Java ME Offering in Series 40

The screenshot shows the Nokia Developer website. The top navigation bar is blue with the 'NOKIA Developer' logo on the left and 'Log in | Join | English' on the right. Below this is a secondary navigation bar with links: 'Design', 'Develop' (which is underlined), 'Distribute', 'Devices', 'Resources', and 'Community'. A search bar is located on the right side of this bar. The main content area has a large 'Java' heading. Below the heading is a horizontal menu with tabs: 'Overview' (active), 'Getting started', 'Tools', 'Documentation', 'Learning', 'Code examples', 'Videos', and 'Community'. The 'Overview' tab is selected, showing two paragraphs of text. The first paragraph discusses the reach of Nokia's Java-enabled phones. The second paragraph discusses the diversity of market segments addressed by Java technology. On the right side of the page, there is a section titled 'Nokia SDK 2.0 for Java' with a description and two buttons: 'Download offline installer' and 'Download online installer'. A red arrow points from the text 'Download the SDK' to the 'Download online installer' button.

Greater reach: Nokia has shipped over 1.5 billion Java technology enabled phones. As a result, many hundreds of millions of Java powered Nokia phones are a core part of everyday life for people in every corner of the globe. With Java you can create rich apps for this mass market, using advanced APIs for everything from life tools to 3D games.

Java technology enables you to address a huge diversity of market segments, including those in emerging markets. The Java runtimes on Nokia phones deliver a wide range of Java APIs to the Series 40 and Symbian platforms. This technology lets you build sophisticated applications for multiple phone models with confidence.

Nokia SDK 2.0 for Java

Target your Java apps at Series 40 phones with the full-touch UI and take advantage of the Nokia IDE for Java to deliver your apps faster.

Java ME Compliant with Complimentary Nokia API Offering

MSA Subset		Nokia API
JSR 226 (Vector Graphics)	JSR 118 (MIDP 2.1)	Nokia UI API 1.6
JSR 205 (Messaging)	JSR 139 (CLDC 1.1)	Nokia Gesture API
JSR 184 (3D Graphics)	JSR 256 (Mobile Sensor API)	Nokia Frame Animator API
JSR 135 (Mobile Media)	JSR 234 (Multimedia Supplements)	In-App Purchase API
JSR 82 (Bluetooth)	JSR 211 (Content Handler)	
JSR 75 (File and PIM)	JSR 179 (Location) + Extension for Cell ID Based Positioning	
JSR 177 (Security and Trust)	JSR 172 (Web Services)	

Nokia SDK 2.0 for Java - What's New?

Full Touch UI

- Screen
 - 240 x 400 px
 - 3:5 aspect ratio
- New
 - Action buttons
 - Category bar
 - Back button
- Nokia UI API – Providing access to the Native UI components

Multipoint Touch

- Multipoint Touch
 - Tracks multiple touch points
 - But: use Gesture API if only interested in pinch
 - Each associated with unique ID, x, y and state
 - Call-back for touch changes, but status available any time
 - Use in: Canvas-/CustomItem-based classes

Sensors

- JSR 256 Sensor API with Sensor Simulation Supported
- Currently supported
 - Acceleration: $-2g$.. $+2g$, x / y / z axis
 - Double Tap: 1 .. 63, phone sides
 - Orientation: 0 .. 6, phone orientation
 - Battery Charge: 0 .. 100, charge percentage
 - Network Field Intensity: 0 .. 100, signal strength
 - Charger State: 0 .. 1, charger connected
- Modes
 - Synchronous
 - Poll sensor
 - Example: accelerometer in game loop
 - Asynchronous
 - `DataListener` callbacks
 - Example: phone charger plugged in

What's New?

New API's

- Full Touch API
- Virtual Keyboard
- Multipoint Touch
- Gesture
- Sensor and Orientation

Productivity Tools

- Nokia IDE for Java ME (Eclipse)
- Nokia SDK 2.0 for Java
- Lightweight User Interface Toolkit (LWUIT)
- Maps API for Java ME

Documentation

- Series 40 Porting Library for Android Developers

Nokia IDE for Java ME

(NetBeans is supported as well)

Integrated SDK + Toolchain

JAD Editor

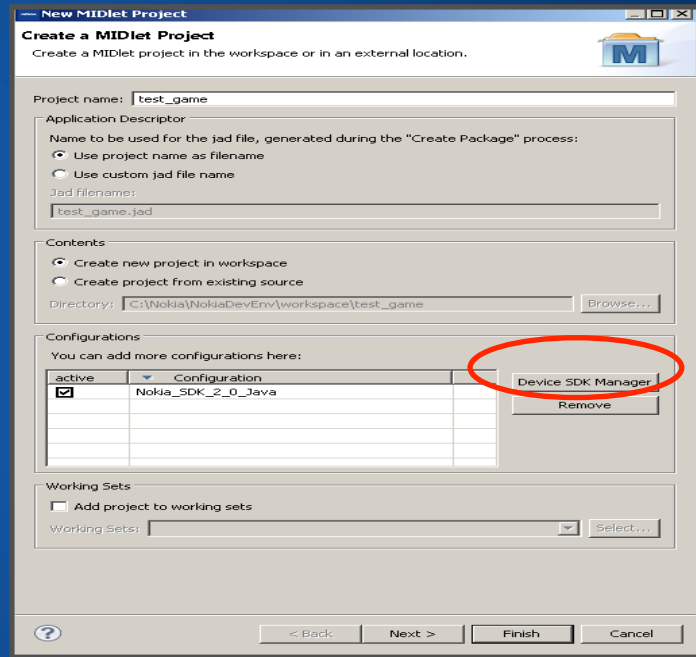

App Templates

Device SDK Manager

Device SDK Manager for Easy Tool Selection

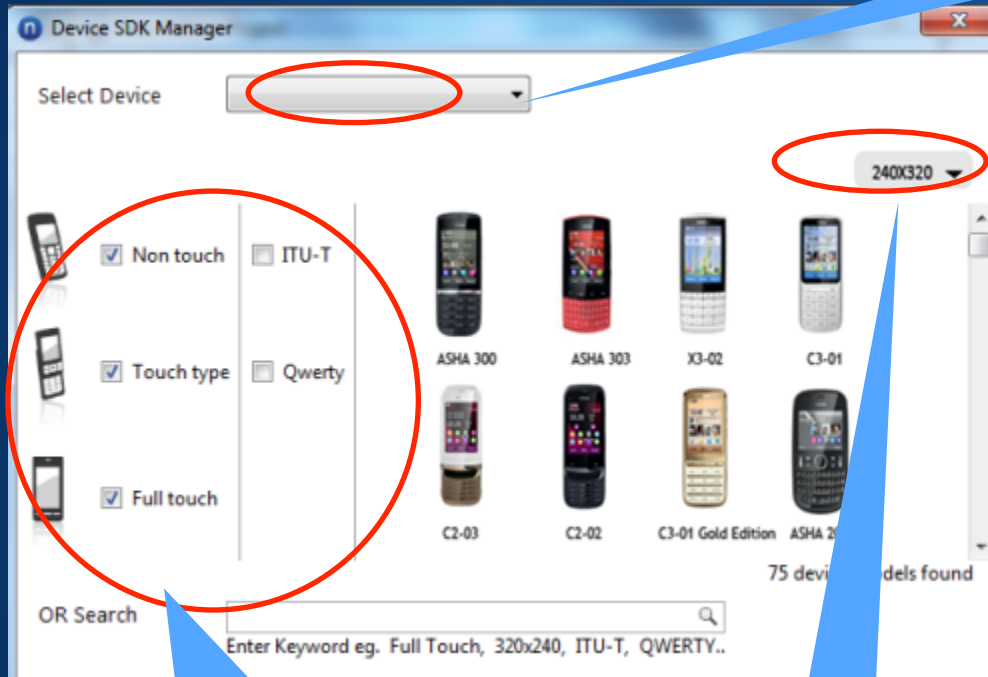

- Device SDK Manager enables easy selection & ONE-CLICK install of all relevant Nokia tools
- Developers can select tools quickly based on -
 - Phone Models
 - Form Factor
 - Layout
 - Display Size
- Phone models supported by particular tool set is displayed

Invoking Device SDK Manager

Nokia Specific Templates for In-App Purchase for easy coding

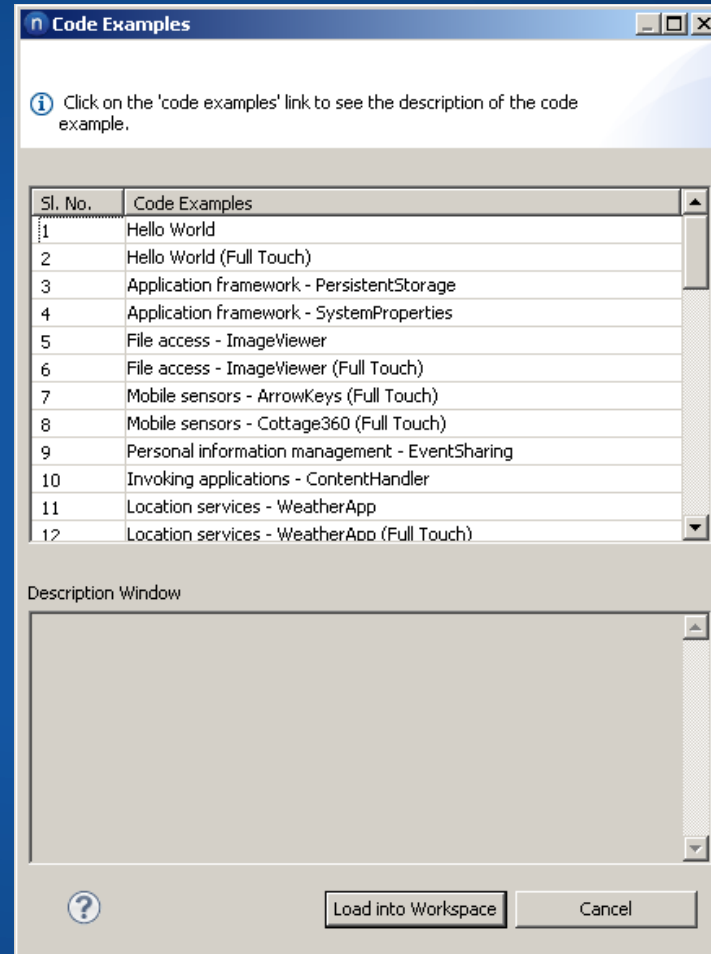

Easy coding using Nokia IDE for Java

- Automatic Discovery & Integration of all Nokia SDK's to the Nokia IDE for Java
- Auto-population of Nokia specific JAD attributes like Nokia_MIDlet_Close_GPRS_Context & many more

Code Examples

- Nokia IDE
 - Nokia Hub → Nokia Series 40 Code Examples
- Emulator
 - Help → MIDlet Samples

Nokia SDK 2.0 for Java brings

- ✓ Full Touch UI emulation
- ✓ Sensor Emulation
- ✓ Dynamic Location Emulation (Nokia Maps)
- ✓ Link to Nokia publish and Remote Device Access from SDK emulator
- ✓ Full integration with Netbeans
- ✓ On Device Debugging support

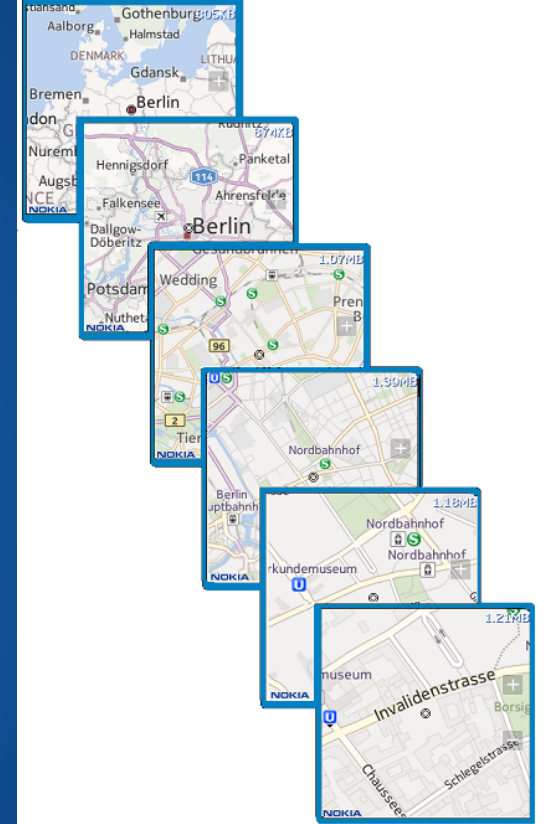

Nokia Maps API

Provides developers access to mobile-optimized Nokia Maps for Series 40

Features for Developers

- Multiple map types – conventional street map, satellite and terrain
- Touch support
- Customizable markers
- Polygons, polylines
- Overlay support
- Download indicator

http://www.developer.nokia.com/Develop/Maps/Maps_API_for_Java_ME/

Nokia Maps API – Services Available

http://www.developer.nokia.com/Develop/Maps/Maps_API_for_Java_ME/

Supports local search and places look-up by category

Geo-coding & Reverse Geo-coding

Routing between any start and end point, taking into consideration transport and traffic preferences.

Location Sharing into your app. Lets users send images or URL in SMS Message

Integrated KML to show the content on the map without having to recreate it manually

Pricing Models for Nokia Maps APIs

Using Maps API

1. Register as a developer free at www.developer.nokia.com
2. Obtain a free set of authentication credentials (**App Id** and **Token**) from:
 1. <https://api.developer.nokia.com/ovi-api/ui/registration>
 2. A unique **App ID** and **Token**, are required for each application
3. Create the app with Maps API. Add the Maps plug-in binary as a reference to the project.
4. Test & Publish app
5. In case the quota is exceeded, Nokia would contact you with further details!
6. Write in to locationapi@nokia.com if you would directly like to go for Premium Model

LWUIT

- Stylable UI Components
 - From Oracle: lwuit.java.net
- Optimized for Nokia
 - Native look & feel
 - Uses Nokia APIs for functionality
 - Better performance
- LWUIT Library for Series 40 Apps
 - Includes Series 40 themes, text editor & gestures for platform look and feel

What's New?

New API's

- Full Touch API
- Virtual Keyboard
- Multipoint Touch
- Gesture
- Sensor and Orientation

Productivity Tools

- Nokia IDE for Java ME (Eclipse)
- Nokia SDK 2.0 for Java
- Lightweight User Interface Toolkit (LWUIT)
- Maps API for Java ME

Documentation

- Series 40 Porting Library for Android Developers

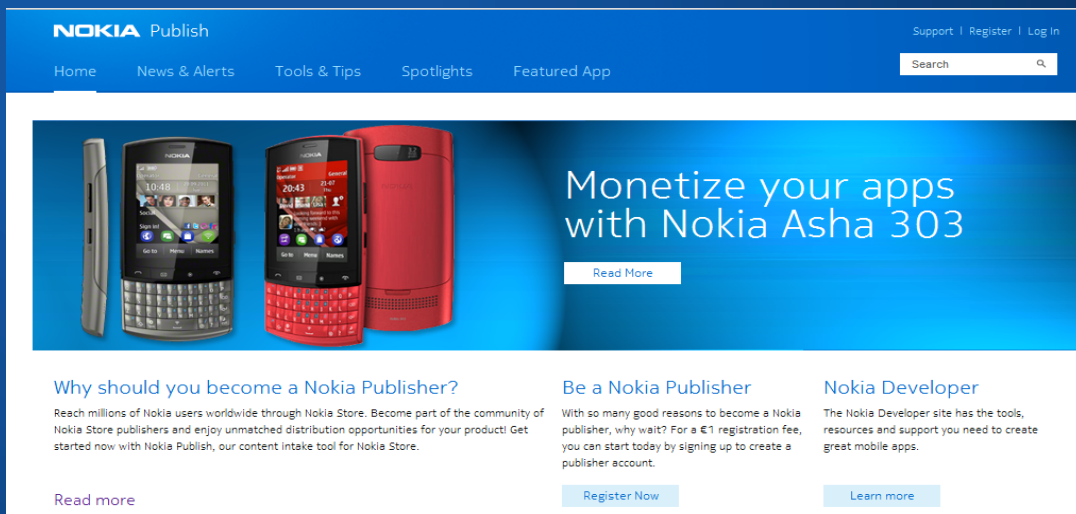

New opportunities for Android developers

- Short learning curve
 - Many Android developers have prior Java experience
 - Android and Series 40 have similar development tools
 - Possibility to reuse business logic
- **Series 40 Porting Guide** helps Android developers migrate their apps to Series 40

Publish & Market your App

- Nokia Publish – One time1 Euro registration fee to sign up
- Free 24 hour support / 7 days a week (developer.support@nokia.com)
- Standard 70/30% Revenue Sharing

The screenshot shows the Nokia Publish website. The header is blue with the 'NOKIA Publish' logo on the left and links for 'Support', 'Register', and 'Log In' on the right. Below the header is a navigation bar with links for 'Home', 'News & Alerts', 'Tools & Tips', 'Spotlights', and 'Featured App'. A search bar is located on the right side of the navigation bar. The main content area features a large banner with three Nokia Asha 303 smartphones (black, silver, and red) on the left and the text 'Monetize your apps with Nokia Asha 303' on the right. Below the banner is a 'Read More' button. The page is divided into three columns. The first column is titled 'Why should you become a Nokia Publisher?' and contains text about reaching millions of users and becoming part of the Nokia Store community. It has a 'Read more' link at the bottom. The second column is titled 'Be a Nokia Publisher' and contains text about the benefits of becoming a publisher, including a €1 registration fee and the ability to start today by signing up. It has a 'Register Now' button at the bottom. The third column is titled 'Nokia Developer' and contains text about the tools, resources, and support available on the Nokia Developer site. It has a 'Learn more' button at the bottom.
