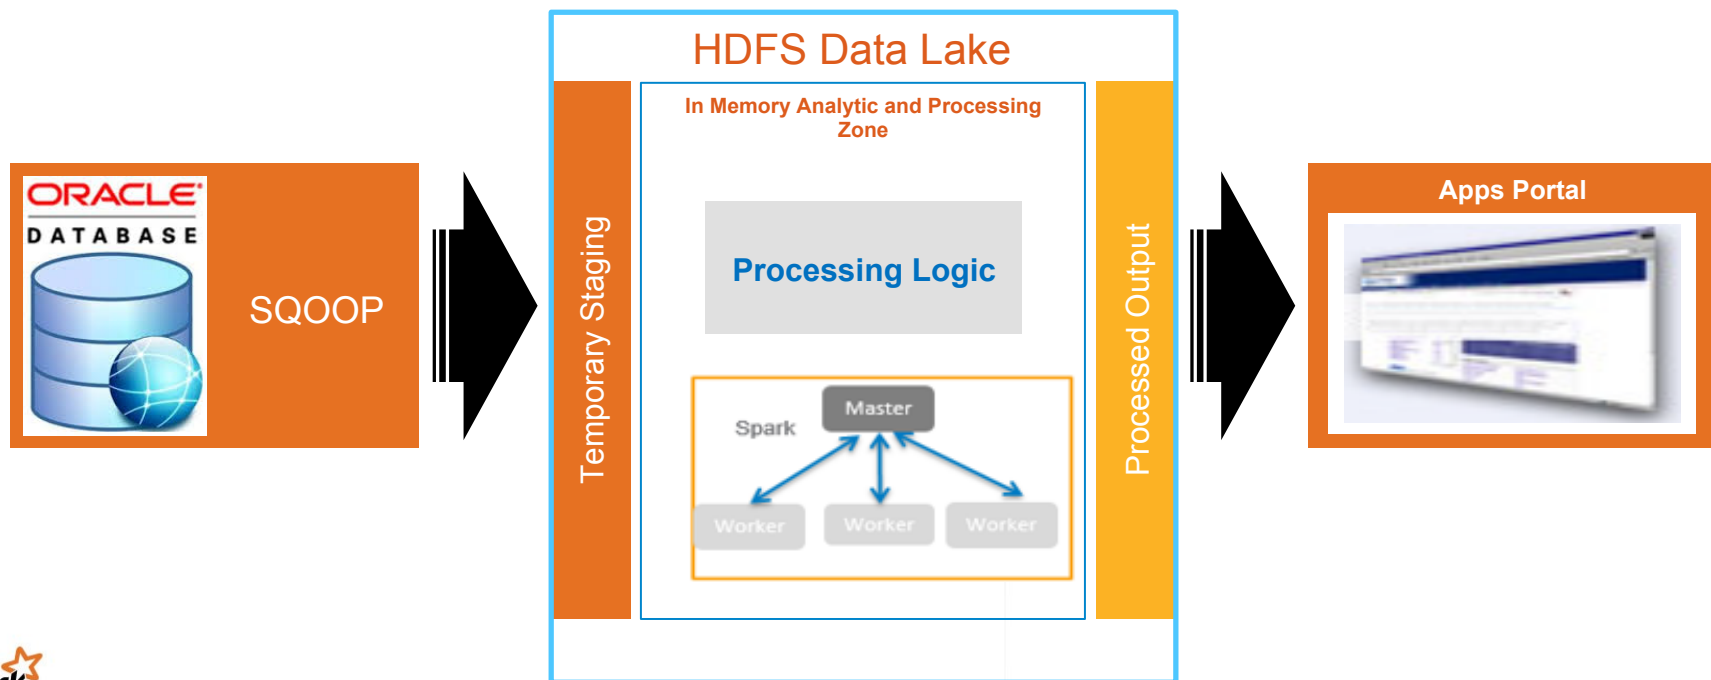

- Transformation
- Enrichment
- De-duplication checks
- Business Rules

# Report Generation Process Flow

# Architecture Diagram

# Statistics

Ingestion throughput  
>130,000  
records/second or 18.22 MB/  
second (per node)

01

Report execution time -> 35  
seconds for 30,000 trade  
records

02

03

Overall Data Volume -> 596  
million trade transaction  
records

04

Hardware Configuration ->  
Spark Installed in 10 node 32  
GB RAM , 16 Core m/c

A photograph of a business meeting. In the foreground, a person's hand is pointing at a tablet held by another person. The tablet displays a business dashboard with various charts, including a bar chart and a pie chart. In the background, another person is seated at the table with their hands clasped. On the table, there is a laptop, a cup of coffee, and a glass of water. An orange semi-transparent banner is overlaid across the middle of the image, containing the word "DEMO" in white capital letters.
