1920 x 720

High Resolution Display

Contact Apple for non-standard resolutions

Aftermarket systems

- Minimum physical display size is 6 inches

Automaker systems

- Automakers' responsibility to select the appropriate physical display size

Additional Display Requirements

24-bit color

30 Hz refresh rate (60 Hz recommended)

Hardware support for H.264 video decoding

- High Profile 3.1
- Full range flag

Key Vehicle Requirements

Connection to iPhone

Key Vehicle Requirements

High Resolution Display

Speakers and Microphone

User Input

Sensors

Connection to iPhone

Speaker and Microphone Requirements

Main audio

- Used for media, telephony, and Siri
- Output up to 48 kHz, 16 bit, stereo
- Input at least 24 kHz, 16 bit, mono

Alternate audio

- Used for notifications
- Must always be mixed with main audio
- 44.1 kHz or 48 kHz, 16 bit, mono or stereo

Speaker and Microphone Requirements

Wired CarPlay

- LPCM

Wireless CarPlay

- AAC-LC for media
- OPUS or AAC-ELD for all other audio

Knobs and Controls

Required features

- Rotating knob or touchpad
- Back
- Select

Optional features

- Multi-axis rotating knob controller
- Character gesture recognition
- Play, pause, previous/next track, home, delete
- Telephony keys

Multiple User Inputs

All combinations are supported

CarPlay automatically adjusts its user interface to match user inputs

Touchscreen examples

- Touchscreen only
- Touchscreen and rotating knob
- Touchscreen, rotating knob and touchpad

Media Sources

Media Sources

Media Sources

🔊 iPhone Audio Playing

Media Sources

Silence

Media Sources

If iPhone is disconnected while iPhone audio is playing

User hears silence

Don't switch to alternative media sources without explicit user action

Support for Buttons

Siri Button

Should be on the car's steering wheel

Must work at any time, even if CarPlay is not visible on the car's display

Must work the same way as the home button on iPhone

If your native system does not have voice recognition, Siri is also launched with a short press

If your native system has voice recognition, Siri is launched with a long press

- Long press must be 600 ms or less

Media Buttons

Media buttons should control CarPlay media

- Play, Pause
- Next track, previous track
- Fast forward, rewind

Direct Shortcut Buttons

Shortcut buttons should launch the appropriate CarPlay screen, if present

- Phone
- Media
- Navigation

Supported Apps

Emily Schubert Engineering Manager, Car Experience

Supported Apps

Appear on the CarPlay home screen

Limited to specific categories

- Audio apps
- Automaker apps
- Messaging apps

Audio Apps

Appear in any car that supports CarPlay

Fixed user interface, similar to the built-in Music app

- Provide a hierarchical list to navigate and select audio content
- Provide media metadata for the Now Playing screen
- Handle remote control events

Require a CarPlay entitlement

<http://developer.apple.com/carplay>

Audio Apps

NEW

What's new in iOS 10

Tabs support

App name in Now Playing screen

Shuffle and Repeat playback options

Additional information in list and Now Playing screens

- Mark media as currently playing, streaming, explicit, or a live stream

Support for apps with no list screen

Automaker Apps

Appear only in compatible cars

Published by the automaker

Require a CarPlay entitlement

Automakers should contact Apple for more details

Automaker Apps

What's new in iOS 10

NEW

Appear only in compatible cars

Published by the automaker

Require a CarPlay entitlement

Automakers should contact Apple for more details

Support for Siri

Declare Compatibility

Choose appropriate protocol names

External Accessory protocol names determine which apps appear in which cars

Cars may declare multiple protocol names for different use cases

Include a protocol name to match all cars

- `com.brand`

Include protocol names to match cars with specific features

- `com.brand.feature`

Include protocol names to match specific car models

- `com.brand.model`

Declare Compatible Vehicles

In the car

Implement the following in iAP2 IdentificationInformation

- Declare at least one `SupportedExternalAccessoryProtocol`
- Declare support for `StartExternalProtocolSession` and `StopExternalProtocolSession`
- Set `ExternalAccessoryProtocolCarPlay` to true
- Implement on all supported transports (USB, Bluetooth and CarPlay)

If your automaker app communicates with the car to perform tasks

- Implement a communication protocol using External Accessory protocol

Declare Compatible Vehicles

In the app's Entitlements.plist

Match all cars

```
<key>com.apple.developer.carplay-protocols</key>  
<array>  
<string>com.brand</string>  
</array>
```

Match only a specific feature

```
<key>com.apple.developer.carplay-protocols</key>  
<array>  
<string>com.brand.feature</string>  
</array>
```

Messaging Apps

NEW

New in iOS 10

CarPlay enabled messaging apps appear on the CarPlay home screen

Interaction is driven by Siri

Require a CarPlay entitlement

Summary

CarPlay is a smarter, safer way to use your iPhone in the Car

Be future-ready

Follow the design guidelines for the best experience

Detailed specifications available through the MFi Program
