Hands-on Training with Agile Workshops

Agile training workshops are extremely interactive, highly intensive and infused with real-world experience of using Agile in varying domains, roles and levels of strength. We enable executives, leaders, analysts, developers and testers to embrace Agile engineering and management best practices with workshops on every aspect of software delivery.

Agenda

- Introductions
- Pair Programming
- Refactoring
- Test-Driven Development
- Mocking
- BDD and functional testing
- Continuous Integration
- Continuous Delivery
- Retrospective

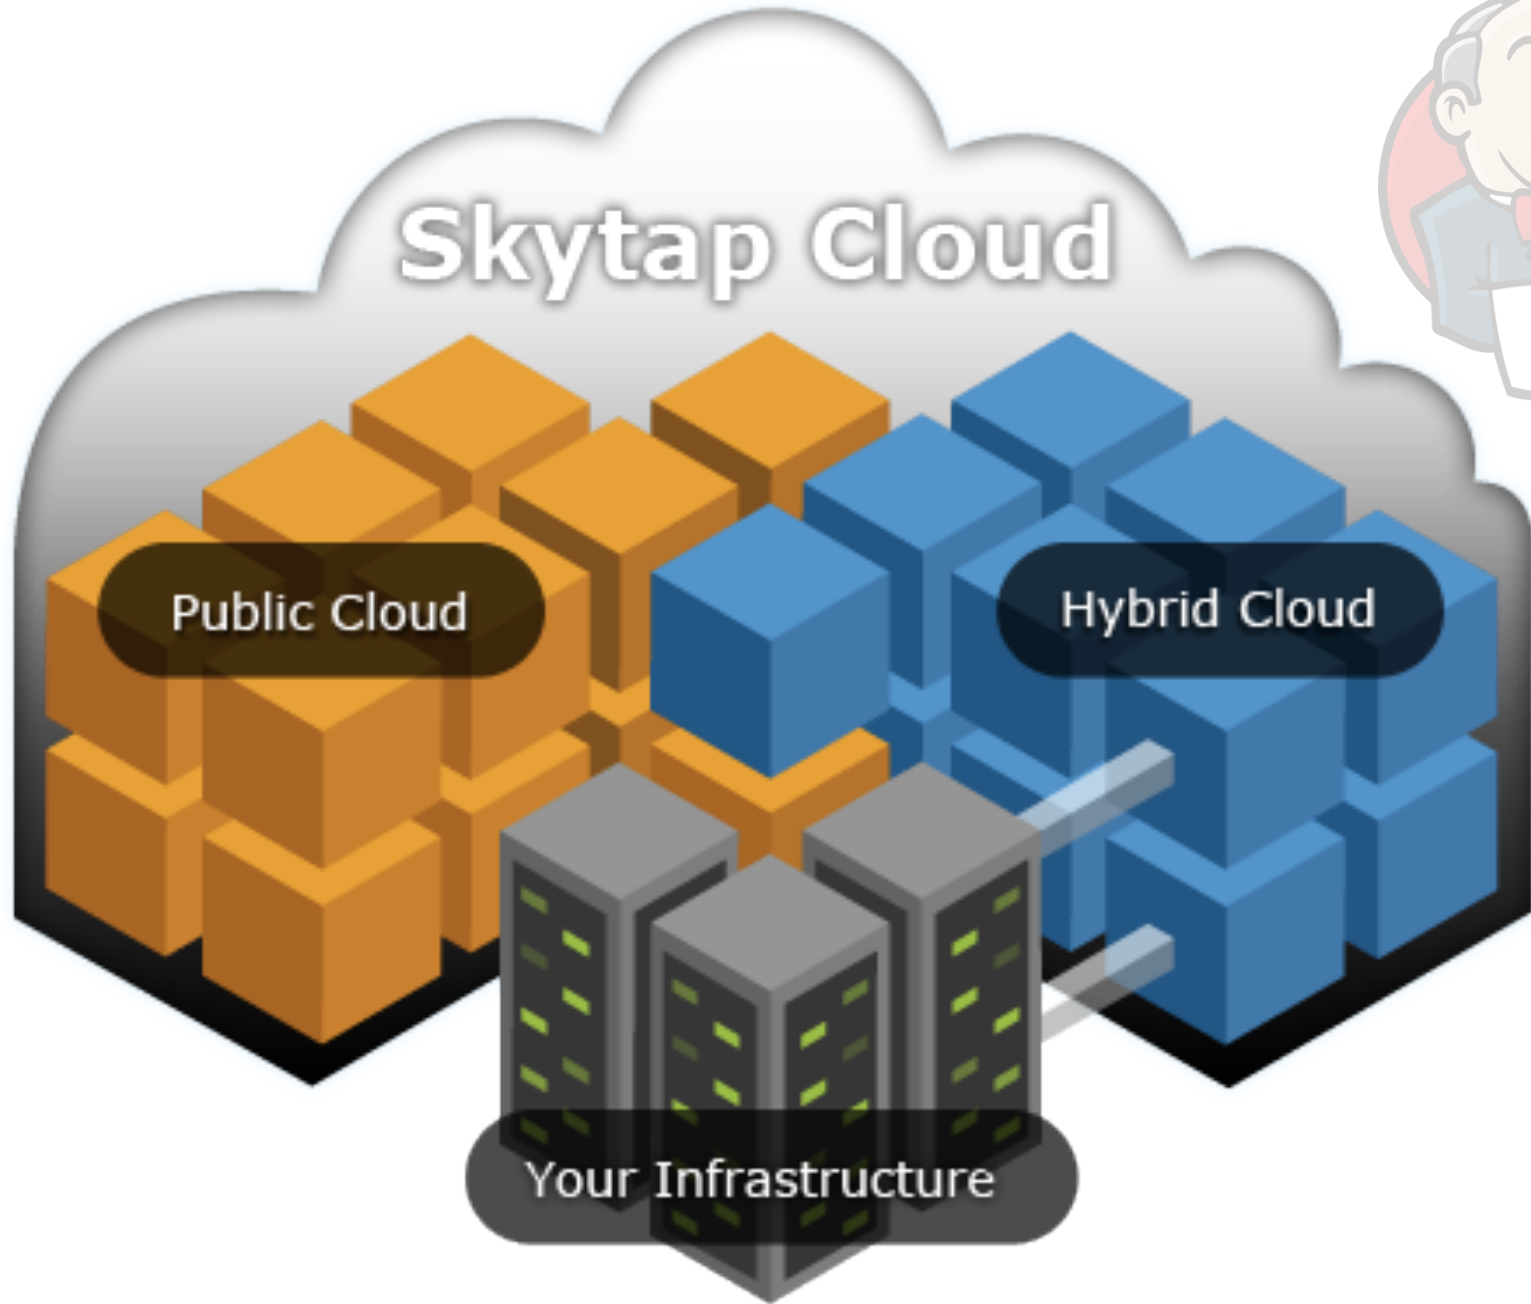

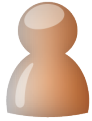

Why?

"The key is to automate absolutely everything and run the process so often that integration errors are found quickly!"

Martin Fowler

<http://martinfowler.com/articles/originalContinuousIntegration.html>
