JBoss SOA/Integration Products

Is Integration important?

Through 2016, companies will continue to spend more of their IT budget on application integration than on building new applications. -- Gartner 2012

SUMMIT

Red Hat Integration Technology Strategy

- Deliver enterprise-class SOA/Integration middleware to enable the Intelligent, Integrated Enterprise
- Work with the open source community and customers to create technologies that:
 - offer significant value-adds to business and IT
 - build upon strong core services and extend with ESB and advanced data, process, messaging, event processing and decision services
- Provide a highly flexible platform portfolio from the highest quality and most innovative components

SUMMIT

JBoss Enterprise SOA Platform 5

*A flexible, standards-based platform
to integrate applications, SOA services,
business events and automate business processes.*

- Open Choice Integration
 - Application/EAI
 - Service-oriented
 - Event-driven
 - Messaging
- Workflow
- Service Orchestration
- Intelligent routing
- Registry
- Rock solid enterprise-grade

JBoss Enterprise Data Services Platform 5

Real Time Data Services to Accelerate Superior Business Execution

Turns the data you have into the information you need

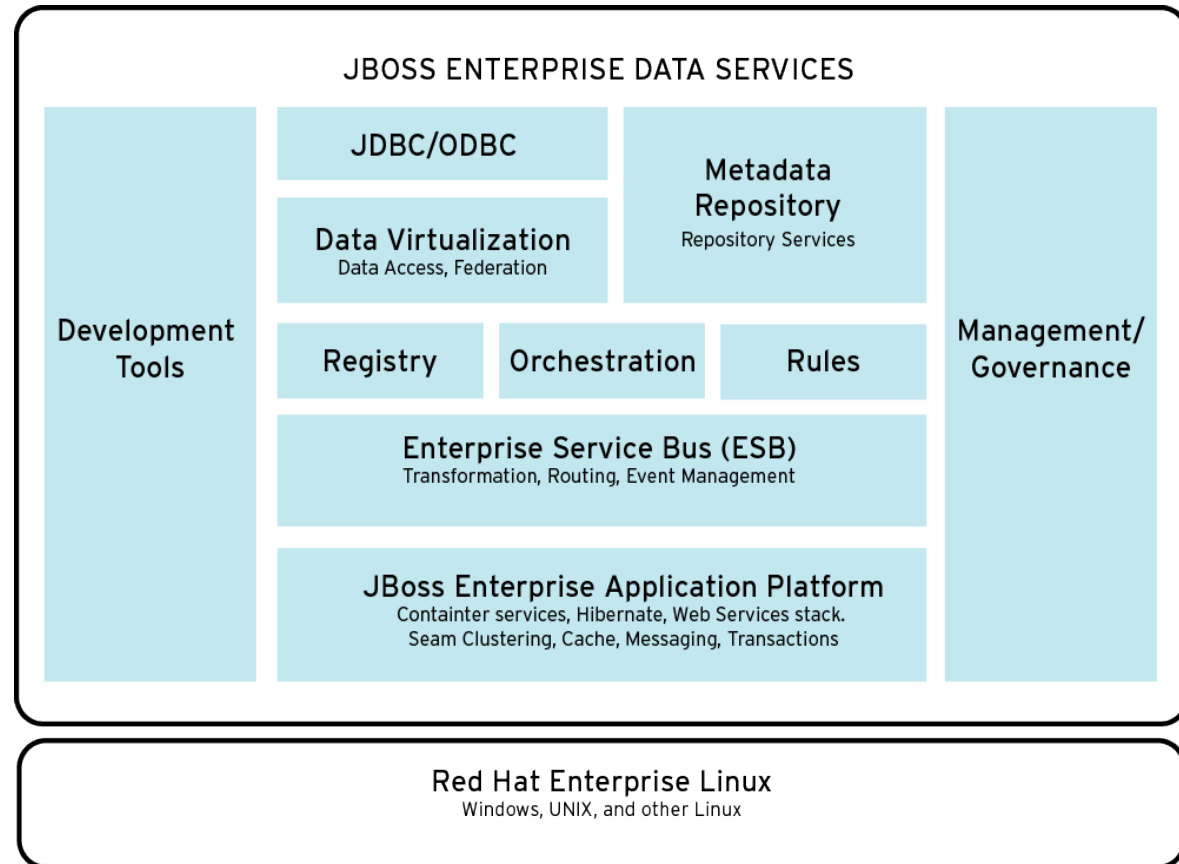

Augments and extends SOA Platform to address data access, integration and abstraction.

- Master Data Services
- Data Governance, Compliance
- Reporting/Analytics enablement

Real-time read/write access to heterogeneous data stores

Speeds application development by simplifying access to distributed data

Centralized access control, auditing

SUMMIT

PRESENTED BY RED HAT

JBoss Enterprise BRMS 5

A Single Distribution for Business Rules Management, Business Process Management and Complex Event Processing

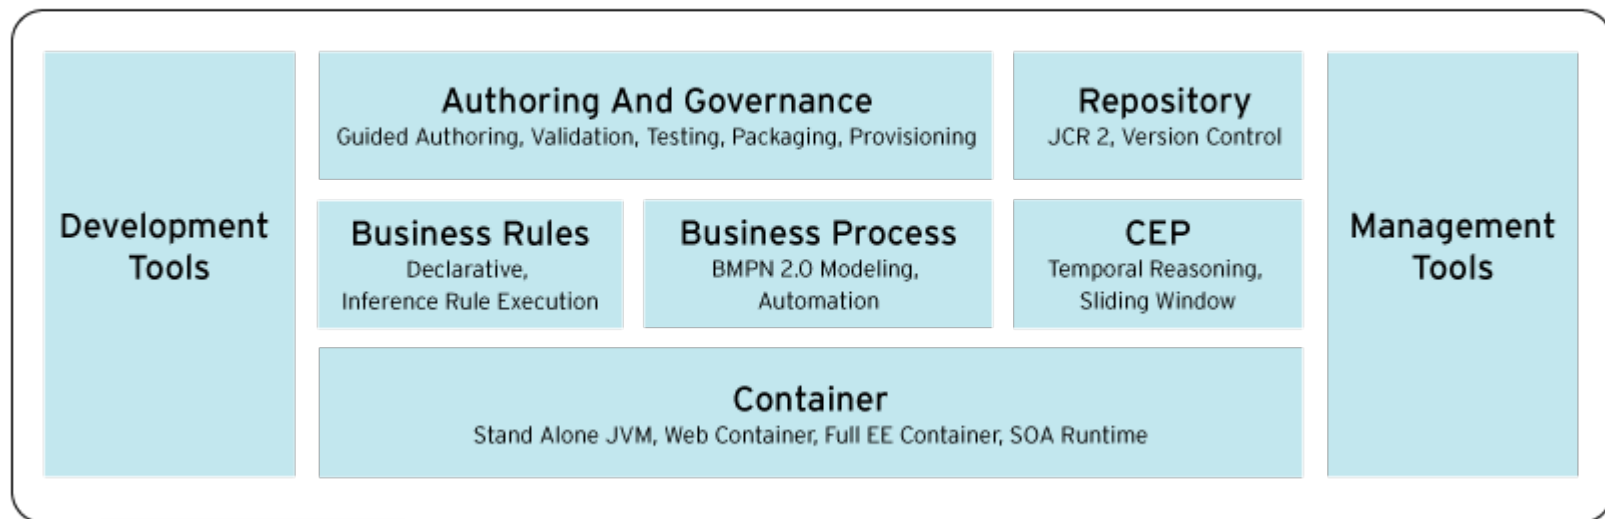

Features

- Highly flexible and customizable
- Tools for business users and developers
- Open, standards-based

Benefits

- Empowers the business to manage critical business logic
- Enables business agility

Trends and Directions

Changes underway

SUMMIT

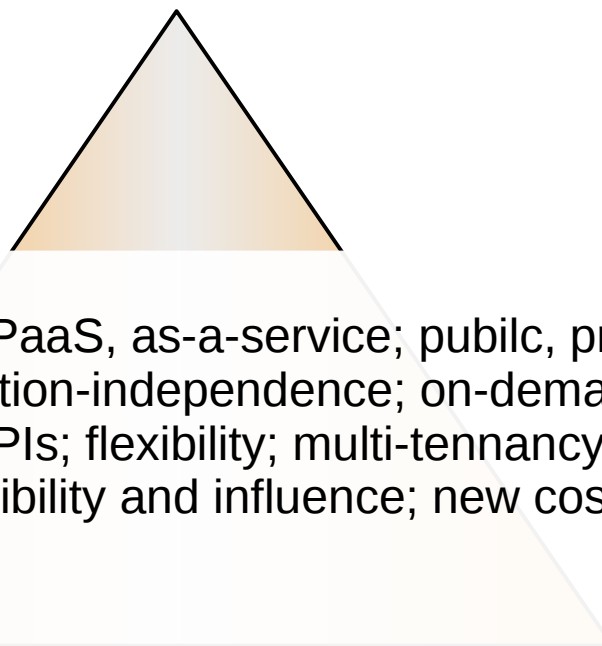

**JBoss
WORLD**

PRESENTED BY RED HAT

Changes underway

Cloud

Cloud drives/needs:

- Service Orientation
- Open APIs, REST-ness
- Varied deployment environments
- Lightweight, scalable

Information
Management

SUMMIT

JBoss
WORLD

PRESENTED BY RED HAT

Changes underway

Beyond integrated applications, internet-of-things (sensors, devices, kiosks, embedded systems, ...). Things expect to be connected. Service interfaces, public APIs; Generating and exposing information; Everything a producer and consumer of information.
Mobile; Social, internet-of-people.

Interconnected-ness drives/needs:

- Open/Public APIs, REST
- Varied interfaces for different participants
- Systems must handle many/varied data and events

Interconnected-ness

Information
Management

SUMMIT

**JBoss
WORLD**

PRESENTED BY RED HAT

Changes underway

Big Data, NoSQL, NewSQL, DataGrids;
Real-time decisions; analytics; Hadoop; MapReduce, Data Marts;
Increasing data volumes; structured/unstructured; storage; logs, click-traffic,
location data, status data;
Cloud-based and Interconnected systems producing and consuming more
and varied information.

Information Management drives/needs:

- Polyglot data management and integration
- Hybrid storage models
- Analytics
- Real-time information processing

Announcement: v5.3

SOA Platform, BRMS Platform, EDS Platform

JBoss SOA-EDSP-BRMS 5.3 Announcement Summary

- Intelligent, Integrated Enterprise
 - Winning business execution
- JBoss Enterprise SOA Platform 5.3 - July
 - Bridge to Camel – integration development productivity
- JBoss Enterprise Data Services Platform 5.3 - July
 - Apache Hive tech preview - big data integration
- JBoss Enterprise BRMS 5.3 with jBPM v5 - June
 - Unified process, rules, event processing

New! Business Process Runtime

The screenshot shows a web browser window at localhost:8080/jbpm-console. The main content area displays a 'Group Tasks' section with a table of tasks. The table has columns for Priority, Process, Task Name, Status, and Due Date. One task is listed with Priority 0, Process org.acme.insurance.pricing.po, Task Name ReviewQuote, and Status OPEN. Below the table is a 'Task details' section with fields for ID, Process, Name, Assignee, and Description.

Priority	Process	Task Name	Status	Due Date
0	org.acme.insurance.pricing.po	ReviewQuote	OPEN	

Task details

ID: 2

Process: org.acme.insurance.pricing.policyquoteprocess

JBoss Enterprise SOA Platform 5.3

- Open Choice Integration
 - Application/EAI
 - Service-oriented
 - Event-driven
 - Messaging
- Workflow
- Service Orchestration
- Intelligent routing
- Registry
- Rock solid enterprise-grade

New in version 5.3:

- ✓ **Apache Camel Gateway**
- ✓ **HornetQ JMS messaging certification**
- ✓ **Additional BRMS integration (BPMN2-based orchestration)**
- ✓ **ESB monitoring enhancements**
- ✓ **JBoss Developer Studio v5.0**
- ✓ **Component updates**

SUMMIT

JBoss
WORLD

PRESENTED BY RED HAT

Overview of Key Changes

Camel Gateway

- What is Camel? – Enterprise Integration Patterns (EIP) framework.
 - Lightweight, developer friendly, vibrant community
- Gateway based on Camel Core.
- Camel has large and growing set of components (analogous to adapters)
- With SOA 5.3 Camel extends the reach of the ESB in SOA Platform.

SUMMIT

**JBoss
WORLD**

PRESENTED BY RED HAT

Overview of Key Changes

ESB Monitoring Enhancements

- Service Interceptors
 - Hook into BAM or event processing. Invoked at: Service Instantiation, Start, End, Failure
 - Provide information about message content and service config.
- RecordRoute
 - Track history of message through a set of services
 - Configurable on a Service-basis or Message-basis
- Dynamic Service Listener thread config
 - Enables customized throttling at the service level

SUMMIT

JBoss
WORLD

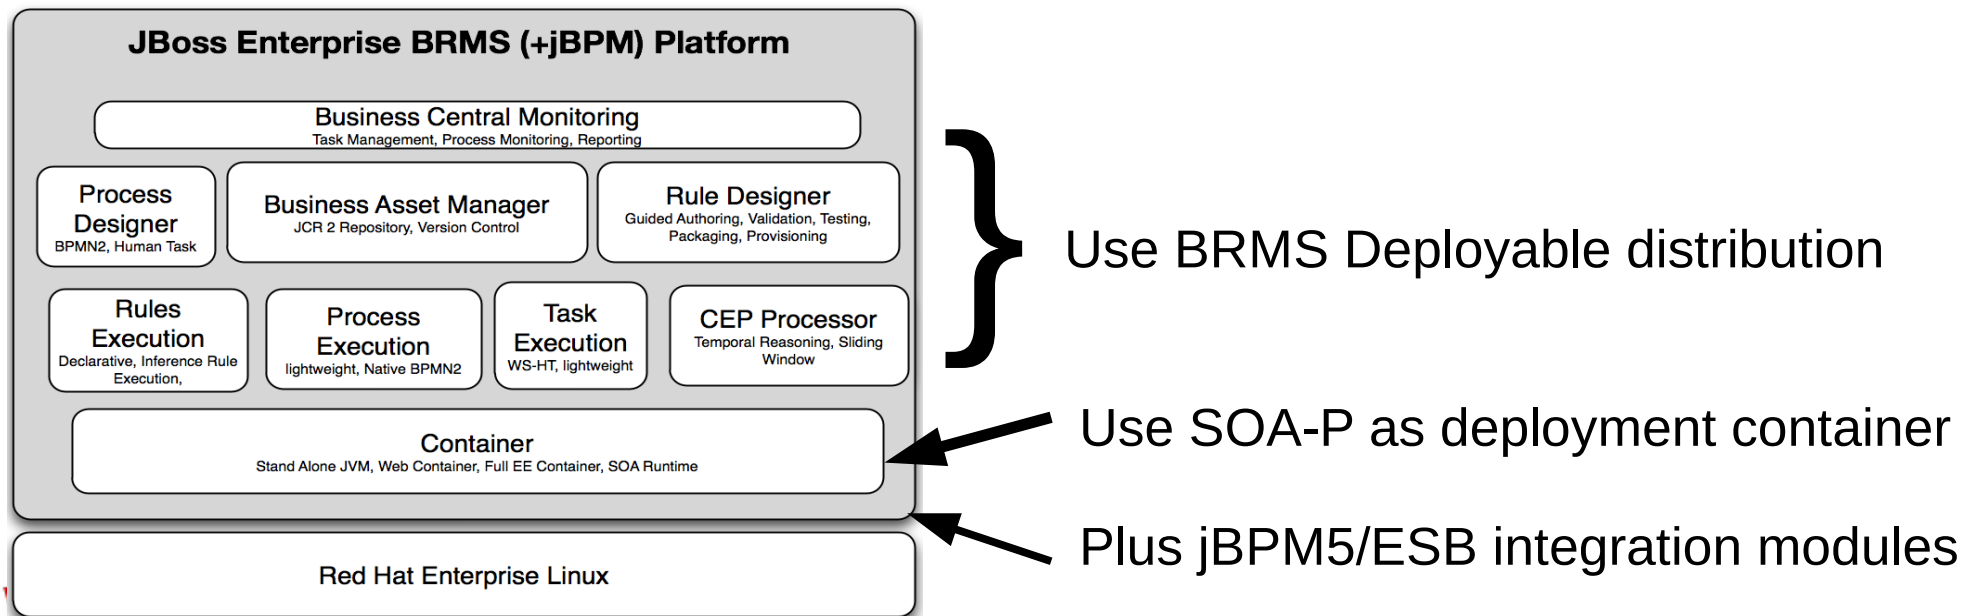

PRESENTED BY RED HAT

Overview of Key Changes

JBPM 5 integration with ESB

- JBPM 3 (legacy) remains the workflow engine in SOA 5.3
- JBPM 5 (new) is delivered with BRMS 5.3
- Integration supported when both products installed together

SUMMIT WORLD

PRESENTED BY RED HAT

JBoss Enterprise Data Services Platform 5.3

Turns the data you have into the information you need

Augments and extends SOA Platform to address data access, integration and abstraction.

- Master Data Services
- Data Governance, Compliance
- Reporting/Analytics enablement

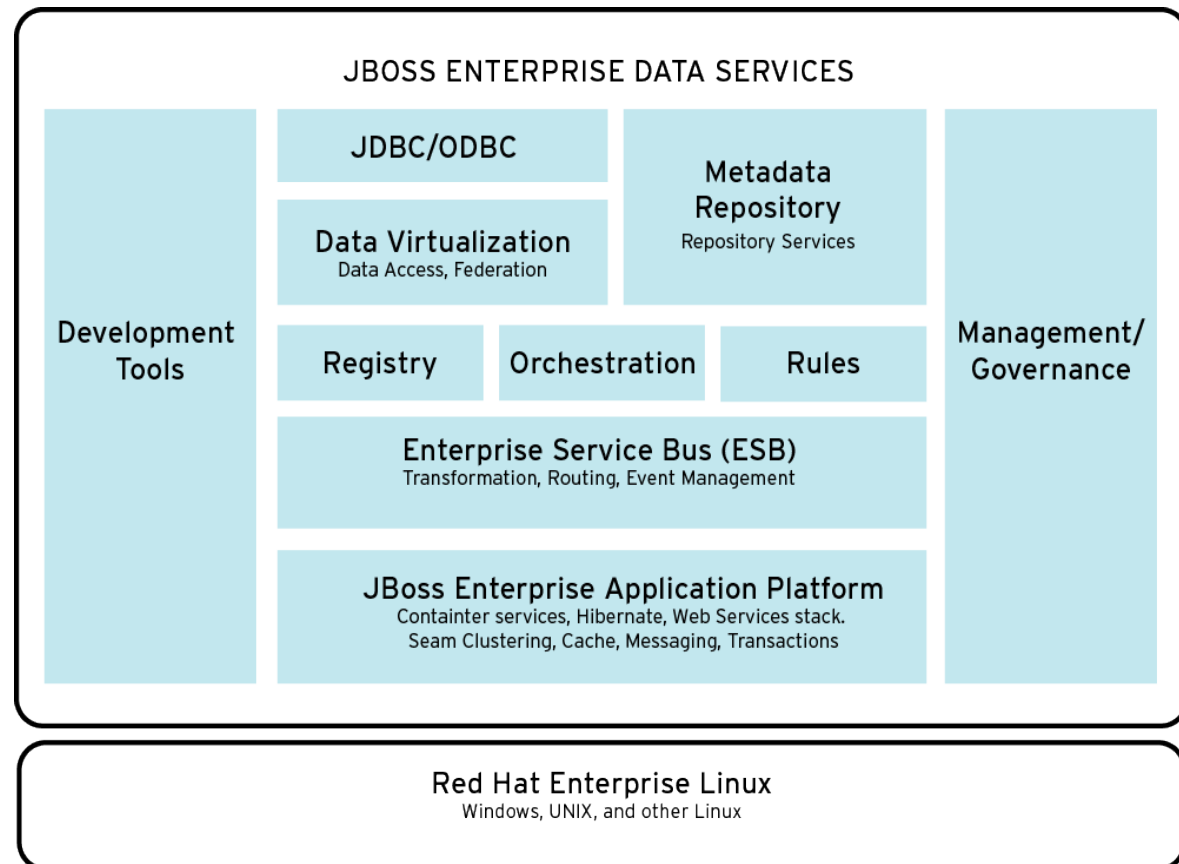

Real-time read/write access to heterogeneous data stores

Speeds application development by simplifying access to distributed data

Centralized access control, auditing

New in version 5.3:

- ✓ **Additional data sources: Greenplum, Apache Hive, PostgreSQL 9**
- ✓ **Source-specific enhancements: Salesforce.com; Fixed-width files**
- ✓ **Performance optimizations: off-heap buffering**
- ✓ **Tooling/usability upgrades: Guides, cheatsheets, XML and REST-based sources**
- ✓ **JBoss Developer Studio v5.0**

What's New In EDS – Apache Hive

- Hive is a “data warehouse” system for Hadoop that facilitates easy data summarization, ad-hoc queries, and the analysis of large datasets stored in Hadoop compatible file systems.
- Hive provides:
 - a mechanism to project relational structure onto this data and query the data using a SQL-like language called HiveQL
 - JDBC driver
 - not compliant: no DatabaseMetadata, limited DDL
- EDS provides:
 - Hive Translator (Tech Preview) – model Hive structure in EDS, query via SQL

What's New In EDS – Other Changes

- Server-side query timeouts
 - Both per VDB and server wide query-timeout
- Performance enhancements
 - MemoryBufferSpace controls buffer/cache memory
 - Option to allocate memoryBufferSpace OFF heap for large RAM scenarios.
- Salesforce.com data source
 - Aggregate support – GROUP BY, ORDER BY
 - Listing on SF.com AppExchange

Looking Ahead – SOA Platform

Support Lifecycles

Standard Product Life Cycle

A Standard Product Life Cycle of five years applies to most JBoss products. The Standard Product Life Cycle is also composed of two phases, Full Support and Maintenance Support. Extensions beyond the fifth year ("Extended Life Support") are available under a separate subscription, scope of coverage, and SLA.

Standard Product Life Cycle

Phase 1 Full Support (3 years)			Phase 2 Maintenance Support (2 years)		Phase 3 Extended Life Support (3 years)		
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8

JBoss Enterprise SOA Platform						
			Full Support		Maintenance Support	
Family	GA	Life Cycle	Start	End	Start	End
5.x	Feb 2010	Standard	Feb 2010	Feb 2013	Mar 2013	May 2015
4.3	Oct 2008	Standard	Oct 2008	Oct 2011	Nov 2011	Oct 2013

JBoss SOA Platform Roadmap

Post-SOA-P 5.3 (Target:Q3/CY12)

- Java 1.7 support
- Additional certifications

ESB/SOA 6.0 (Target : Q2/CY13)

- ESB Revision
- Add repository, expand governance
- Lightweight deployment/ EAP 6
- Additional tooling

SUMMIT

JBoss
WORLD

PRESENTED BY RED HAT

Changes v5 -> v6: Themes

Ease of use

- Simplified programming model
- Improved developer tooling
- More support for standards and de-facto standards

Services

- Focus on services and service contracts
- Service composition model

Governance

- Service contracts, declarative validation and transformation
- Explicit service dependencies
- Design-time repository

Interoperability

- Continued interop among JBoss integration products
- Broader connectivity

Lightweight

- Based on EAP 6 – rapid startup, highly-configurable footprint
- Suitable for distributed, cloud-based deployments

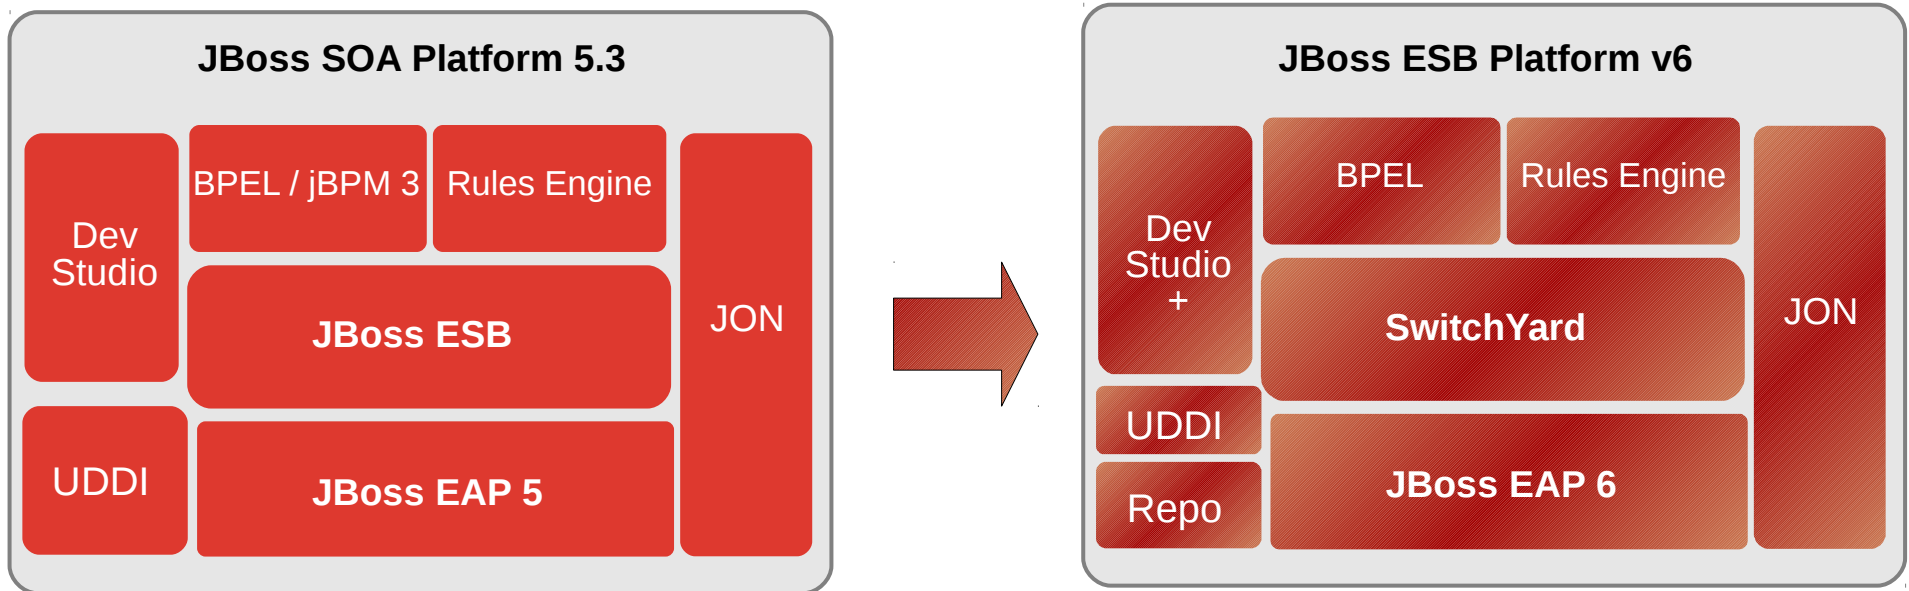

SUMMIT

JBoss
WORLD

PRESENTED BY RED HAT

SOA v5 -> ESB v6

- JBoss ESB -> SwitchYard
- EAP 5 base -> EAP 6 base
- JBPM 3 retired. JBPM 5 part of BRMS
- New/More Tooling

SUMMIT

JBoss
WORLD

PRESENTED BY RED HAT

Changes v5 -> v6: JBoss ESB -> SwitchYard

Transition? Yes. Complete reset? No.

- esb.xml vs. switchyard.xml – Change. SCA-oriented.
- Low-level APIs
- Greater use of Apache Camel
- Many improvements

Continuity

- Same community/engineering team
- Protocols/ transports, BPEL, Business Rules, jBPM 5 integration, Smooks, XSLT, HornetQ, CXF web services
- Interop between v5 and v6

SUMMIT

JBoss
WORLD

PRESENTED BY RED HAT

Participation in Standards Efforts

SpecSOA

<http://www.spec.org/soa>

Objective: develop a standard method for comparing performance of enterprise infrastructural components that provide Service Oriented Application (SOA) architectural concepts such as Enterprise Service Bus (ESB), and Business Process Choreography (BPC), and Web Services.

S-RAMP (OASIS SOA Repository Artifact Model and Protocol)

<http://s-ramp.org>

<http://github.com/governance>

Objective: define common data model and APIs to store and manage SOA artifacts throughout their lifecycle.

SUMMIT

JBoss
WORLD

PRESENTED BY RED HAT

Summary and Wrap-up

Key Takeaways

- Integration portfolio – integrated and expanding
- Lots new in v5.3
 - Intelligent, Integrated Enterprise
 - Features to tackle your integration challenges
- More on the way in v6
