What You'll Learn

- Definition of a Game Center game
- Definition of a Game Center player
- Game Center app overview
- GameKit framework overview
- Development vs. production

Definitions

Game Center Game Definition

Required

Register Bundle Identifier

Player Authentication

Optional

Leaderboards

Achievements

Multiplayer

Game Center Game

Features

- Invite notifications with purchase/upgrade option
- Listed in Game Center with purchase option
- Friend comparisons of scores and achievements
- Secure player registration and authentication
- Friend relationships

Game Center Player Definition

Required

iTunes Account/Apple ID

Unique Nickname

Optional

Status Message

Friends

Game Center Player

Features

- Available in games
 - Nickname
 - Unique Player ID
 - Underage
 - Friends
- Available in Game Center app
 - Status message
 - Games played and statistics for those games
 - Recently played

Game Center App Overview

Game Center App Overview

Built in app to promote social gaming

- Player account creation and modification
- Create and manage friend relationships
- View friend details
- View game details
- Purchase games
- Launch games with or without invites

Game Center

Me tab

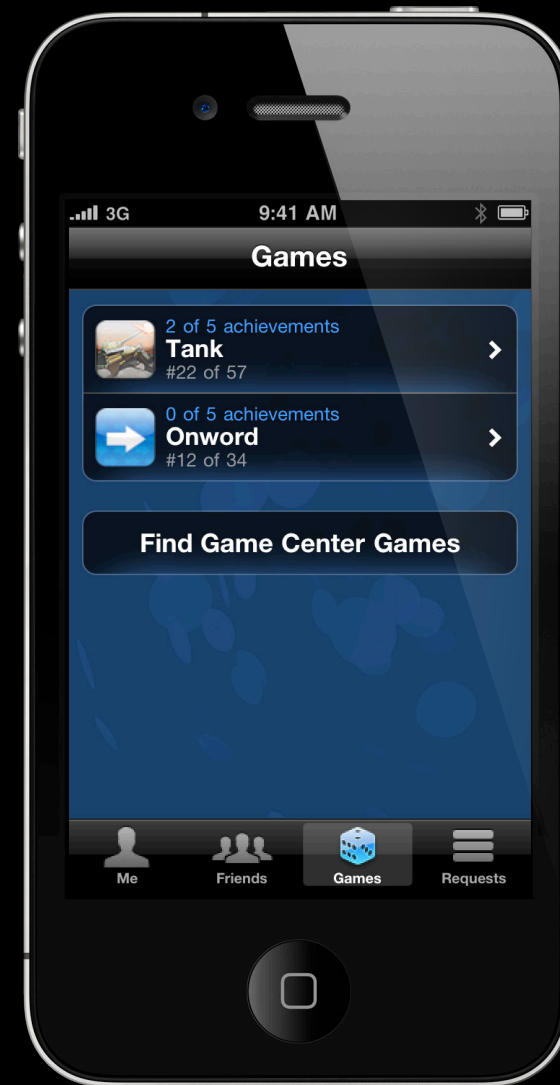

- Player overview
- Status management
- Account management
 - Log out/log in
 - Create account
 - Change account settings

Game Center

Games tab

- List of Game Center enabled games that this player has played
- Ordered by last played
- Summation of stats per game
- Buy other Game Center games

Game Center

Friends tab

- List of Game Center friends
- Ordered by most recently authenticated
- Status and game last played

Game Center

Friend's details

- Three categories
- Listed by most recently played
- Option to purchase games you don't own

Game Center

User's and Friend's Game Details

- Comparison overview
- Leaderboard
- Achievements
- User's Game Details

GameKit Framework Overview

Framework to enhance game development

- Authenticating a user
- Submitting scores and displaying leaderboards
- Submitting and displaying achievements
- Establishing multiplayer games
- In game voice chat

GameKit

Authenticating a user

- As soon as UI can be presented
- Asynchronous
 - Connectivity
 - Account login
 - Account creation
- Player information includes
 - Unique ID
 - Nickname

GameKit

Leaderboards

- Display
 - Standard UI—landscape/portrait
 - Custom UI
- Features
 - Filter by friends or all players
 - Filter by time—today, this week, all time
 - Query number of entries
 - Retrieve ranges

GameKit

Leaderboards—set up

- Enable
- Sort order
- Suffix
- Format
- Languages

Leaderboards—usage

- One leaderboard for all versions of your app
- Do not download all entries!

GameKit

Developer specified leaderboards

- Multiple leaderboards set up in iTunes Connect
 - Localized labels
 - All or default selection
- Automatic overall leaderboard
- Scores submitted with optional category
- Query server based upon category and any of the standard filters

GameKit

Achievements

- Display
 - Standard UI—landscape/portrait
 - Custom UI
- Features
 - Before and after achieved states
 - Progress on achievements
 - Hidden achievements

GameKit

Achievements—usage

- One set per app—not versioned
- Set up through iTunes Connect

Coming
Soon

GameKit

Multiplayer

- Game invitations
- Auto-matching
- Multiplayer UI
- Matchmaking only
- In-game voice chat

GameKit

Multiplayer—game invitations

- Invite if friend has the app
- Invite if friend does not have the app

GameKit

Multiplayer—Auto-Matching

- Players launch game
- Players select to be auto-matched
- Match-making server finds best matches
- P2P or server based connections established
- Play!
- Player groups
- Player attributes

GameKit

Multiplayer—Auto-Matching

GameKit

Multiplayer—Auto-Matching

GameKit

Multiplayer—Auto-Matching—P2P or Hosted

GameKit

Multiplayer—Auto-Matching with player groups

GameKit

Multiplayer—Auto-Matching with player groups

Auto-Matching

Multiplayer—Auto-Matching with player attributes

- Fighter 
- Magic-User 
- Cleric 
- Thief 

GameKit

Multiplayer—Auto-Matching with player attributes

GameKit

Multiplayer—UI

- Adjust the number of people you want to play with—
Game sets the min and max
- Invite Friends with
personalized messages
- Auto-Match
- Combo Match

GameKit

In Game Voice Chat

- Control participation
- Adjust/mute the volume of a channel

Development vs. Production

Development vs. Production

Sandbox

- Development area
 - New titles
 - New versions of current titles

Development (Sandbox) vs. Production

Accounts and servers

- Separate nickname namespace
- Separate Game Center servers
 - Matching
 - Leaderboards
 - Achievements

Switching

- Not an issue until you have production and sandbox Game Center games
- Logout with Game Center app
- Launch app
- Log in

Development

After iOS 4 release

- Download the development IPSW for your device and install via iTunes (just like Beta)
- Device IPSW's will be available at <http://developer.apple.com>
- Game Center is still a preview
- No AppStore submissions

The screenshot shows the Apple Developer website's iPhone Dev Center. The page is titled "iPhone Dev Center" and has a navigation bar with links for "Technologies", "Resources", "Programs", and "Support". Below the navigation bar, there's a "View:" section with "iPhone SDK 3.2" and "iPhone SDK 4 beta" buttons. The main content area is titled "Developing for iPhone OS 4 beta 4" and is divided into two columns. The left column, "Resources for iPhone OS 4 beta 4", includes links for "Downloads" (to download the latest iPhone SDK 4 beta), "iPhone Reference Library" (for technical documentation), "Sample Code" (for inspiration), and "Apple Developer Forums" (for discussion). The right column, "Featured Content", includes links for "What's New in iPhone OS 4", "Supporting Multitasking In Your Applications", "Advertising Framework Reference", "Game Kit Framework Reference", "iPhone SDK 4 beta 4 Release Notes", and "iPhone OS 4 beta 4 API Diff". Below these columns is a "Downloads" section with a yellow warning box that says "Read me before downloading" and a link to "Show details". Underneath, there's a section for "iPhone SDK 4 beta 4" with a description: "This is a pre-release version of iPhone SDK 4 beta to support development of applications for iPhone and iPod touch. Please review the Release Notes and Read Me before installing this beta software release." It also includes the date "Posted: May 18, 2010" and the build number "Build: 10M2252". At the bottom, there's a "Downloads" section with links for "Xcode 3.2.3 and iPhone SDK 4 beta 4 (Snow Leopard)", "Xcode 3.2.3 Readme", "iPhone SDK 4 beta 4 Release Notes", and "iPhone OS 4 beta 4 API Diff".

Summary

Mike Lampell

Summary

- Easy ways to enhance social gameplay
 - Player identification
 - Leaderboards
 - Achievements
 - Game invites and auto-matching
- Flexibility
- Skinability
- Viral distribution options
