Best Practices

Best Practices

Lazy payload update

Use `needsSave` for lazy payload updates

```
func updateActivityForEachKeystroke() {  
    activity.userInfo = ["textContent": textField.text]  
}
```

Best Practices

Lazy payload update

Use `needsSave` for lazy payload updates

```
func updateActivityForEachKeystroke() {  
    activity.userInfo = ["textContent": textField.text]  
}
```

Best Practices

Lazy payload update

Use needsSave for lazy payload updates

```
func updateActivityForEachKeystroke() {  
    activity.userInfo = ["textContent": textField.text]  
}
```

```
func updateActivityForEachKeystroke() {  
    activity.needsSave = true  
}  
  
override func updateUserActivityState(_ activity: NSUserActivity) {  
    activity.addUserInfoEntries(from: ["textContent": textField.text])  
}
```

Best Practices

Scope of current activity

Keep a strong reference to the current activity

```
func updateActivity() {  
    let activity = NSUserActivity(activityType: "com.example.my-activity")  
    // setup user activity  
    activity.becomeCurrent()  
}  
  
// activity is released
```

Best Practices

Scope of current activity

Keep a strong reference to the current activity

```
func updateActivity() {  
    let activity = NSUserActivity(activityType: "com.example.my-activity")  
    // setup user activity  
    activity.becomeCurrent()  
}  
  
// activity is released
```

Best Practices

Scope of current activity

Keep a strong reference to the current activity

```
func updateActivity() {  
    let activity = NSUserActivity(activityType: "com.example.my-activity")  
    // setup user activity  
    self.userActivity = activity  
    activity.becomeCurrent()  
}
```

Best Practices

Scope of current activity

Keep a strong reference to the current activity

```
func updateActivity() {  
    let activity = NSUserActivity(activityType: "com.example.my-activity")  
    // setup user activity  
    self.userActivity = activity  
    activity.becomeCurrent()  
}
```

Best Practices

Transfer a small userInfo payload

Transfer a small payload in the userInfo dictionary

```
let imageData: Data // Downloaded image data from a web service
let photo = UIImage(data: imageData)

activity.userInfo = ["photoData": imageData]
```

Best Practices

Transfer a small userInfo payload

Transfer a small payload in the userInfo dictionary

```
let imageData: Data // Downloaded image data from a web service
let photo = UIImage(data: imageData)

activity.userInfo = ["photoData": imageData]
```

Best Practices

Transfer a small userInfo payload

Transfer a small payload in the userInfo dictionary

```
let imageData: Data // Downloaded image data from a web service
let photo = UIImage(data: imageData)

activity.userInfo = ["photoData": imageData]
```

```
activity.userInfo = ["photoRemoteURL": imageRemoteURL]
```

Best Practices

Unique activity types

Use reverse-DNS notation for your activity types

```
let activity = NSUserActivity(activityType: "my-activity")
```

Best Practices

Unique activity types

Use reverse-DNS notation for your activity types

```
let activity = NSUserActivity(activityType: "my-activity")
```

Best Practices

Unique activity types

Use reverse-DNS notation for your activity types

```
let activity = NSUserActivity(activityType: "my-activity")
```

```
let activity = NSUserActivity(activityType: "com.example.view-location")  
let activity = NSUserActivity(activityType: "com.example.search-location")
```

Promoting Your Media App

Overview

iOS promotes the app a user is likely to use based on behavior

Suggestions are offered in Spotlight and Today View

If they follow a particular trigger, suggestions may be elevated to the lock screen

For example:

- After plugging in headphones or a BT device (Podcasts, Music)
- After getting in a car (Maps)
- After arriving at home or work (Agenda app)

With a simple API, you can build a far more engaging lock screen experience

NSUserActivity and schema.org

The more the system
knows about your app,

The more the system
knows about your app,
the more opportunity it will
have to promote it.
