

Managing Mobile Devices

Configure, enroll, manage

Dave Rahardja
iPhone Code Wrangler

Chris Skogen
iPCU Engineering

Three Requirements

- Configure
- Enroll
- Manage

Three Solutions

- Configure
 - Configuration Profiles
- Enroll
 - OTA Enrollment
- Manage
 - Mobile Device Management

Technologies

Configuration Profiles

OTA Enrollment

Technologies

Configuration Profiles

OTA Enrollment

Mobile Device Management

Configuration Profiles

- XML (plist DTD) format

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE plist PUBLIC "-//Apple//DTD PLIST 1.0//EN" "http://
www.apple.com/DTDs/PropertyList-1.0.dtd">
<plist version="1.0">
<dict>
  <key>PayloadContent</key>
  <array>
    <dict>
      <key>PayloadDescription</key>
      <string>Configures device restrictions.</string>
      <key>PayloadDisplayName</key>
      <string>Restrictions</string>
      <key>PayloadIdentifier</key>
      <string>group.company.com.restrictions</string>
      <key>PayloadOrganization</key>
      <string></string>
      ...
    
```

Configuration Profiles

- XML (plist DTD) format
- Contains one or more payloads
 - Exchange settings, IMAP and CalDAV accounts, etc.
 - Certificates, shared secrets, VPN settings, etc.
 - Passcode requirements, feature restrictions, etc.
- Created via
 - iPhone Configuration Utility
 - Custom server script
 - Commercial management solution

Demo

iPhone Configuration Utility (iPCU)

Chris Skogen
iPCU Engineer

Configuration Profiles

- May be signed and encrypted
- Install over USB, or over the air (OTA)
- All payloads installed or removed together

Configuration Profiles

Carrot and stick approach

- Combine restrictions and accounts in one profile

Configuration Profiles

OTA Enrollment

Mobile Device Management

Technologies

Configuration Profiles

OTA Enrollment

Mobile Device Management

OTA Enrollment

Features

- User login via web portal
- Deliver custom profile
- SCEP to deliver enrollment identity
 - Profiles can be encrypted

Mobile Device Management

Mobile Device Management

Features

- Manage devices on demand, over the air
- Works over Wi-Fi and cellular networks
- Transparent to the user

Mobile Device Management

Features

- Initiation using Apple Push Notification
- Communication over HTTPS
- Comprehensive management features
 - Remote commands
 - Queries

Mobile Device Management

Remote commands

- Install and remove configuration profiles
- Install and remove provisioning profiles
- Lock device
- Remove passcode
- Erase

Mobile Device Management

Queries

- Network details
 - Bluetooth and Wi-Fi MAC addresses
 - ICCID
 - Current and SIM carrier network
 - Carrier settings version
 - Phone number
 - Data Roaming setting (on/off)

Mobile Device Management

Queries

- Network details
- Device information
 - Device name
 - UDID, IMEI, and serial number
 - Model name and number
 - OS and build version
 - Modem firmware version
 - Total capacity and free space

Mobile Device Management

Queries

- Network details
- Device information
- Application details
 - List of apps installed
 - App ID, name, and version
 - Size of app and its data
 - Provisioning Profiles installed and their expiry dates

Mobile Device Management

Queries

- Network details
- Device information
- Application details
- Compliance and security information
 - Installed Configuration Profiles
 - Certificates and expiry dates
 - List of restrictions in effect
 - Data Protection capability
 - Passcode compliance

Mobile Device Management

Queries

- Network details
- Device information
- Application details
- Compliance and security

MDM Server

Mobile Device Management

Managed Profiles

MDM Server

Mobile Device Management

Managed Profiles

MDM Server

- May examine all profiles

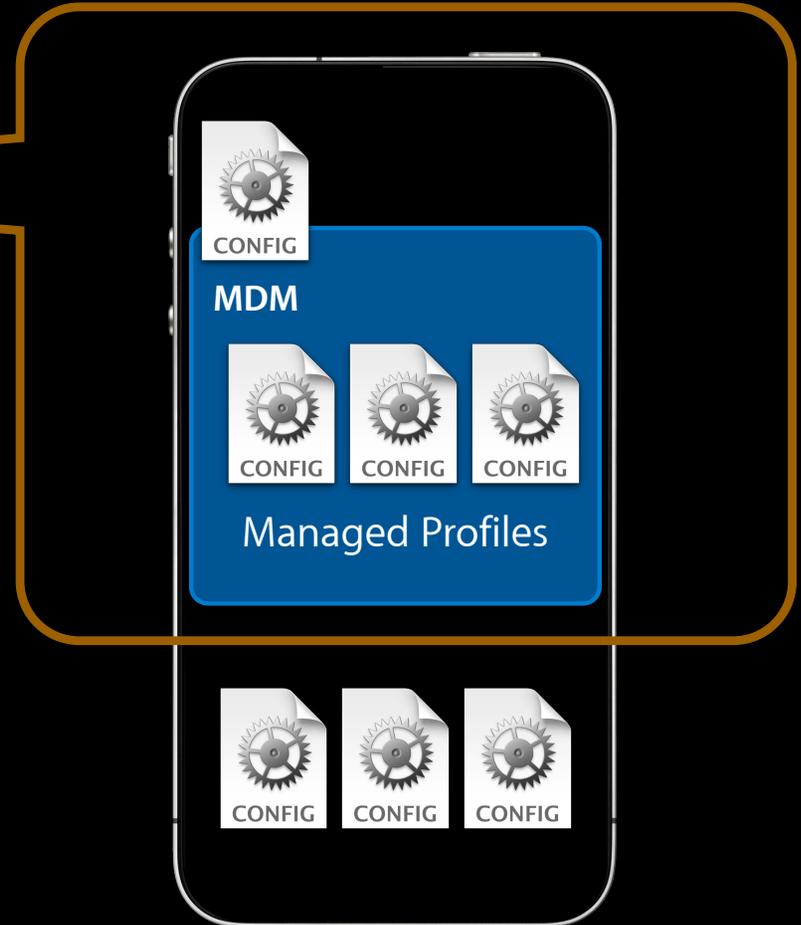

Mobile Device Management

Managed Profiles

MDM Server

- May examine all profiles
- May remove or replace only Managed Profiles

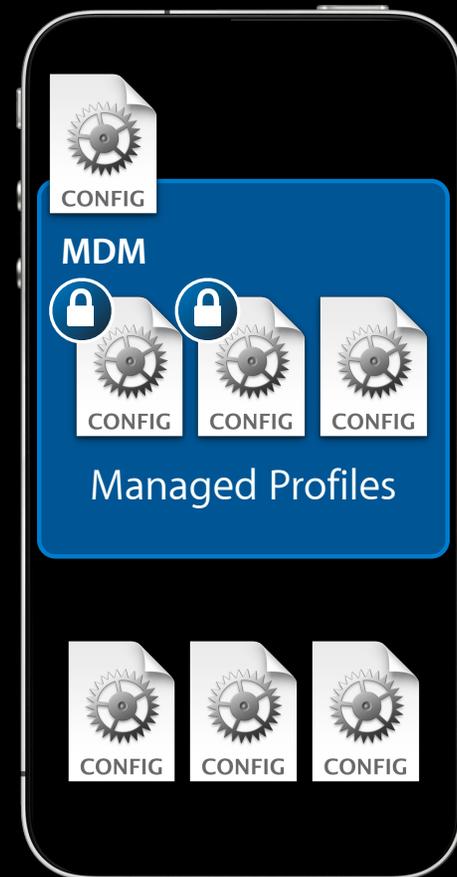

Mobile Device Management

Managed Profiles

MDM Server

- Managed Profiles may be locked (cannot be removed)
- Root MDM profile may **not** be locked
 - User may terminate MDM relationship at any time

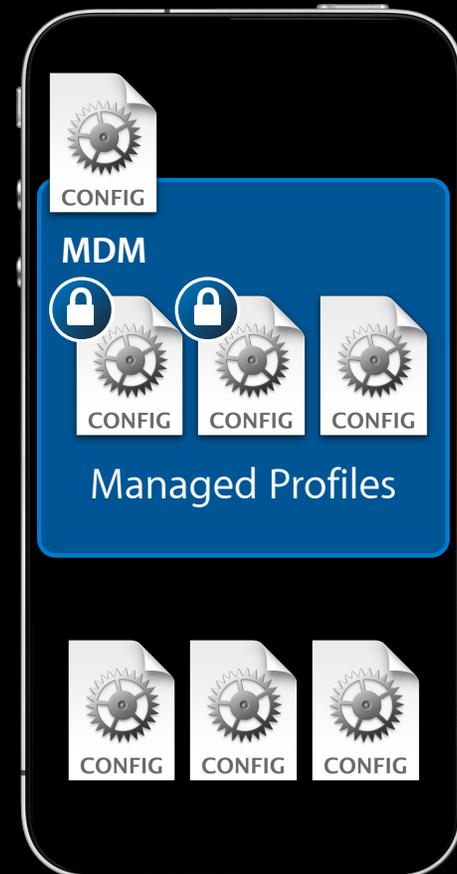

Mobile Device Management

Managed Profiles

MDM Server

- Managed Profiles may be locked (cannot be removed)
- Root MDM profile may not be locked
 - User may terminate MDM relationship at any time
- Removing Root MDM profile removes all Managed Profiles

Mobile Device Management

Carrot and stick

- Two approaches
 - Restrictions and accounts in a single profile
 - Using MDM
 - Install restrictions in a locked profile
 - Wait for user to comply
 - Install account in separate profile

Wireless Enterprise App Distribution

Wireless Enterprise App Distribution

Features

- Wireless distribution of in-house apps
- Uses your web server
- Xcode integration

Demo

Wireless Enterprise App Deployment

Wireless Enterprise App Distribution

What you need

- Web server
- Your app's distribution provisioning profile

- Application in .ipa format
- XML manifest file

Automated by Xcode

Wireless Enterprise App Distribution

Works best with MDM

- Install web clip for App Catalog website
- Install and renew provisioning profiles
- Monitor app versions

Wireless App Distribution

What Next?

Start using these technologies

- Download iPhone Configuration Utility
 - Free of charge
 - Ideal for small workgroups
- Develop a solution
 - Join the Enterprise Developer Program
 - Review documentation
 - Fully customized solution
- Purchase third-party solution
