

Design Considerations for human factors

Designing for safety and health
of people
working
with
machines

For the first time since the 1970s
we are explaining our
interest in people should be
the foremost of
cognitive liberty...
of human factors
active
life
- People, machines, the world & environment

Challenge today

How might we reduce the number of deaths & injuries to pedestrians?

Challenge today

How might we reduce the number of deaths & injuries to pedestrians?

- 460+ people are treated in ERs every day for traffic-related injuries
- The rate of pedestrian death increases with age
- Males are more likely to die or be injured than females
- 33% of pedestrians killed in traffic crashes are legally drunk

**Develop a product to decrease
pedestrian injuries**

Brainwriting

Brainwriting

Goal:

Silent brainstorm ... followed by collaborative building on ideas

How to play:

1. Write 1 idea per index card; then pass to the right
2. Add an idea inspired by what's on the card
3. Keep passing cards to the right
4. End when all members have reviewed each card

Improve Eng / UX interaction & workflow

- make the conversation go both ways (for ideas) & explain why we're doing things
- work more closely together during design phase.
- build better tools for interactive modes

- Longer design phases are finished

- Involve eng
- UX office hour
- clear priority
- onsite support

UX defines common / rio cliffs / gis

Quicker / more efficient way to go from mocks + visual updates to working code.

- Build chrome plugin that allows ux to tweak css and create a cl from it

- Mock manager may support?
- chrome plugin to do...

More finalized and researched design cycles.

- with real data +1
- longer design cycles so we can build in research findings with time to iterate
- CLEAR GOALS

///

**Develop a product to decrease
pedestrian injuries**

More games for big picture thinking

Design the box (p. 161)

teams imagine the package for an idea in order to make decisions about important features & other aspects of their vision that are difficult to articulate

Storyboard (p. 71)

players use a storyboard format to tell a story about an experience, how to solve a problem, etc

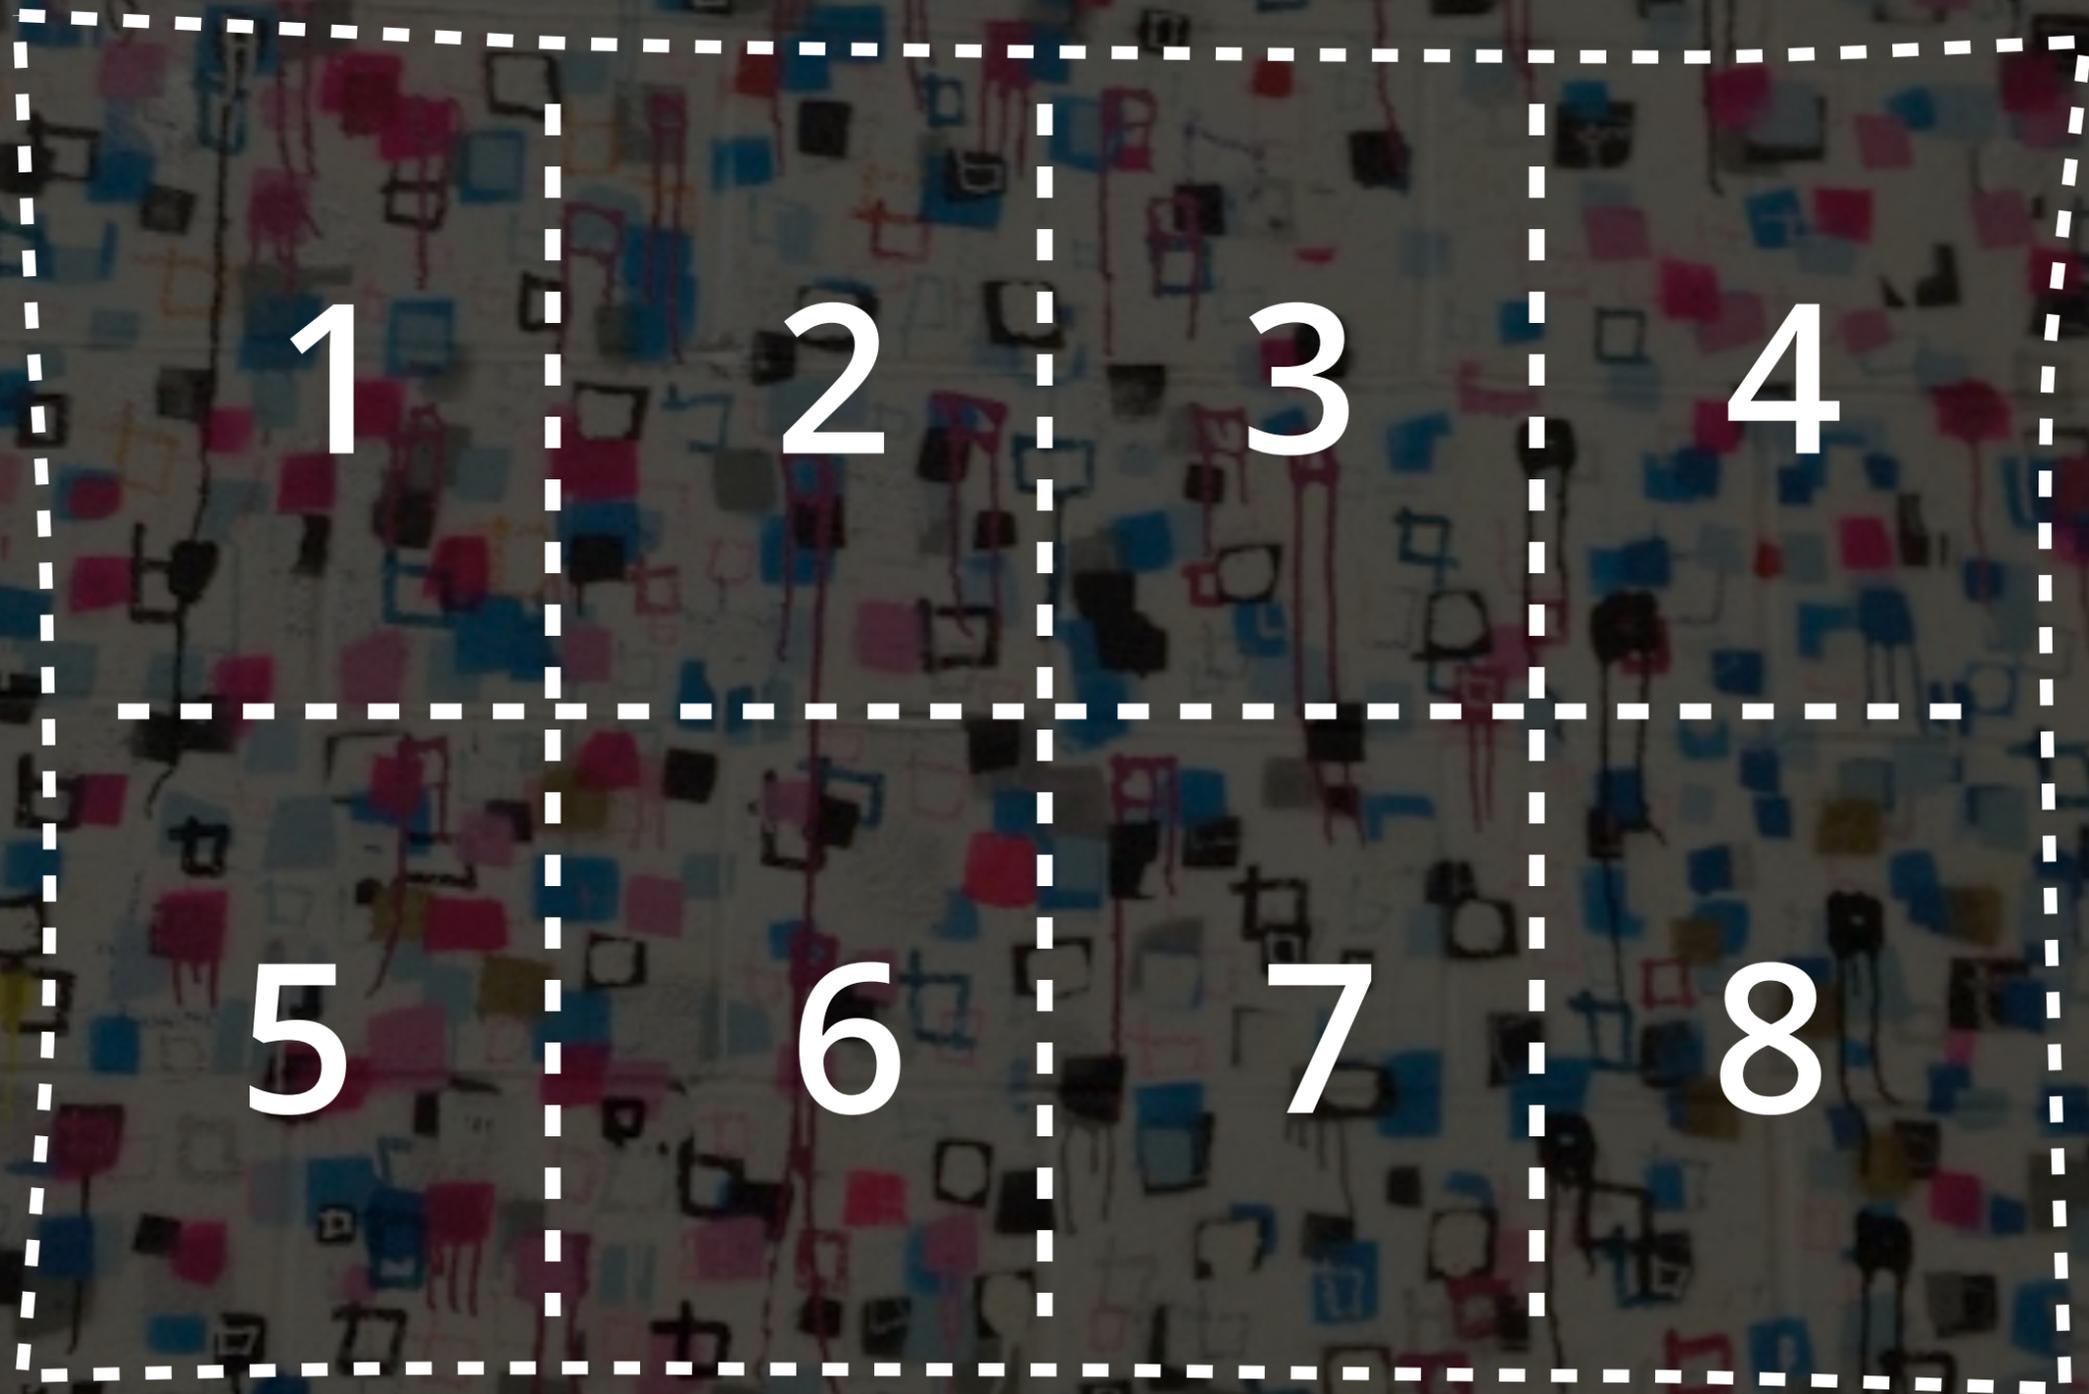

Bodystorming (p. 59)

using improv or “play acting” to feel out what might work in the real world

Elevator pitch (p.166)

uses madlibs to come up with a short, compelling description of the problem you’re trying to solve

6-8-5 Sketching

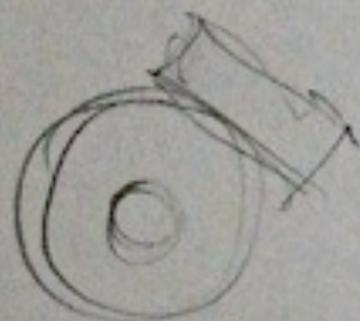

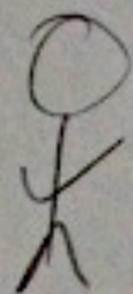

6-8-5 Sketching

Goal:

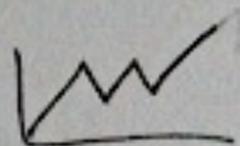

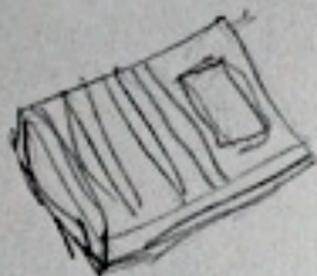

Generate 6 - 8 ideas in 5 minutes

How to play:

- (1) Create a grid of 8 boxes
- (2) Set timer for 5 minutes
- (3) Fill in one concept per box; goal is to create 6–8 sketches
- (4) After 5 minutes, share ideas with rest of the group

dark yellow pee — triggers dehydration

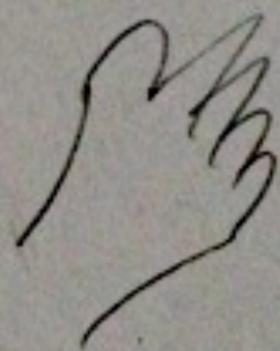

sleep habits, + us pee inspection + flu visits = knowing why you got sick

monitoring yourself because your kid is relying on you.

preventing sickness

sends notifications when disease is on the spread

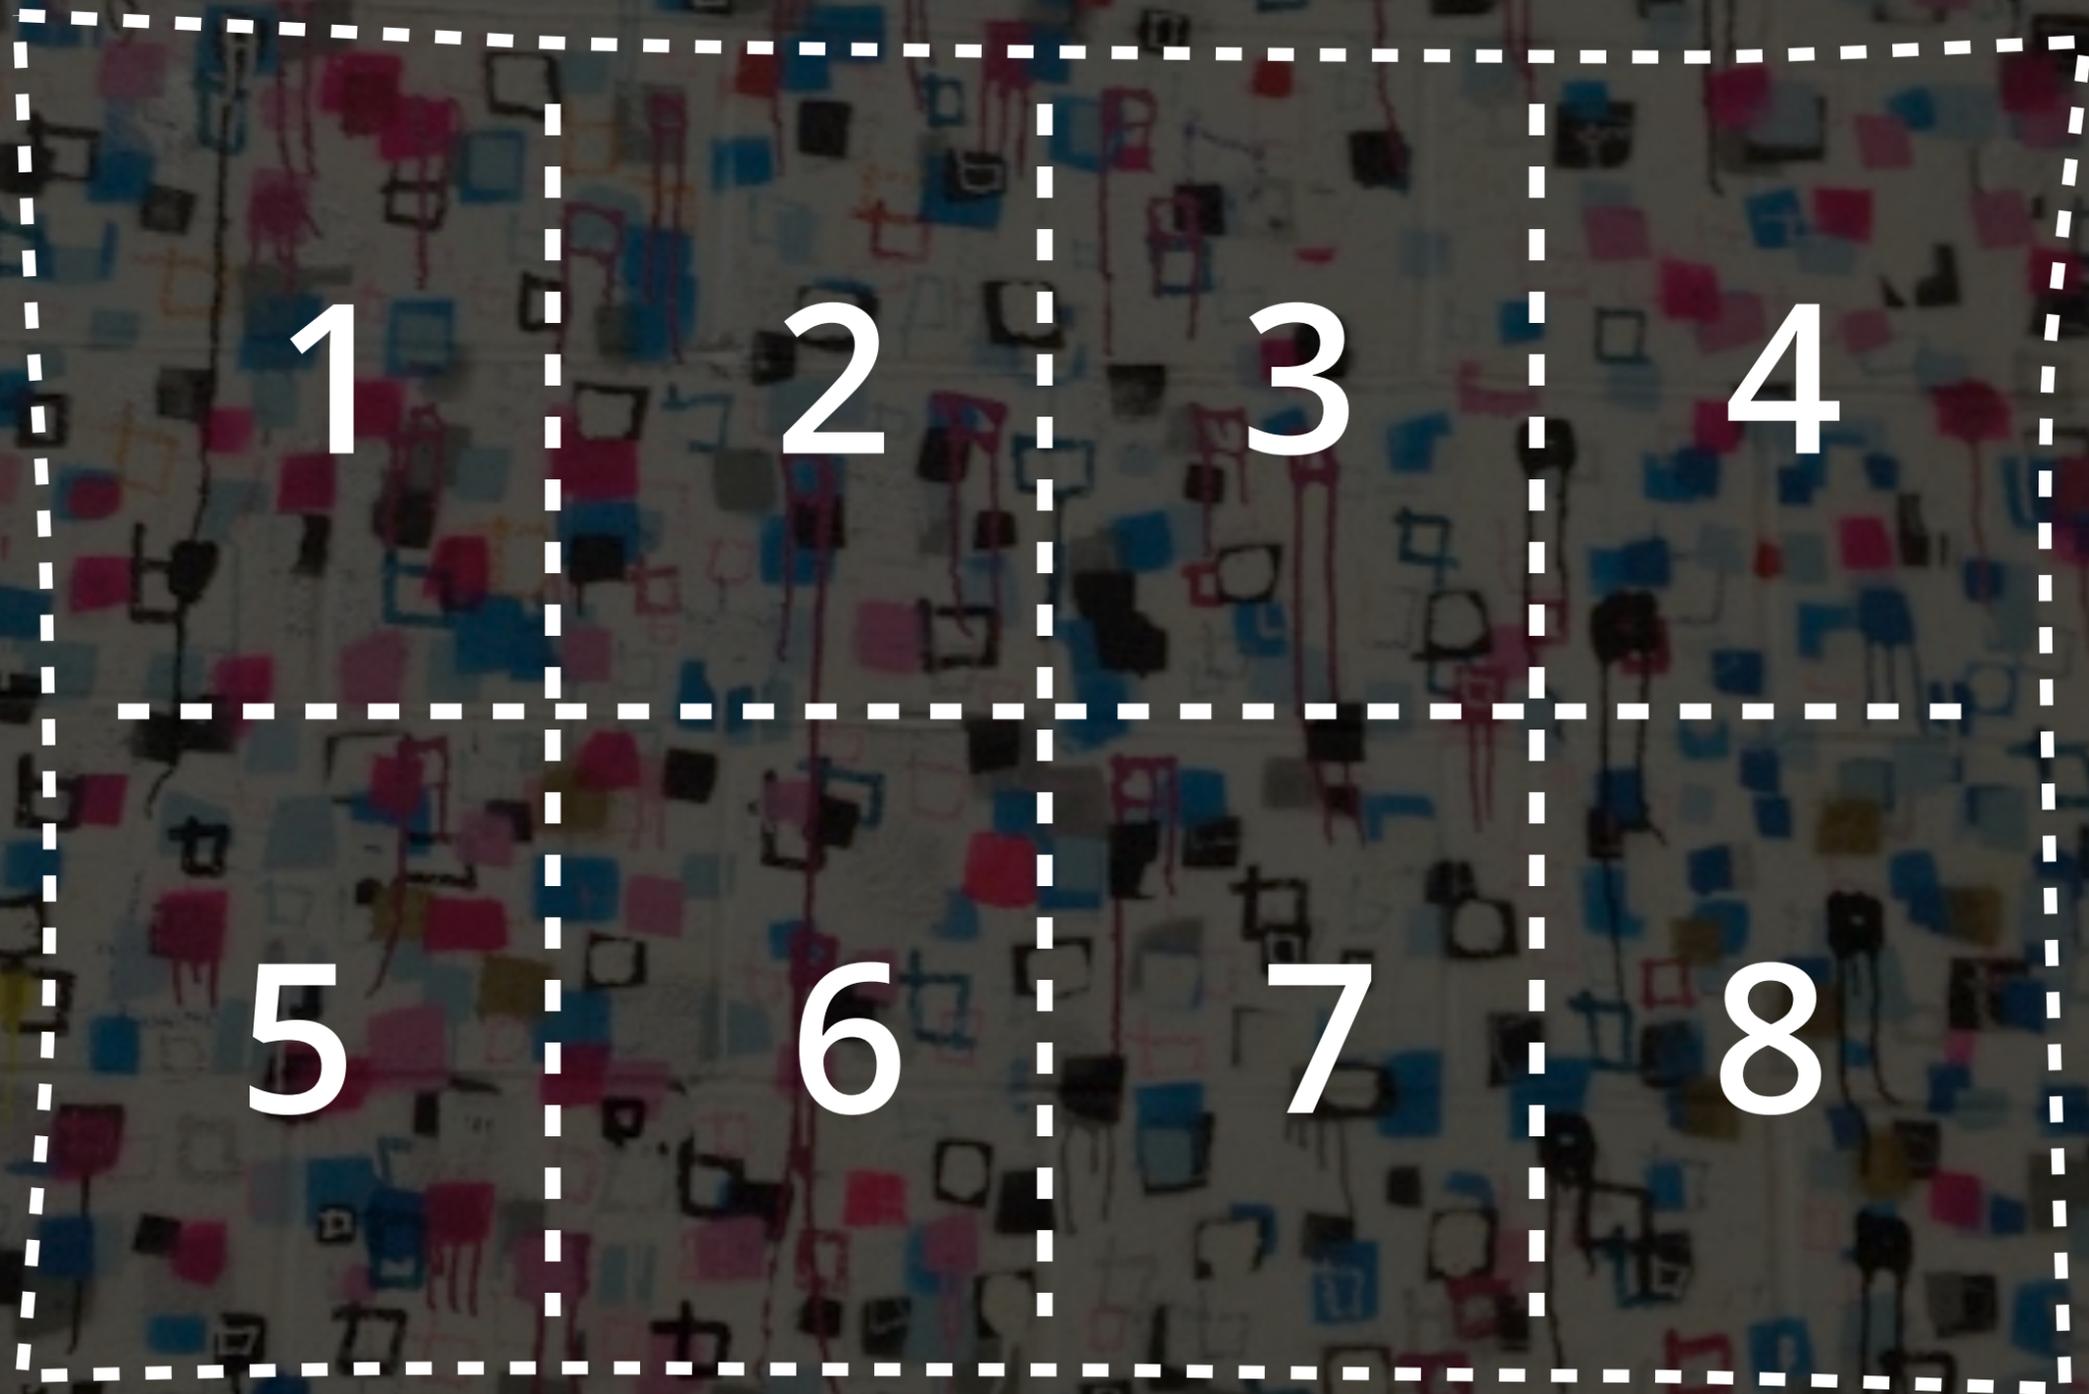

older person to tell their nurse or kid if they took

vitamins

A black and white photograph of a woman from behind, looking down a road. She has dark hair tied in a ponytail and is wearing glasses and a jacket. The road has white lane markings and leads into the distance. The background is slightly blurred, showing buildings and trees.

**Develop one of the ideas from
the last round**

6-8-5 Sketching

More games for ideation

3-12-3 (p. 78)

good for generating & developing lots of ideas in only 1 hour

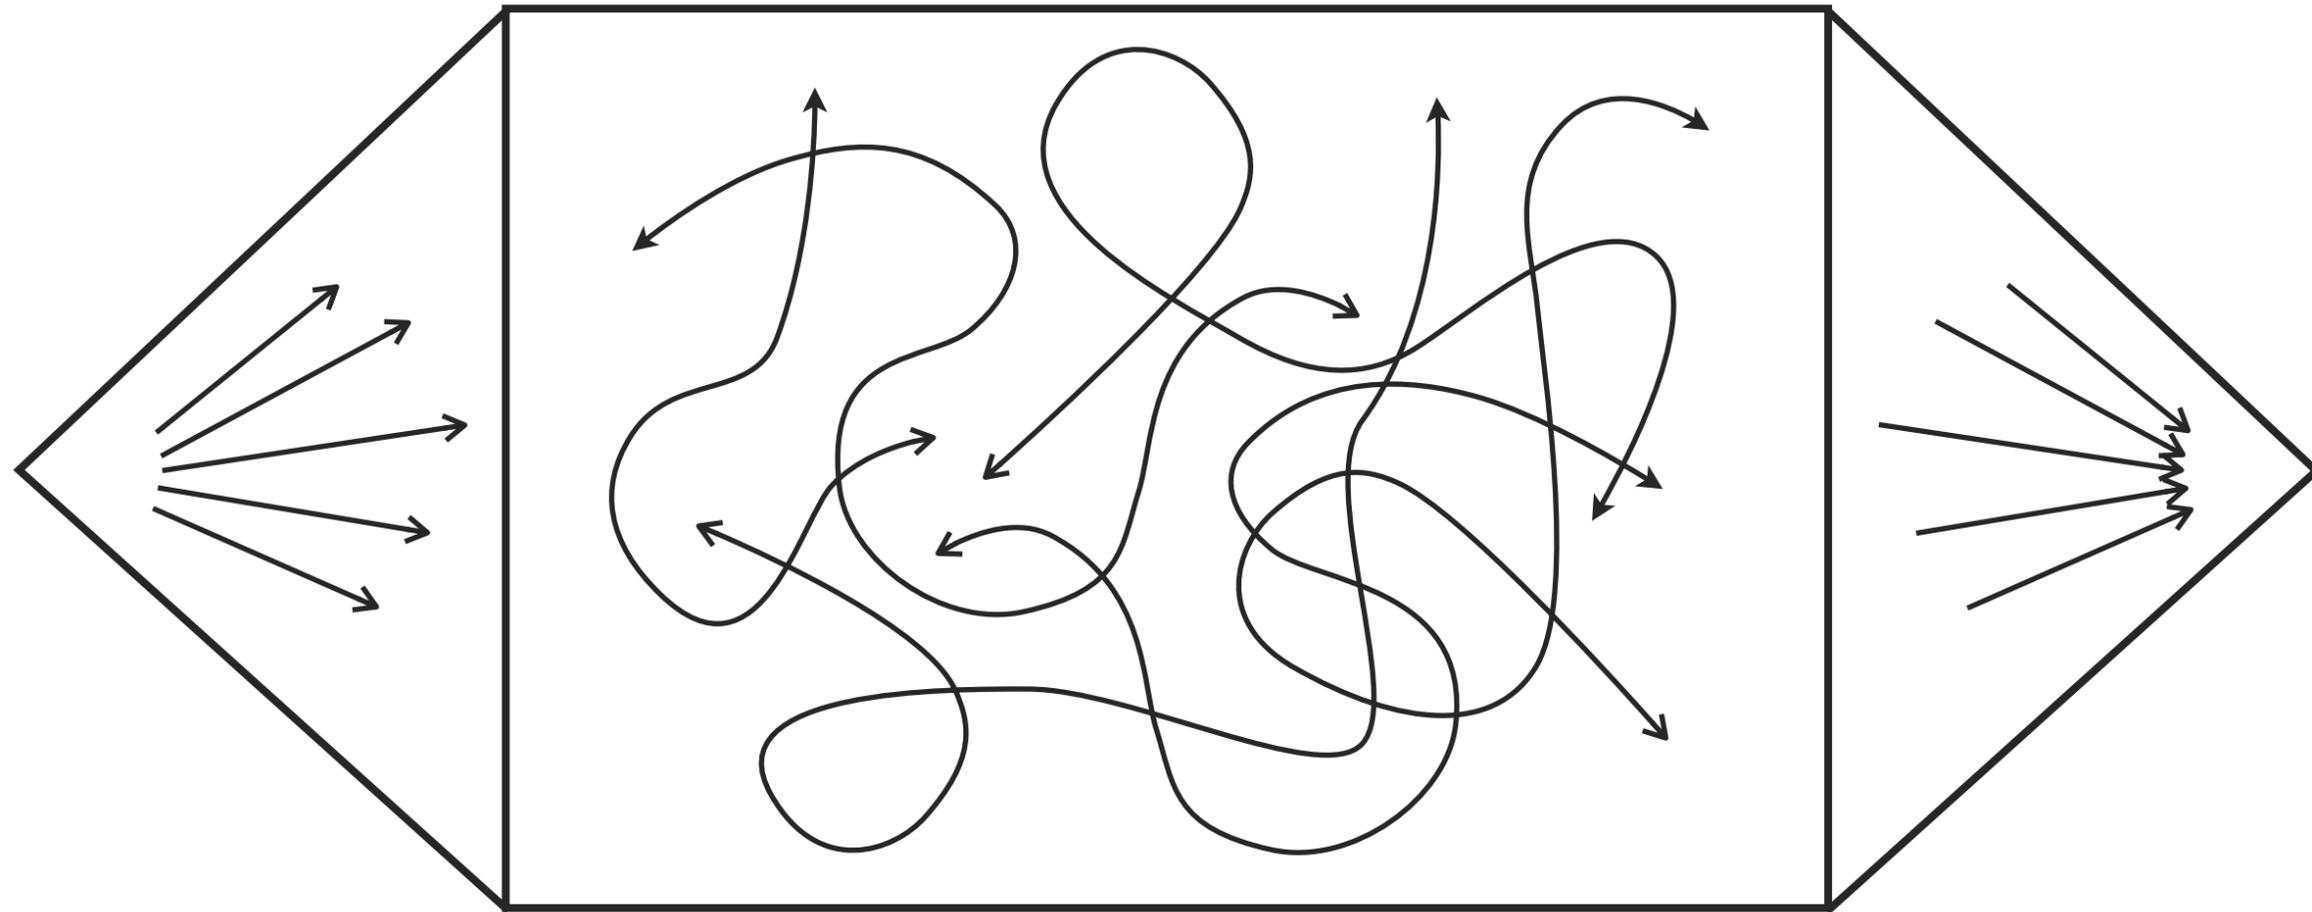

Post-ups (p.19, 69)

to generate a lot of ideas; one idea per post-it

Party Invitations

improve the onboarding process of a product or service (gogamestorm.com/?p=297)

More games for decision making

\$100 Test (p.232)

uses the concept of cash to help prioritize a list

Challenge Cards (p. 158)

used to identify and think through potential challenges and pitfalls of a product

Plus/Delta (p. 246)

generate constructive feedback by focusing on what what positive or repeatable about an activity, and what you would change about the activity

Impact & Effort Matrix (p. 241)

possible actions are mapped out on a 2x2 grid based on: effort required to implement & potential impact of an idea
