# Apache Sling – High-level View of the Code

## In a Nutshell, Apache Sling...

- ... has had **11,113 commits** made by **26 contributors** representing **366,232 lines of code**
- ... is **mostly written in Java** with an **average number of source code comments**
- ... has a **well established, mature codebase** maintained by a **large development team** with **increasing Y-O-Y commits**
- ... took an estimated **97 years of effort** (COCOMO model) starting with its **first commit in September, 2007** ending with its **most recent commit 4 days ago**

The image features a dark purple gradient background. In the center, there is a white silhouette of a mosque. The mosque has a large central dome and several minarets with pointed tops. The text "Building blocks" is written in a white, sans-serif font across the middle of the mosque's silhouette.

# Apache Sling – Everything is a Resource

Everything is a Resource

# Apache Sling – Reading from the Repository

```
@SlingServlet(resourceTypes = "blogapp/listing",
    extensions = "xml", methods = "GET")

public class RSSFeedServlet extends
    SlingSafeMethodsServlet {

    @Override
    protected void doGet(SlingHttpServletRequest request,
        SlingHttpServletResponse response) throws
        ServletException, IOException {

        // actual implementation

    }

}
```

## Apache Sling – Reading from the Repository

```
Resource res = request.getResource();  
  
ValueMap properties =  
    res.adaptTo(ValueMap.class);  
  
String title = properties.get("jcr:title",  
    "Missing");  
  
Post post = res.adaptTo(Post.class);  
  
title = post.getTitle();
```

# Apache Sling - Extensions

- Thread Pools and Scheduled Tasks
- I18n
- Caching
- Models
- Health Checks
- Eventing

# Apache Sling - SlingQuery

Get the closest Folder parent

```
$(resource).parents("sling:Folder").last();
```

Get the second child of each resource

```
$(resource1, resource2).children(":eq(1)");
```

Find children named en or de

```
$(resource).children("#en, #de")
```

# Apache Sling - Deployment

- Single executable Jar or War file – the Sling launchpad
- Configuration defined in multiple text files, defining bundles, configuration, variables, bootstrap commands, etc

# Apache Sling – Provisioning Model

```
[feature name=main]
```

```
[variables]
```

```
io.version=1.4
```

```
[configurations]
