

Introducing Xcode 4

Anders Bertelrud
Xcode Architect

Brooke Callahan
Software Engineer

Ron Lue-Sang
Senior Software Engineer

What Is Xcode 4?

- Improved workflow
- Interface Builder inside
- Editor Assistant
- LLVM Compiler
- Fix-it
- Version Editor
- New Debugger

What We'll Cover

- Workspaces
- Navigation
- Editing
- Organizer
- Version Editor
- Debugging
- Schemes

What We'll Cover

- Workspaces
- Navigation
- Editing
- Organizer
- Version Editor
- Debugging
- Schemes

Demo

What's where in the workspace window

What Did We Just See?

Workspace

- Represents your workflow
- Loose collection of references
 - Projects
 - Folders
 - Any other kind of file (PDFs, etc.)
- Contains **schemes**
 - Launch schemes
 - Distribution schemes

Workspace

- Projects can be shared between workspaces
- Every workspace has its own index, build folder

Workspaces

What they contain

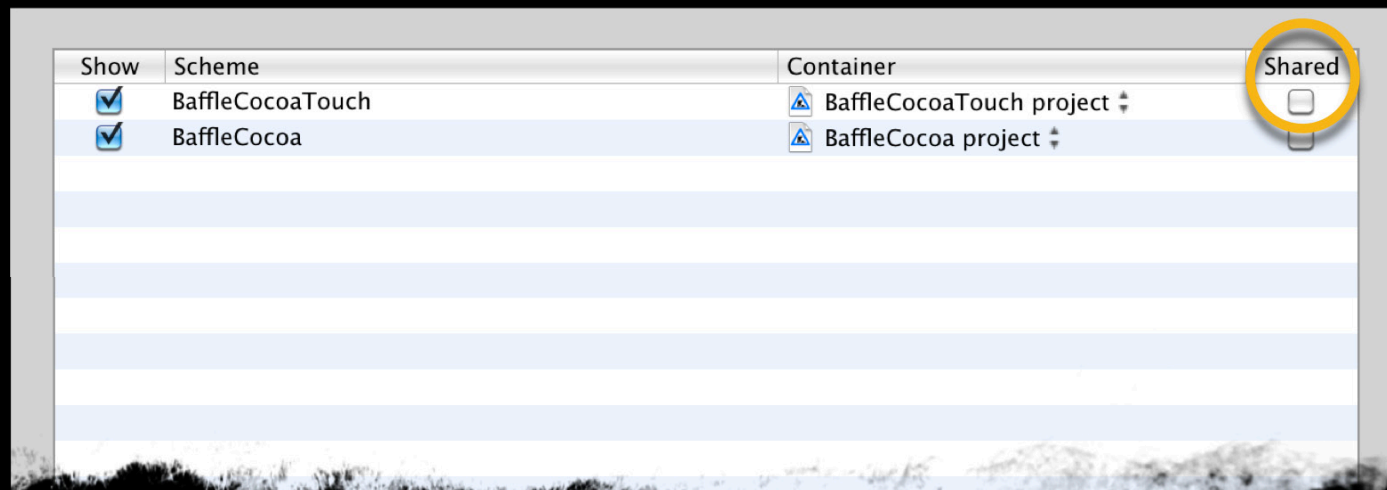

- References
- Schemes
- Breakpoints
- Window layout

Workspaces

Information sharing

- Each piece of information can be private or shared
- User decides, based on their desired workflow

The screenshot shows a table with three columns: 'Show', 'Scheme', and 'Container'. The 'Show' column has checkboxes for 'BaffleCocoaTouch' and 'BaffleCocoa'. The 'Container' column lists 'BaffleCocoaTouch project' and 'BaffleCocoa project'. A 'Shared' button with a lock icon is highlighted in the top right corner of the table.

Show	Scheme	Container	Shared
<input checked="" type="checkbox"/>	BaffleCocoaTouch	 BaffleCocoaTouch project ↕	<input type="checkbox"/>
<input checked="" type="checkbox"/>	BaffleCocoa	 BaffleCocoa project ↕	<input type="checkbox"/>

Workspaces

Sharing model

- Can share workspaces through SCM, email, etc.

Workspaces

Sharing model

- Can share workspaces through SCM, email, etc.
- Other workspaces might be temporary and not shared

Workspaces

Work across all projects in the workspace

- Symbol lookup search
- Documentation search
- Find and replace

Workspaces

Coordinated builds

- Custom build actions in schemes
 - Arbitrary dependencies
 - Custom scripts
- Implicit dependencies
 - Projects don't need to know about each other

What We'll Cover

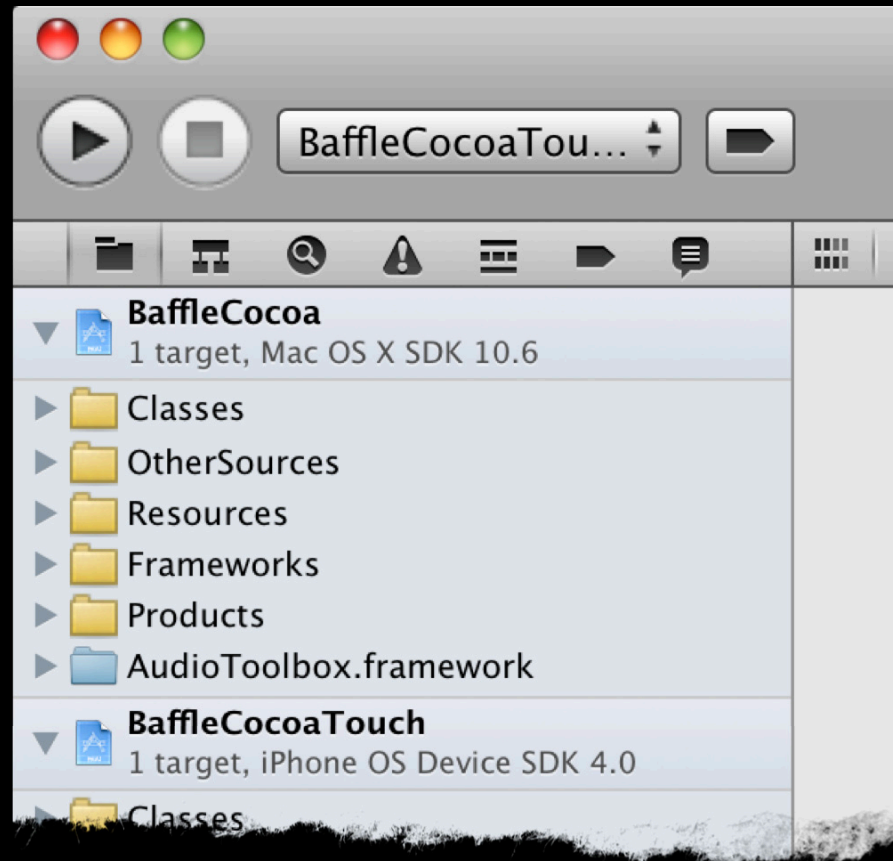

- Workspaces
- Navigation
- Editing
- Organizer
- Version Editor
- Debugging
- Schemes

What We'll Cover

- Workspaces
- **Navigation**
- Editing
- Organizer
- Version Editor
- Debugging
- Schemes

Navigating

Structure navigation

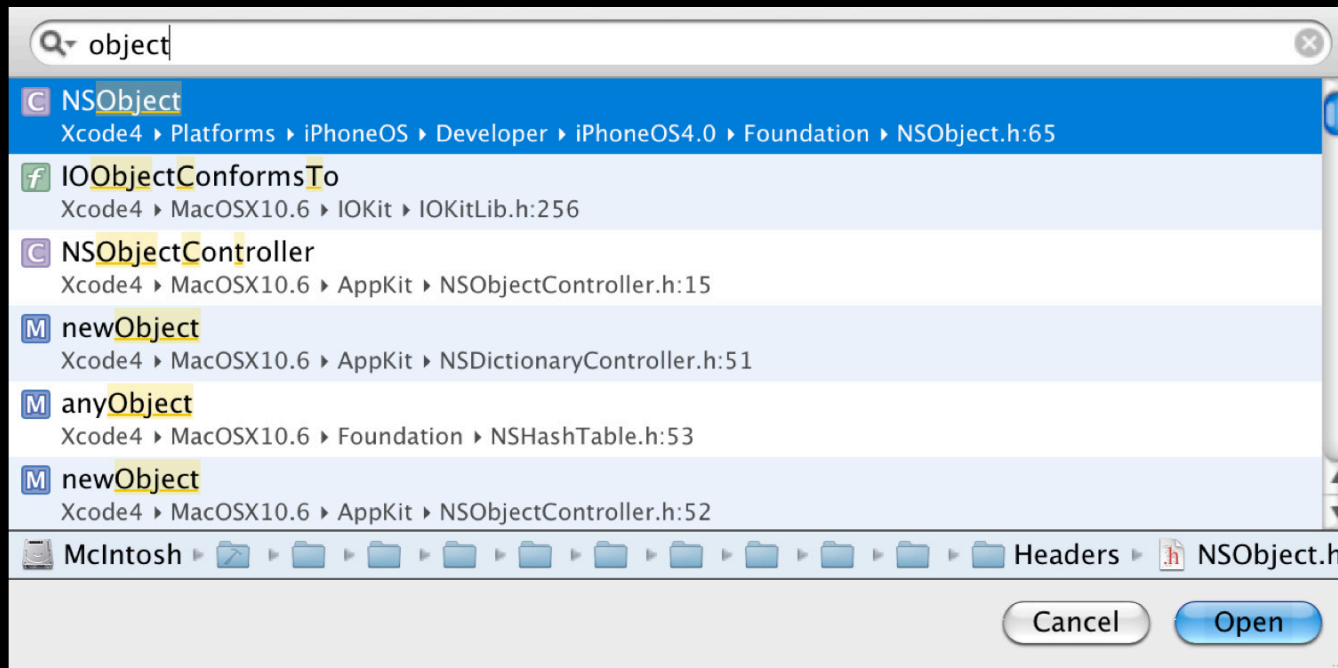

Navigating

Filtering

Navigating Open quickly

What We'll Cover

- Workspaces
- **Navigation**
- Editing
- Organizer
- Version Editor
- Debugging
- Schemes

What We'll Cover

- Workspaces
- Navigation
- **Editing**
- Organizer
- Version Editor
- Debugging
- Schemes

Editing

- Xcode automatically shows related content
- Three types of editing behavior

Standard

Assistant

Version

Editing

- New ways to work with files
 - Source Code
 - Interface Builder (.nib and .xib)
 - Data Model
 - Hex
 - Preview

Editing

- New ways to work with editors
 - Jump Bar
 - Assistant Editor Support
 - Inspector
 - Library

Demo

Editing and searching

What We'll Cover

- Workspaces
- Navigation
- **Editing**
- Organizer
- Version Editor
- Debugging
- Schemes

What We'll Cover

- Workspaces
- Navigation
- Editing
- **Organizer**
- Version Editor
- Debugging
- Schemes

- Editing
- Organizer
- Version Editor
- **Debugging**
- Schemes

What We'll Cover

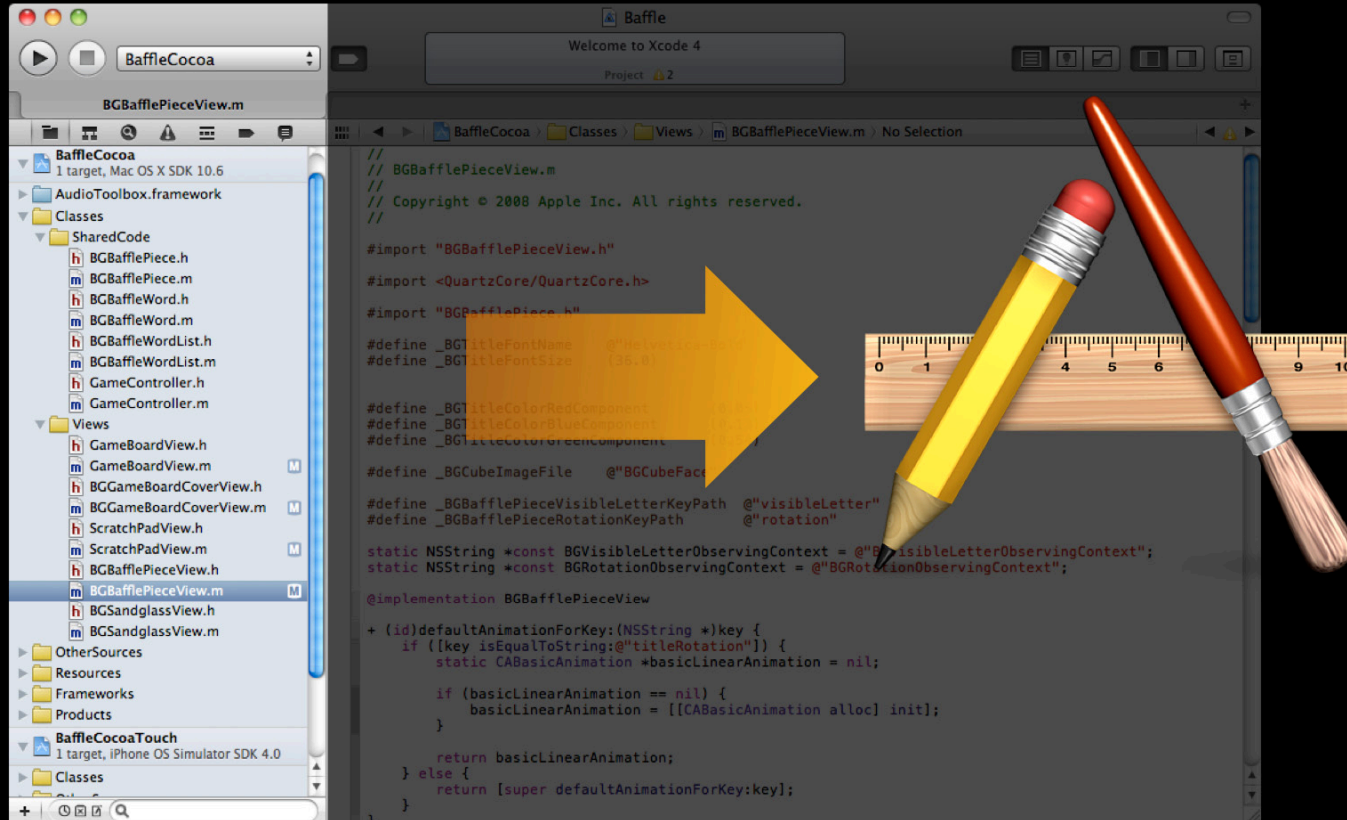

- Workspaces
- Navigation
- Editing
- Organizer
- Version Editor
- Debugging
- Schemes

scheme lskēml

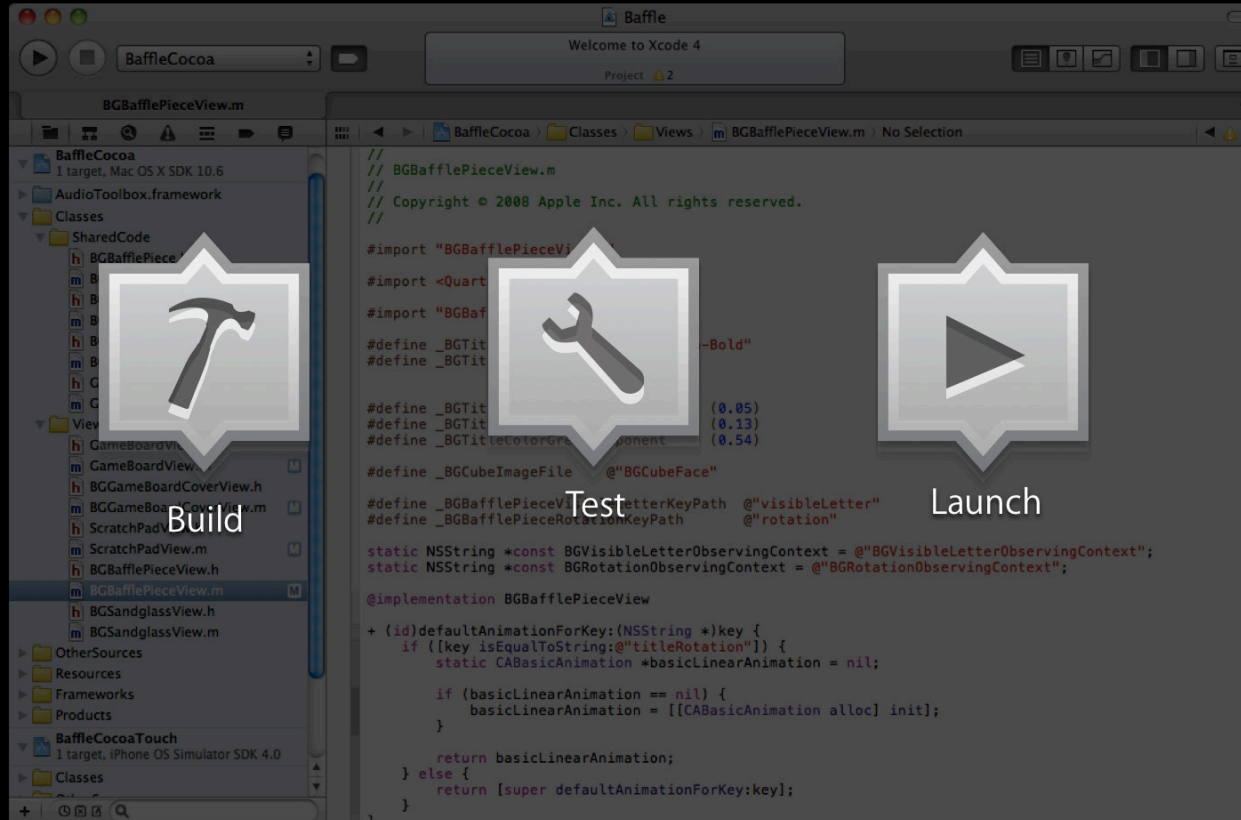

noun

a large-scale systematic **plan** or arrangement for
attaining some particular object or putting a particular idea into effect.

Scheme

Three Phases of a Scheme

Feature Development

App and library
Debug configuration

MyNewUnitTests target

Launch MyApp in the Debugger

Bug Fixing

App and library
Debug configuration

Launch MyApp in Debugger
Diagnostics (MallocStackLogging, etc.)

Performance Testing

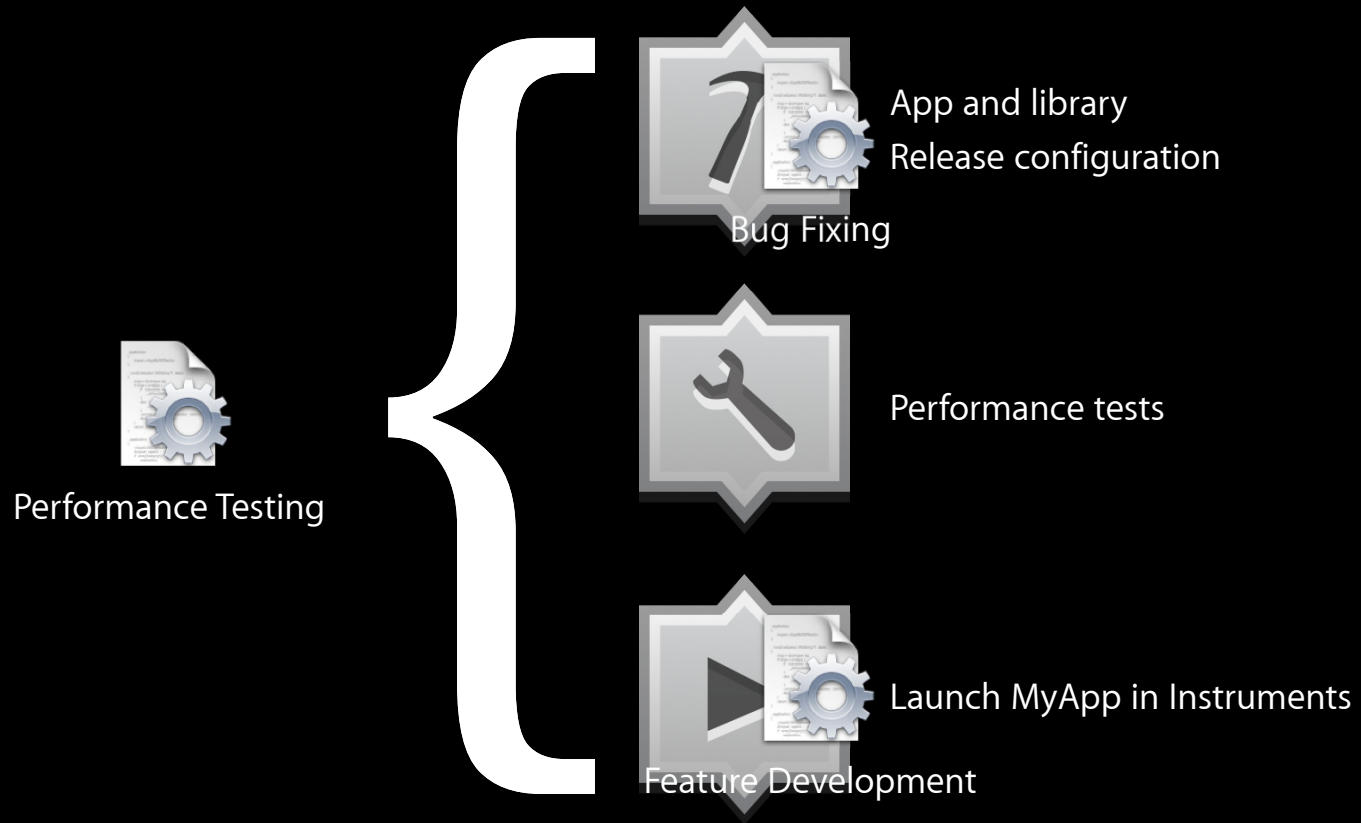

App and library
Release configuration

Performance tests

Launch MyApp in Instruments

Launch
Schemes

Bug Fixing

Performance Testing

Feature Development

Distribution
Schemes

Build All, Create Debug DMG

Build + Test + Create DMG

Create Application

Build + Test + Create DMG

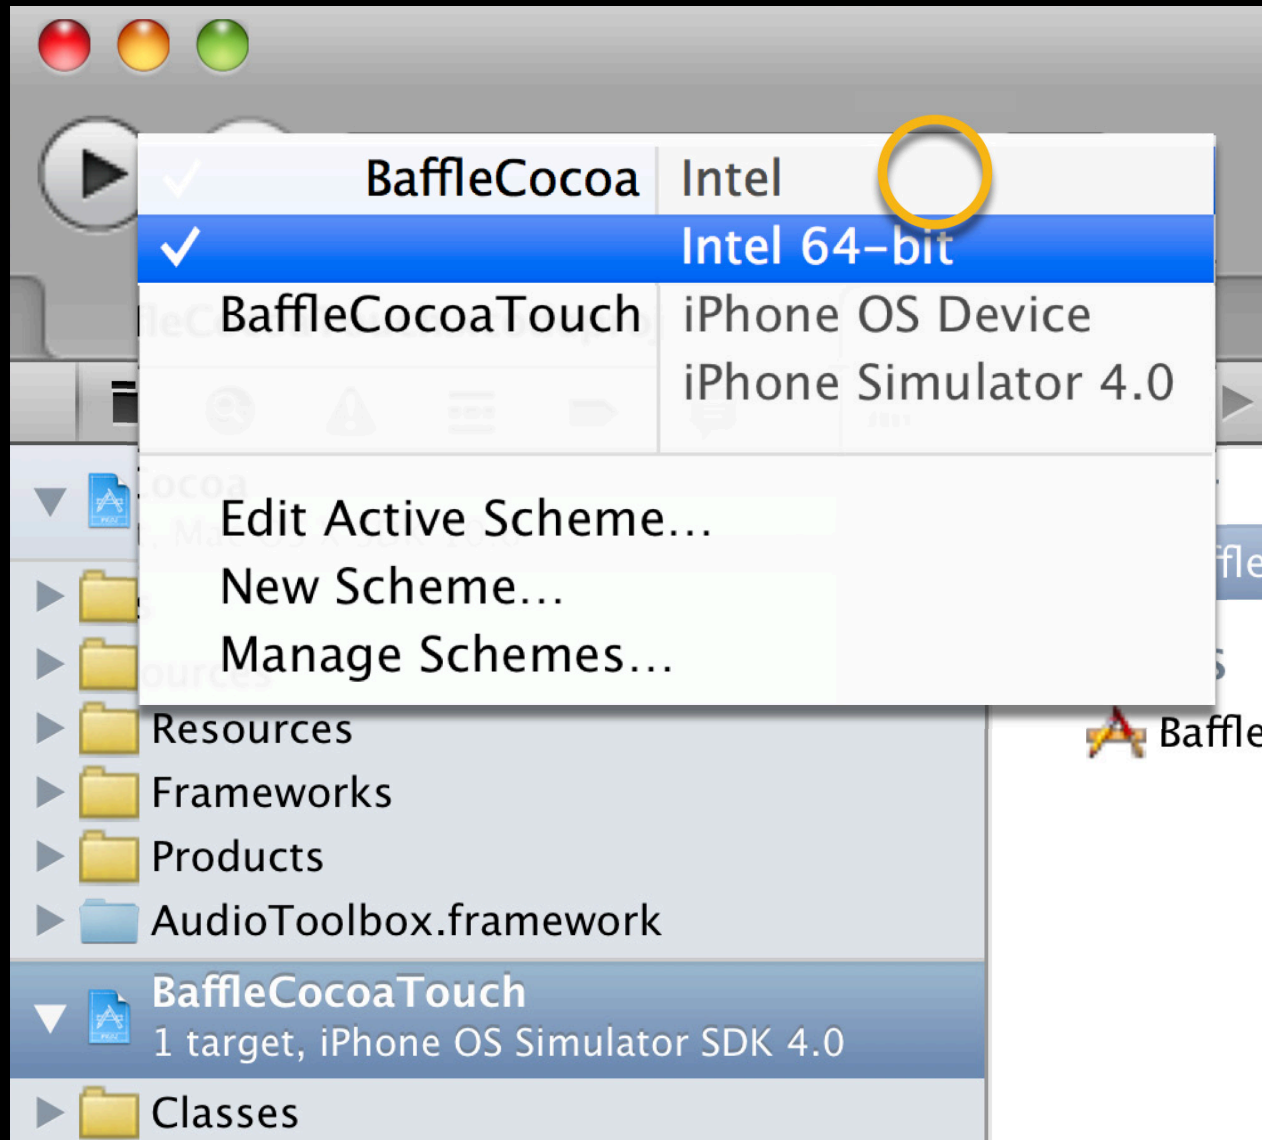

App and library
Release configuration

All unit tests

Archive MyApp to .dmg

Demo

Schemes

What We'll Cover

- Workspaces
- Navigation
- Editing
- Organizer
- Version Editor
- Debugging
- Schemes

What We Covered

- Workspaces
- Navigation
- Editing
- Organizer
- Version Editor
- Debugging
- Schemes
