<https://github.com/JnRouvignac/AutoRefactor>

Agenda

- Personal experience
- Refactoring demo
- AutoRefactor

Experience(s)

- One library
 - 120 000 LOC => 100 000 LOC
 - 30-40 bugs fixed
- OpenDJ backend
 - 36 000 LOC => 26 000 LOC
- maintainability ↗

Rename...	Alt+Shift+R

Introduce Parameter...	
Introduce Factory...	
Convert Local Variable to Field...	Alt+Shift+F
Encapsulate Field...	

Legacy Software

"Legacy code" often differs from its suggested alternative by actually working and scaling.

— Bjarne Stroustrup

Programming

Programming is the art of telling *human beings* what one wants the computer to do.

— Donald Knuth

Refactoring

If it stinks, change it.

— Grandma Beck,
discussing child-rearing
philosophy

Java design principles

- Reading code is more important than writing code
- Simplicity matters
- One language the same everywhere

— Brian Goetz

Agenda

- ~~Personal experience~~
- Refactoring demo
- AutoRefactor

Refactoring demo

Agenda

- ~~Personal experience~~
- ~~Refactoring demo~~
- AutoRefactor

Java 5?

```
Iterator it = myList.iterator();
```

```
while (it.hasNext()) {  
    String s = it.next();  
    ...  
}
```

```
for (String s : myList) {  
    ...  
}
```

Regex?

Search

```
(final\s+)?Iterator\s+(\w+)\s*=\s*(\w+)\s*.iter  
ator\s*(\s)*;((\s|.)* )while\s*(\s*\2\s*\s*. \s*h  
asNext\s*(\s)*\s*\{\s*(\w+)\s*(\w+)\s*=\s  
*\2\s*\s*. \s*next\s*(\s)*\s*;
```

Replace

```
\4for (\6 \7 : \3) {
```

AutoRefactor

- Eclipse plugin
 - Open source: EPL et GPLv3+
 - v1.1.0 soon
- <http://autorefactor.org>
 - <http://autorefactor.org/html/samples.html>
 - <https://github.com/JnRouvignac/AutoRefactor>

AutoRefactor

- Java code modernization
- Rewrite for readability
- Coding conventions
- Best practices
- Use Eclipse parameters

- One step beyond formatting

AutoRefactor:

Why?

- No existing tools
- No tools which worked well enough?
- Mass refactoring

SimplifyExpression

UseDiamondOperator

CollapseSelfStatement

DeadCodeElimination

ReduceVariableScope

What was in v1.0.0?

- Loop while there are refactoring opportunities
- Choose refactoring rules to run
- Parallel execution

- Maven + tycho
- Unit tests

What's in v1.1.0?

- Rules description inside the UI
- New refactoring rules:
 - multi-catch, diamond operator
 - common if condition in if/else statement
 - TestNG asserts
 - Collection + Map:
 - `addAll()`, `containsAll()`, `removeAll()`, `isEmpty()`
 - `if (set.contains(el)) { set.add(el) } => if (!set.add(el))`
 - remove semicolons, empty statements `‘;’`
 - remove empty lines
 - remove useless method overrides

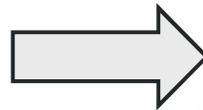

And after?

- Java 7, Java 8
 - TryWithResources
 - Rethrowing exceptions
 - InnerClassesToLambdas
 - LoopsToLambdas?
- Rewrite code for me please
- AutoRefactor only selected text
 - Eclipse quick fixes

And after?

Automated extract method

```
boolean found = false;
for (String s1 : strings1) {
    for (String s2 : strings2) {
        if (s1.equalsIgnoreCase(s2)) {
            found = true;
            break;
        }
    }
}
if (found) {
    break;
}
}
```

```
public boolean containsAnyIgnoreCase(
    Collection<String> strings1,
    Collection<String> strings2) {
    for (String s1 : strings1) {
        for (String s2 : strings2) {
            if (s1.equalsIgnoreCase(s2)) {
                return true;
            }
        }
    }
    return false;
}
```

Architecture

- Eclipse platform
- Eclipse JDT
 - org.eclipse.jdt.core.dom
 - ASTParser
 - ASTVisitor
 - ASTRewrite

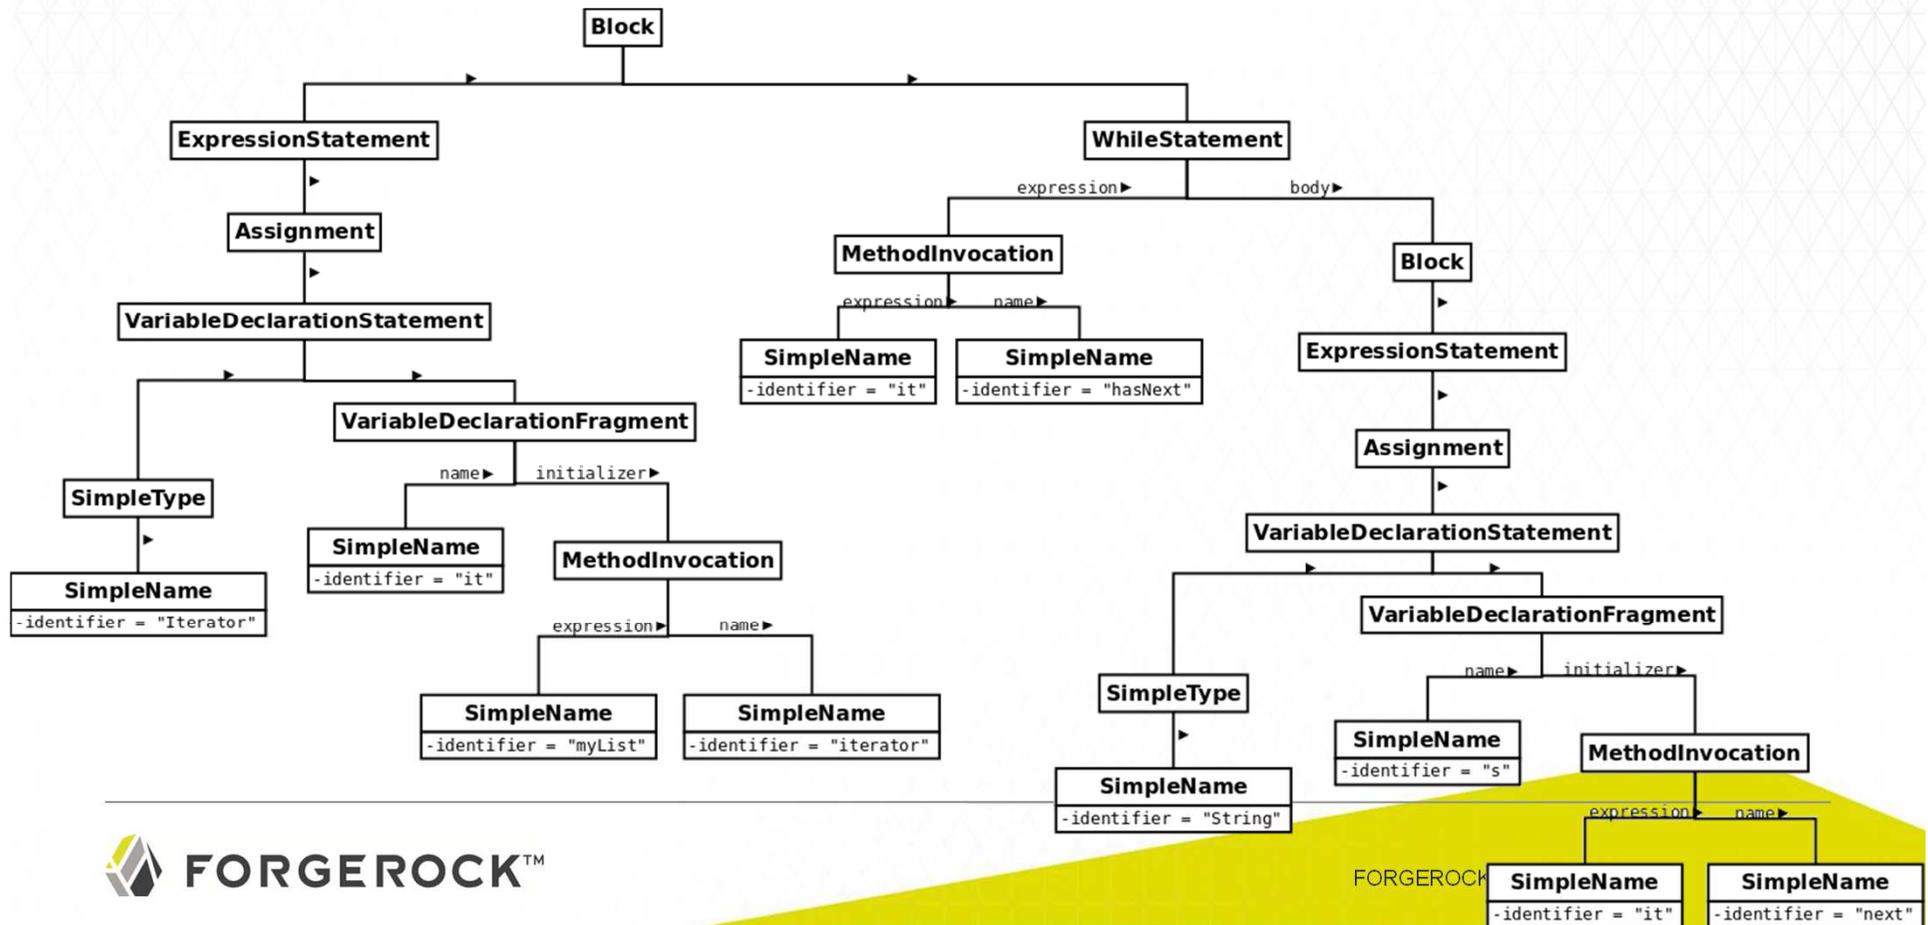

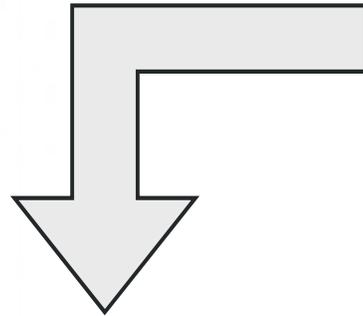

Architecture

```

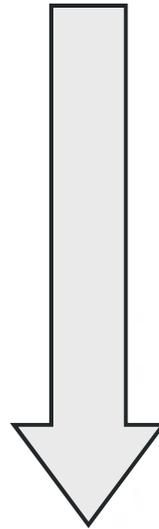

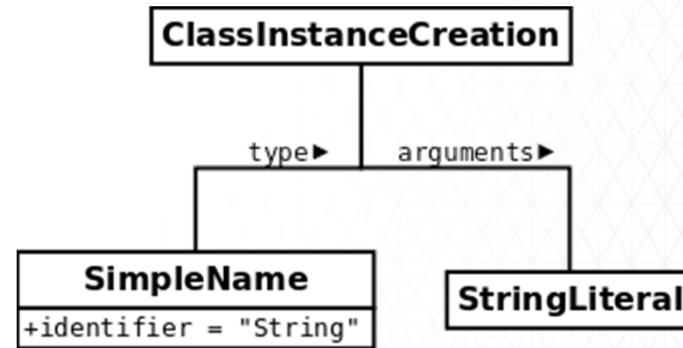

Iterator it = myList.iterator();
while (it.hasNext()) {
    String s = it.next();
    ...
}

```

Pattern matching

```
new String( "Info" )
```

```
"Info"
```

StringLiteral

Pattern matching

```
public boolean visit(ClassInstanceCreation cic) {  
    String string = "java.lang.String";  
    if (hasType(cic, string)  
        && cic.arguments().size() == 1  
        && hasType(cic.arguments().get(0), string)) {  
  
        ASTRewrite r = ...;  
  
        r.replace(cic,  
  
                ast.copySubtree(cic.arguments(0)));  
  
        return DO_NOT_VISIT_SUBTREE;  
    }  
    return VISIT_SUBTREE;  
}
```
