Enable Local Discovery...

Secure Synchronization...

But the most important “thing” is...

How do we build it?

Always Bet on

JS

Your device as a server...

JXcore

We want Node to run on EVERY device...

Node.js on ChakraCore

This project enables Node.js to optionally use the ChakraCore JavaScript engine. This project is still **work in progress** and not an officially supported Node.js branch. Please refer to the original [PR](#).

How it works

To enable building and running Node.js with the ChakraCore JavaScript engine, a V8 API shim (ChakraShim) is created on top of the ChakraCore runtime hosting API ([JSRT](#)). ChakraShim implements the most essential V8 APIs so that the underlying JavaScript engine change is transparent to Node.js and other native addon modules written for V8.

A rebuild node.exe and native addon modules with ChakraCore is required for this to work.

Issues

Please report all issues related to Node-ChakraCore on this separate [issue page](#).

Prebuilt Node binaries

You can download and install prebuilt Node-ChakraCore from [here](#).

**PRIVACY
IS NOT
A CRIME**

“Technical identity systems must only reveal information identifying a user with the user’s consent.”

Kim Cameron’s Law # 1

“The solution that discloses the least amount of identifying information and best limits its use is the most stable long-term solution.”

Kim Cameron’s Law # 2

“Digital identity systems must be designed so the disclosure of identifying information is limited to parties having a necessary and justifiable place in a given identity relationship.”

Kim Cameron’s Law # 3

“A universal identity system must support both “omni-directional” identifiers for use by public entities and “unidirectional” identifiers for use by private entities, thus facilitating discovery while preventing unnecessary release of correlation handles.”

Kim Cameron’s Law # 4

“A universal identity system must channel and enable the inter-working of multiple identity technologies run by multiple identity providers.”

Kim Cameron's Law # 5

“The universal identity metasystem must define the human user to be a component of the distributed system integrated through unambiguous human-machine communication mechanisms offering protection against identity attacks.”

Kim Cameron’s Law # 6

“The unifying identity metasystem must guarantee its users a simple, consistent experience while enabling separation of contexts through multiple operators and technologies.”

Kim Cameron’s Law # 7

**Isn't this privacy stuff
a bit of nonsense?**
