### The Fundamentals

E-mail

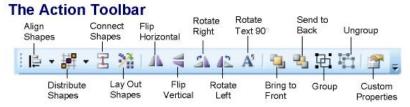

The Standard Toolbar

Open

Save

New

- ➤ To Create a New Diagram from a Template: Select File → New from the menu, select a template category, and select a template. Or, click the New button list arrow, select a category and select a template.
- ➤ To Create a New Diagram from Scratch: Click the New button, or press <Ctrl> + <N>.
- To Open a Diagram: Click the Open button on the Standard toolbar, or select File → Open from the menu, or press <Ctrl> + <O>.
- To Save a Diagram: Click the Save button on the Standard toolbar, or select File → Save from the menu, or press <Ctrl> + <S>.
- ➤ To Print a Diagram: Click the Print button on the Standard toolbar, or select File → Print from the menu, or press <Ctrl> + <P>.
- ➤ To View a Diagram in Full Screen Mode: Press <F5>. Use the mouse or the arrow keys to navigate between pages.

- ➤ To Change Page Orientation: Select File → Page Setup from the menu and select Landscape or Portrait.
- ➤ To Find a Shape: Type what you're looking for in the Search for shapes box in the Shapes window and click the Search button. To Select a Shape: Click it.

# Working with Shapes

- > To Insert a Shape: Click and drag the shape from the stencil to the desired location in the diagram.
- To Delete a Shape: Select the shape(s) and press < Delete >.
- > To Add Text to a Shape: Click the shape and start typing.
- > To Move a Shape: Select the shape and drag it to a new location.

- To Resize a Shape: Select the shape and drag one of its sizing handles. Tip: the status bar displays the actual size of the selected shape.
- ➤ To Align or Distribute Shapes: Select the shapes you want to align or distribute and click the Align Shapes or Distribute Shapes button on the Action toolbar, or select Shape → Align Shapes or Distribute Shapes from the menu. Select the option you want to use and click OK.
- ➤ To Format Shapes: Select the shape you want to format, click the Fill Color or Line button list arrow on the Formatting toolbar, and select an option from the list. Or, select Format → Fill or Line from the menu.
- ➤ To Group Shapes: Select the shapes you want to group and click the Group button on the Actions toolbar, or select Shape → Grouping → Group from the menu, or press <Ctrl> + <G>.

### **Themes**

New in Visio 2007, a **theme** is a set of unified design elements that you can apply to a diagram to give it a consistent look and feel. Themes coordinate the look of a diagram using colors, fonts, and effects.

To Apply a Theme: Select Format →
Theme from the menu, or click the Theme
button on the Formatting toolbar. The Theme Colors task pane appears by default; click
Theme Effects to open the Theme - Effects
task pane.

**AutoConnect** 

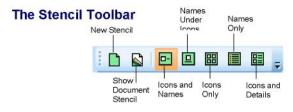

Zoom

### **Stencils**

Pointer

Tool

- A stencil is a collection of shapes related to the template you are currently working on. Each template has a different set of stencils assigned to it.
- > To Open a Stencil: Click the EII Shapes button on the Standard toolbar or select

File -> Shapes -> Open Stencil from the menu.

- To Move a Stencil: Click and drag the stencil by its title bar to a new location in the program window.
- To Remove a Stencil: Right-click the stencil and select Close from the shortcut menu.
- > To Create a New Stencil: Select File -> Shapes -> New
- Stencil from the menu and add the desired shapes to the stencil.
- To Change How Shapes are Displayed: Click the appropriate view button on the Stencil toolbar. Icons and Names is selected by default.

# **Connecting Shapes**

- ➤ Using AutoConnect: A new feature in Visio 2007, AutoConnect lets you add, connect, distribute, and align a whole series of shapes, like those in a flowchart, with only a few clicks. To turn on AutoConnect, click the AutoConnect button on the Standard toolbar. To use AutoConnect, click a shape in the Shapes window to select it and then rest the mouse pointer over the shape on the drawing page that you want to connect the new shape to. Click the blue connection arrow on the side of the shape that you want to connect to. Visio automatically adds and connects the shape from the Shapes window, and aligns and distributes the shapes as necessary.
- Using the Action Toolbar: Select the shapes you want to connect and click the Connect Shapes button on the Action toolbar, or select Shape → Connect Shapes from the menu.
- ➤ Using the Connector Tool: Click the Connector Tool button on the Standard toolbar and then click and drag between connection points to connect shapes. To add a connection point, click the Connector Tool button list arrow on the Standard toolbar

and select **Connection Point Tool** from the list. While holding down the **<Ctrl>** key, click where you want to insert a connection point.
