ORACLE

GlassFish Community Feedback

Anton Arhipov, Product Lead
ZeroTurnaround

Presenting with

ZEROTURNAROUND

MAKE THE FUTURE JAVA

JavaOne

GlassFish at ZeroTurnaround

- Automated integration testing
  - Developer tooling – JRebel
  - Deployment automation - LiveRebel
  - Managed with Jenkins and custom scripts
  - Versions 2.0, 3.0, 3.1, 3.1.1, 3.1.1, x.x.x, … ∞ (customer driven)
- Overall experience
  - Powerful configuration management (asadmin)
  - Developer experience – (almost) no horror stories! ☺

What Worked

- Installation – just unzip it! ☺
  - Good for automated setup and CI
- All-in-one JEE
  - Less (?) scenarios to care about
- Virtual hosts
  - Somewhat different that with other containers

How GlassFish Can Be Better

- Some parts did not play well together
  - GLASSFISH-18946
- IDE integration
  - configuration mngmnt
- Configuration management
  - powerful but somewhat complicated
- Code quality
  - internal initialization logic & API
