Description ?

LightRight gives photographers the capability to capture and bookmark ideal natural light conditions. Hone your photography skills with the ideal app for lighting, rather than relying on a picture editor. Log and reference every color change to help you re-capture a given mood or moment. Spend less time with a camera editor or filter for photos, and get the light right with every shot.

Use LightRight to log lighting conditions like time, location, sun position, as well as meteorological variables like fog, cloud cover, pollen count, particulate matter, or wind.

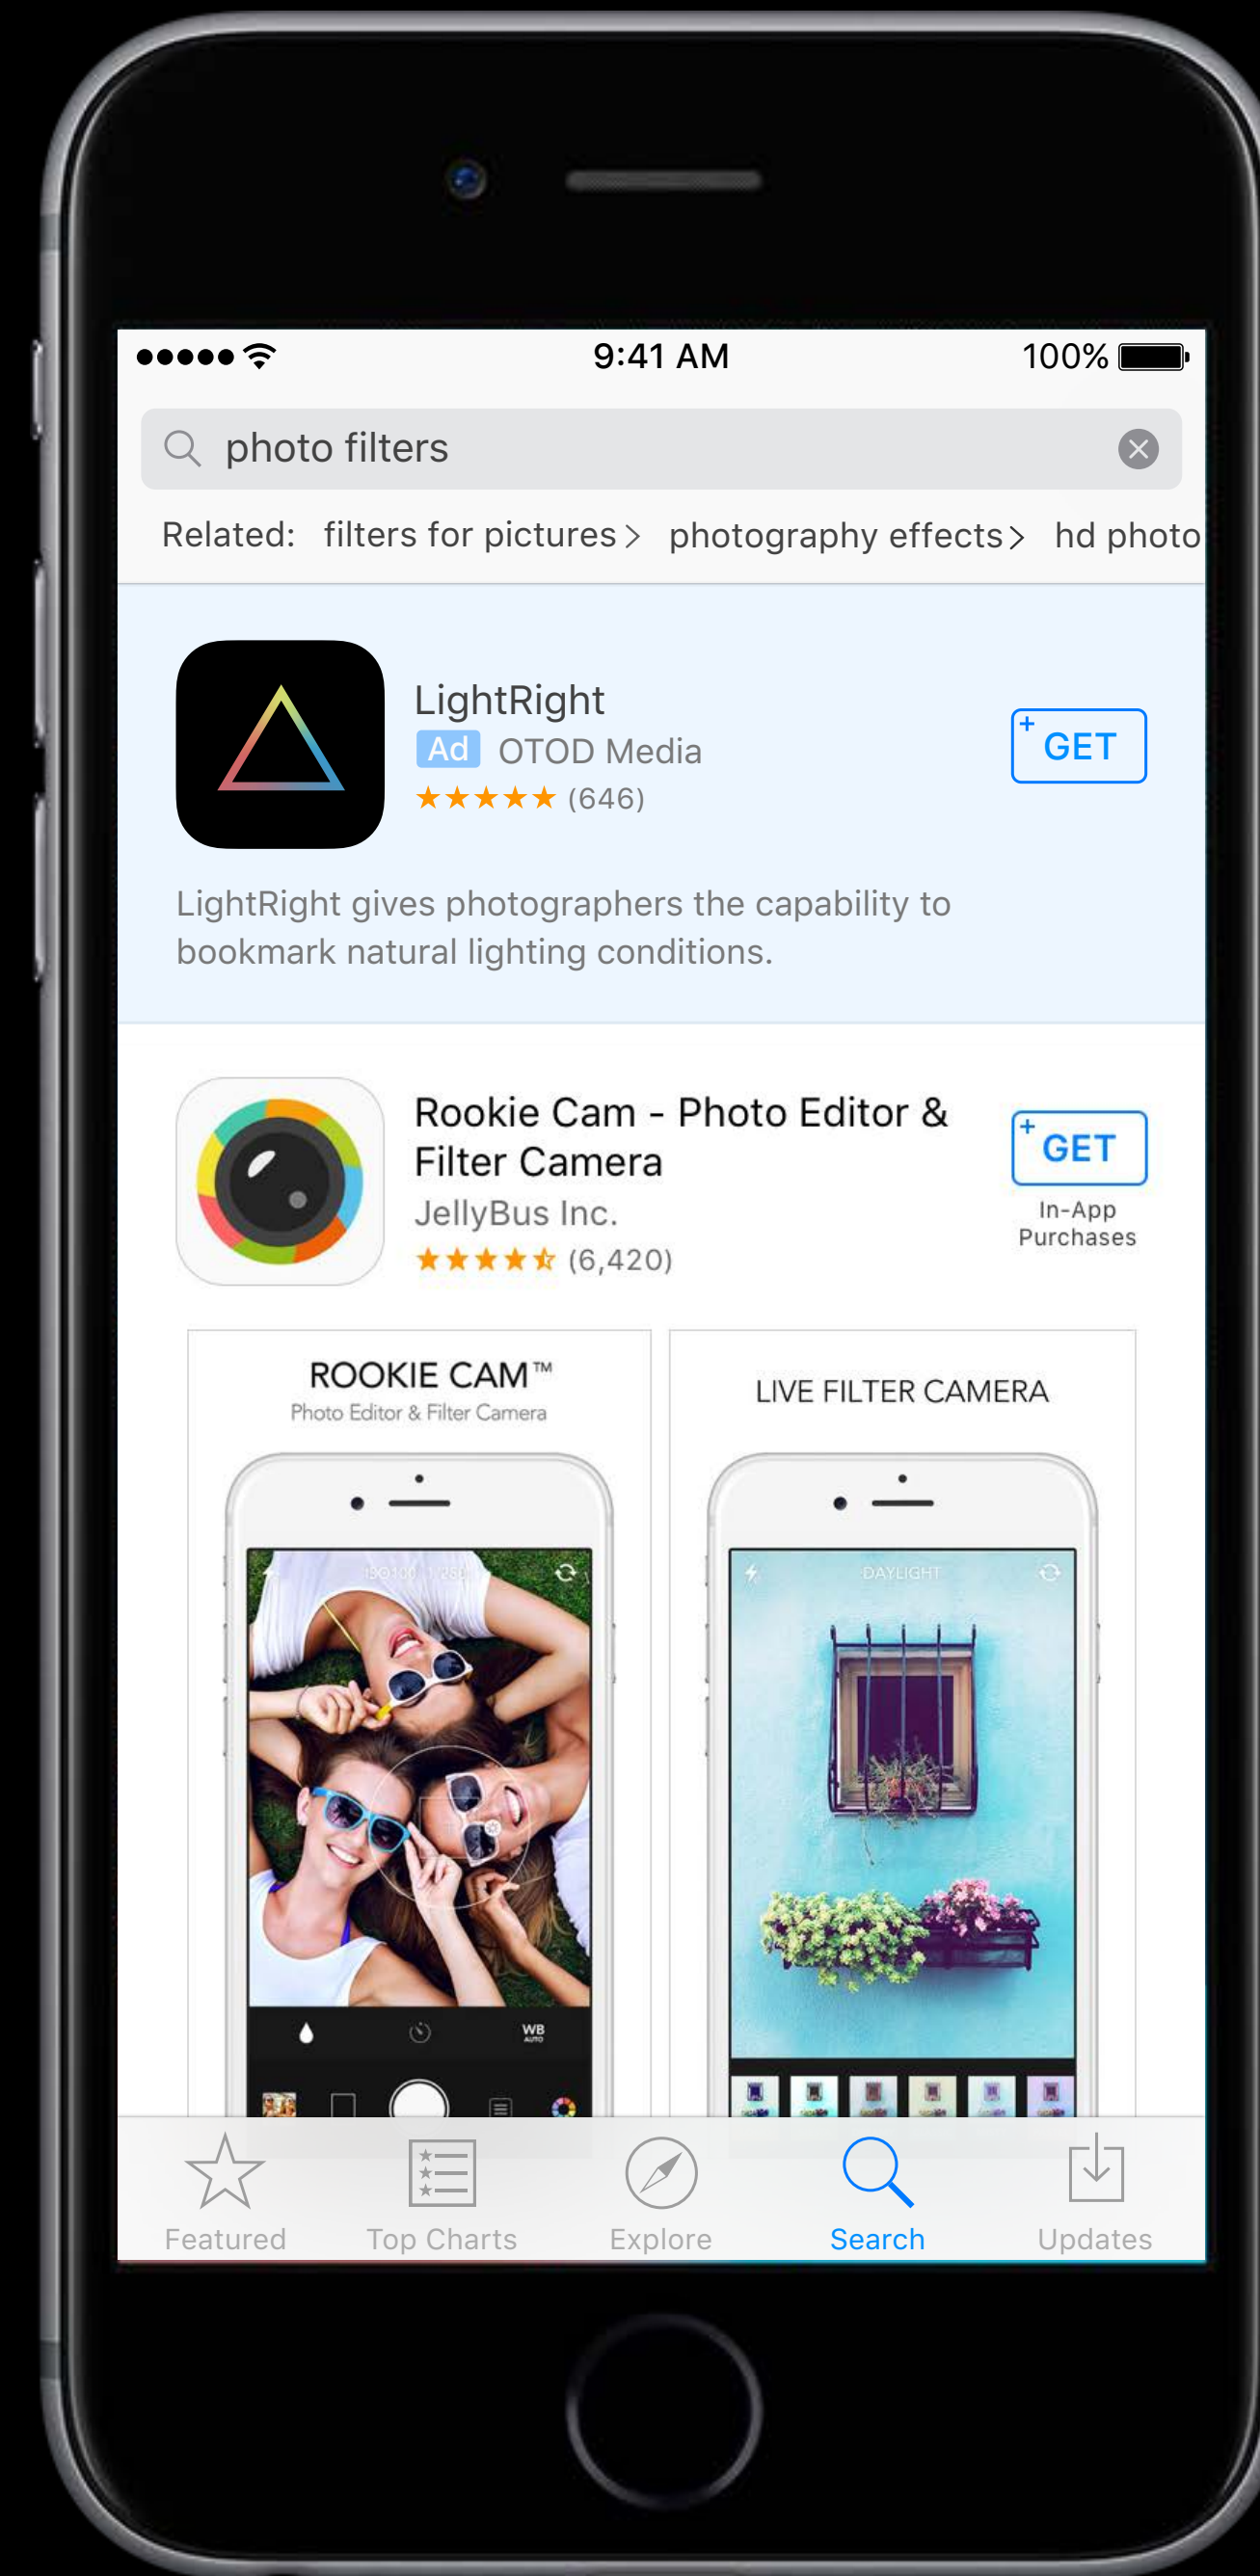

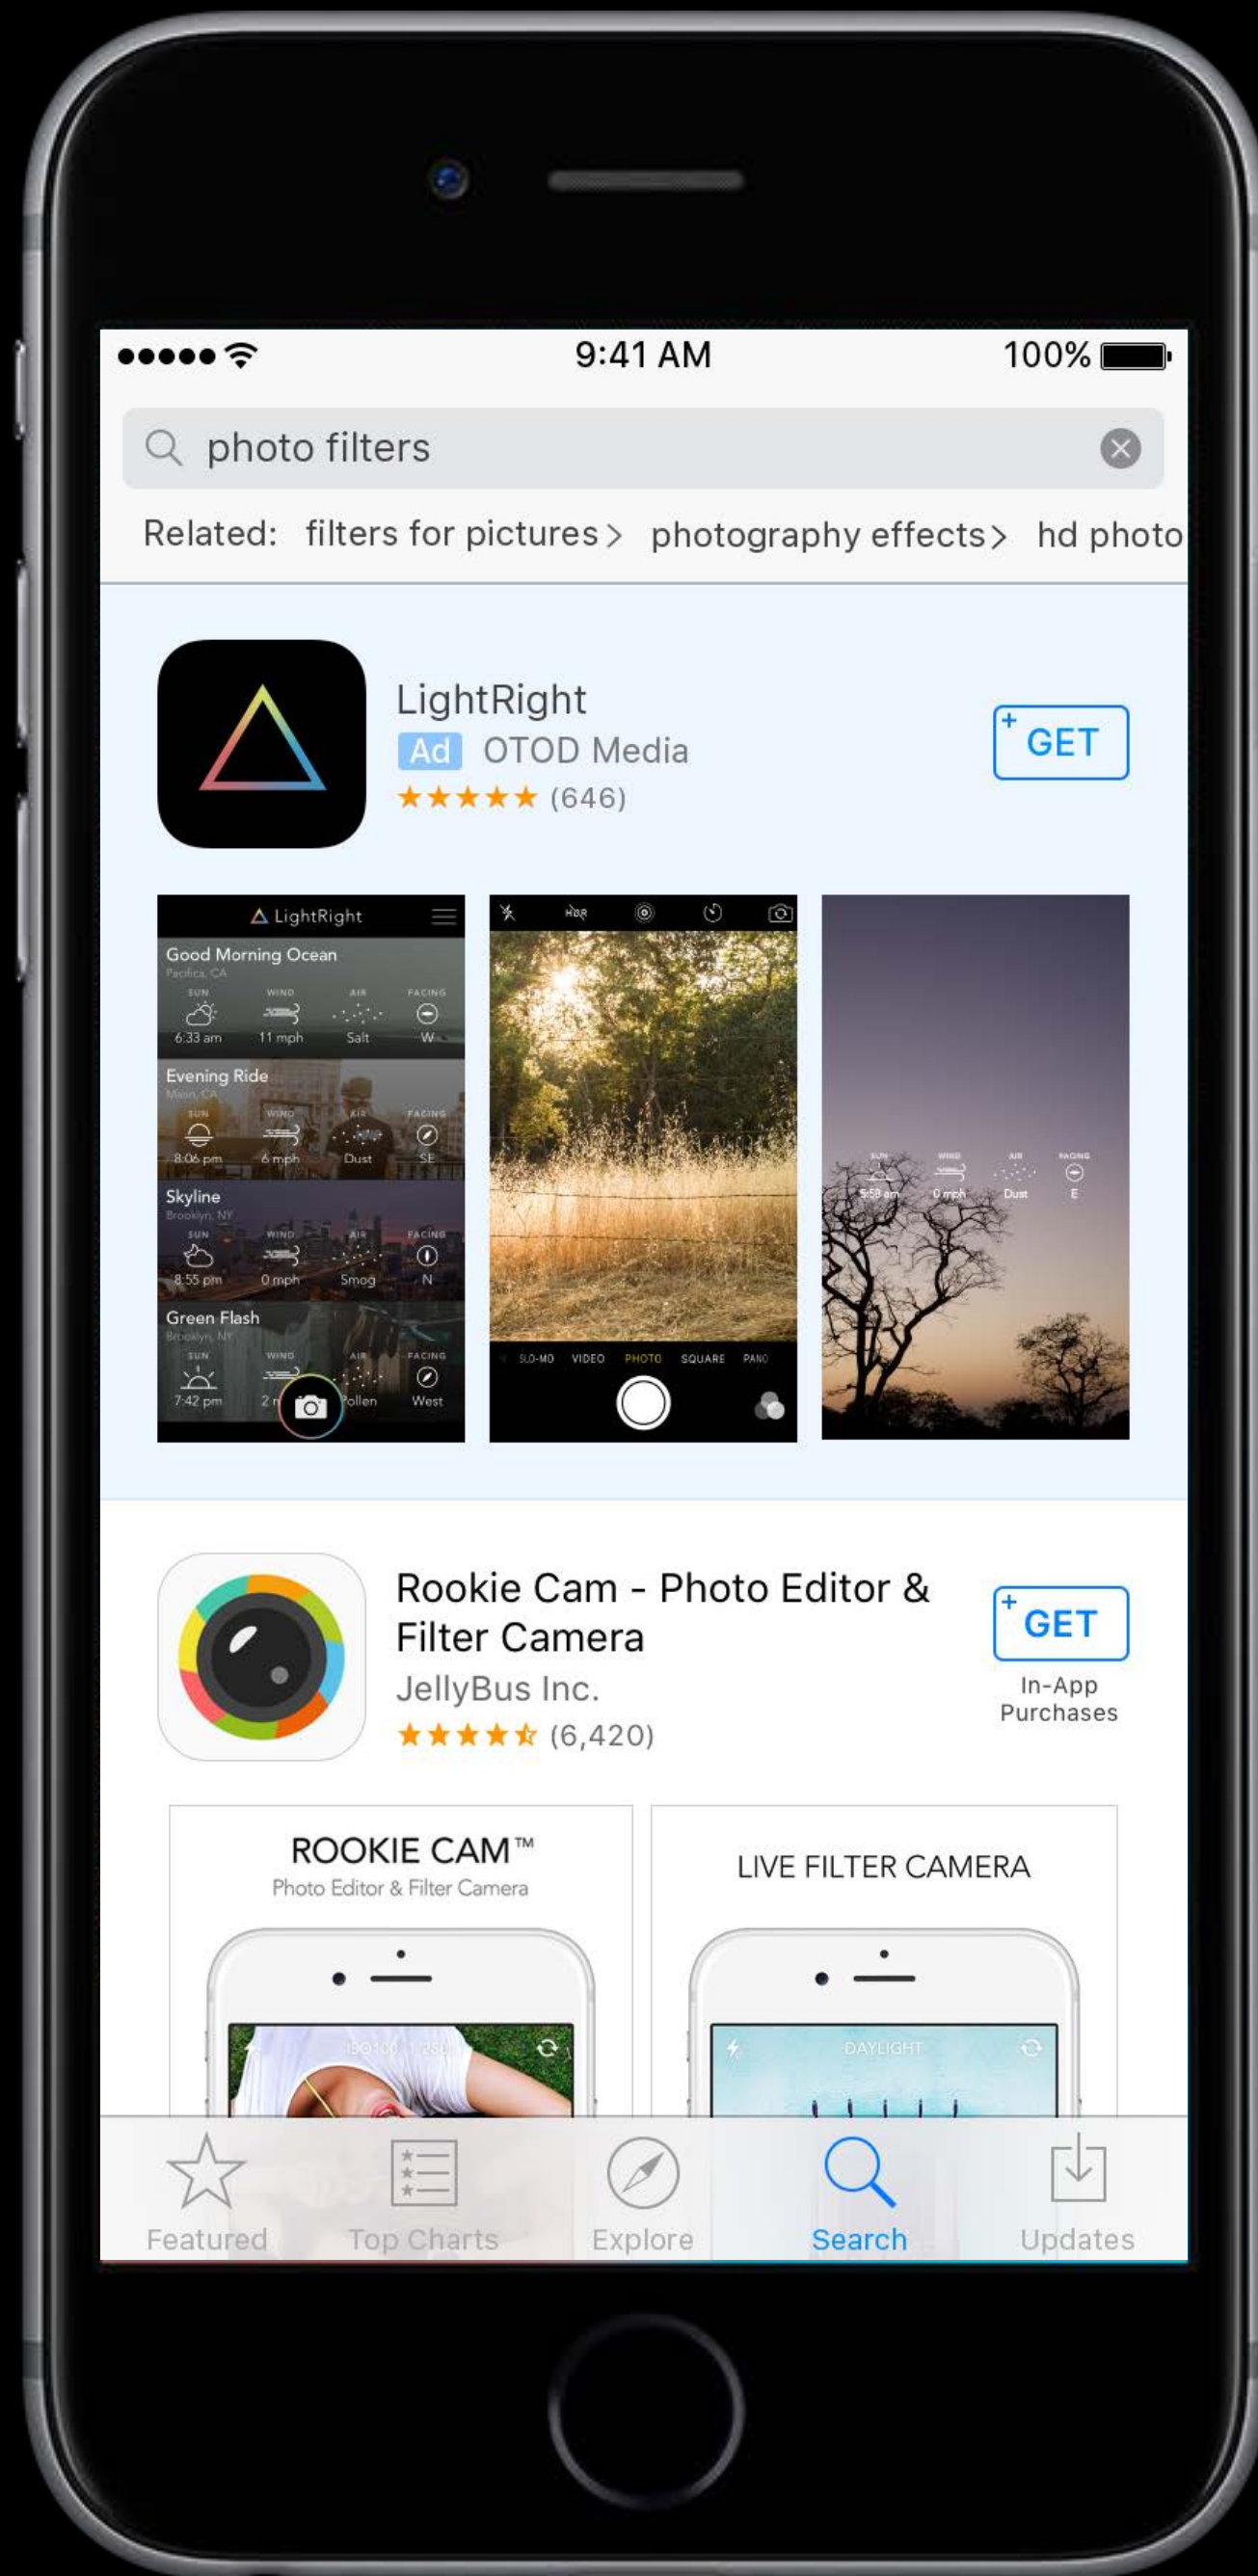

Bookmark each unique lighting condition for easy reference and access. Add your own custom description to describe each moment.
