### The New Reality

### **Upstream to Products**

- Thousands of person years of community investment 1.
- Upstream Projects focus on solving common problems 2.
- Distributions become increasingly robust with usage З.
- Commercial Products focus on differentiation, proprietary value-add and long term support 4.

### Upstream First. Possibilities are endless ... if rules are followed

Check out: https://www.youtube.com/watch?v=Tyd0FO0tko8

#### Automotive Upstream Projects

#### **GENIVI Member Projects**

- Audio Manager  $\bullet$
- **Diagnostic Log n Trace** igodol
- Layer Mgmt
- Navigation

#### Tizen IVI

. . .

- **Crosswalk Webruntime**
- Message Broker
- Policy Mgr Mutphy
- . . . .

#### **Unique to Open Source**

More upstream code = Increasing reuse = More differentiation by OEMs and Tier1s

# TIZEN

ABOUT BLOGS

# The OS of Everything

Tizen is the open-source operating system for all device areas.

Mobile

Wearable

In-Vehicle Infotainment

LEARN MORE ABOUT TIZEN .

0

### **Tizen Platform Benefits**

#### Web performance comparable to native

- Web App with smooth and good response
- Web based 3D App with fast and fancy graphics

#### Powerful multi-tasking

- Support multi-tasking with multi-window
- Easy task management

#### **Flexible UX customization**

– Various home screen layout setting for user's taste

#### WebGL 3D (helloracer.com)

#### Multi-Window

Entertainment

#### Social

### Tizen in Automotive (Tizen IVI)

### Tizen-IVI is the reference platform for AGL and has attained G ENIVI 5.0 compliance

#### **Enabling Automotive Usages and Features**

Fast Boot	Multi User	Multi Display
BT Handsfree	Multiple Connectivity options	Web Apps w/HTML5
IVI Specific SDK	Mobile Device Connectivity	Multiple Toolkits
Policy Mgmt	Compliance (GENIVI, AGL)	STT/TTS
Vehicle APIs	Multiple Build Systems	Security with Smack

**Unified Developer Experience f** or Multiple profiles

# Key Tizen IVI Features

#### Build faster, more secure Tizen applications for a wider range of hardware devices

#### HTML5/Web/Crosswalk

- Use new hardware capabilities immediately
- Consistent run time between Tizen and Android
- Supported by leading cross-platform tools/frameworks

#### 64-bit Linux Kernel

- Expanded hardware compatibility and capability
- Address additional memory
- Support new services like Ultra HD Content

#### Security

 Create enterprise-ready apps and solutions for mobile, wearable and other smart devices

#### Wayland

• Simplified graphics system offering more flexibility and better performance

### Tizen 3.0 Common Source/build

### **Profiles**

### Devices

### Technology Innovation for the Auto Industry

### Intel® In-Vehicle Solutions & The Road Ahead

#### HARDWARE AND SOFTWARE FOR IN-VEHICLE INFOTAINMENT (IVI)

#### COCKPIT CONSOLIDATION

Intel<sup>®</sup> In-Vehicle **Solutions Compute Modules** (Plus board support package)

Intel<sup>®</sup> In-Vehicle Solutions **Software Foundation** (Comprehensive *middleware*)

**Essential Features** Multimedia **Basic** Connectivity Entertainment Package

Intel® In-Vehicle Solutions **Platform** (Application-ready IVI platform)

**Consolidation of** usages: Head unit, instrumentation cluster, ADAS, RSE

#### In-Vehicle Technology Evolution

#### **FUTURE ADVANCED DRIVING PRODUCTS**

#### Advanced driving technologies, autonomous driving
