Features in mvnForum Enterprise Edition

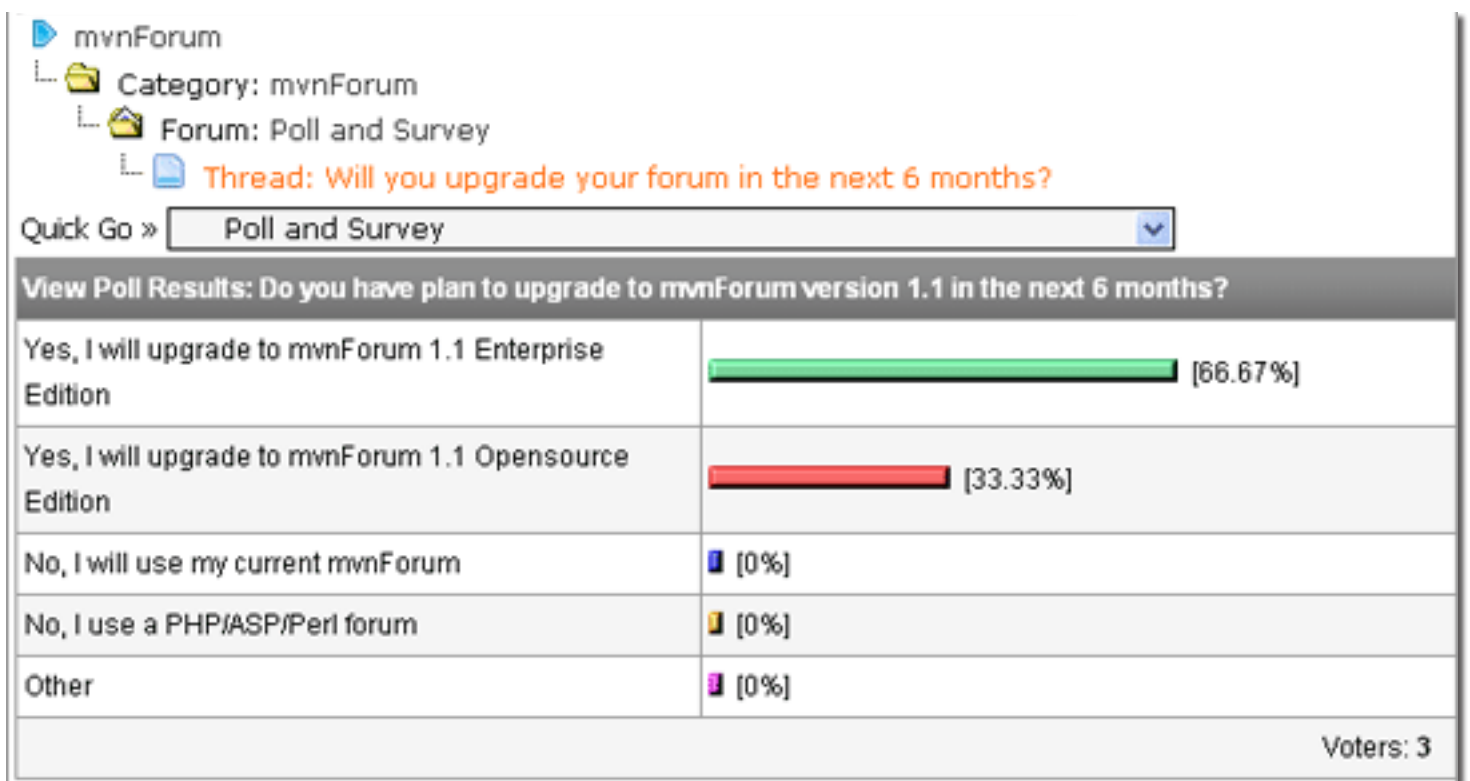

1 Share photos among members

Now you can have your own Google Picasa Web Album, the new album feature let your members share photos that matter, strengthen the relationship in the community, tag and rate let users find the photo with ease.

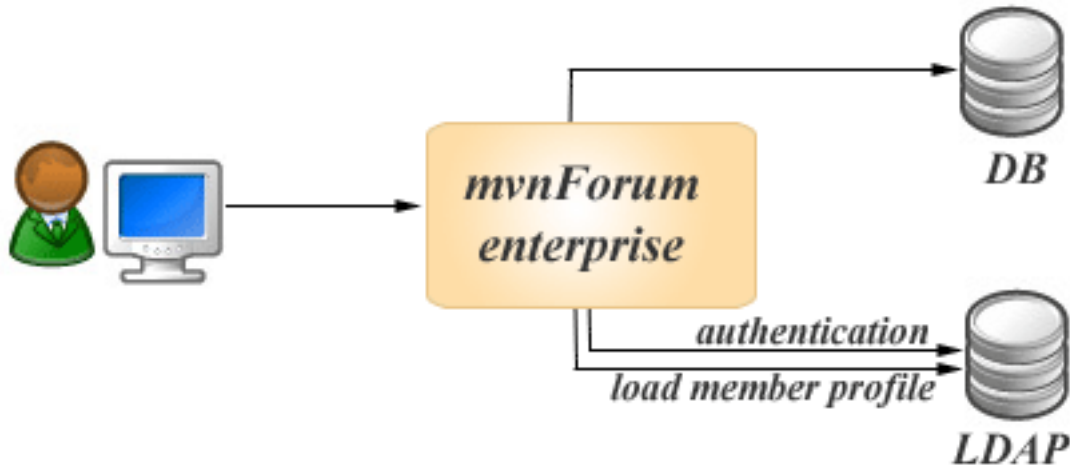

2 Poll

The easiest way to get feedback or ideas from your members is to create a poll. Now you can create any type of poll, including member vote only, guest vote, time limit or no time limit, single choice or multiple choice, etc.

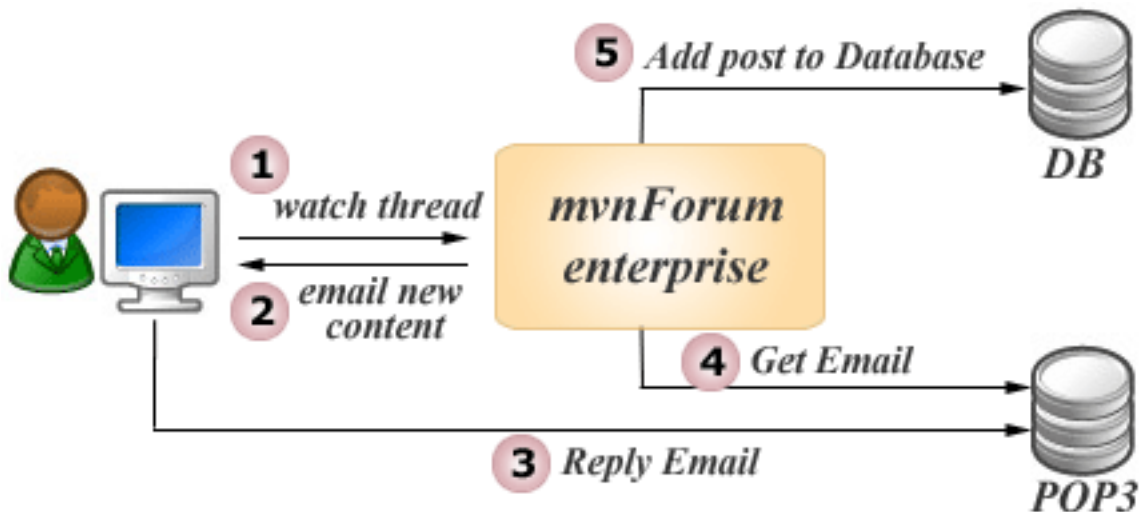

3 Built-in LDAP support

If your company is using LDAP to manage users, you can easily configure mvnForum to access the LDAP for authentication and authorization. You can even configure which user fields should be from LDAP or from database.

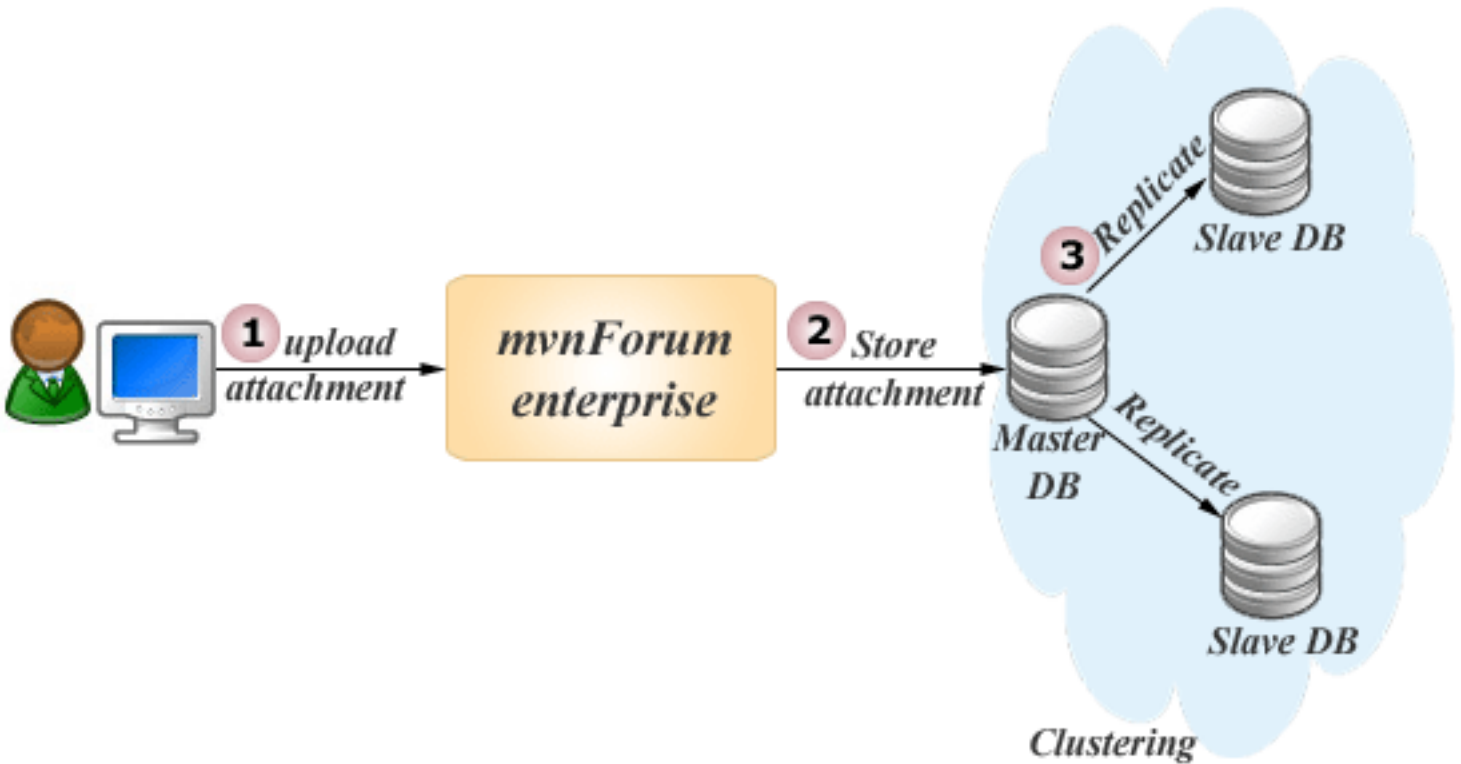

4 Email Gateway

You do not have to access forum to reply to a thread, now mvnForum will email you the new posts and you can reply by replying to that email.

5 Binary Data can be stored in database

If your user attach a file and you run mvnForum load-balance with several servers, then how to replicate the attachment into other servers? The solution is to store attachments, avatars, photos, etc into database and it solves your headache.

6 Hierarchy Categories

Your community is too big and has a lot of category? Now you can use Hierarchy Categories to organize your community. Your users can quickly find and navigate to the proper forum.

All forums in mvnForum: (10 Posts in 7 Threads)

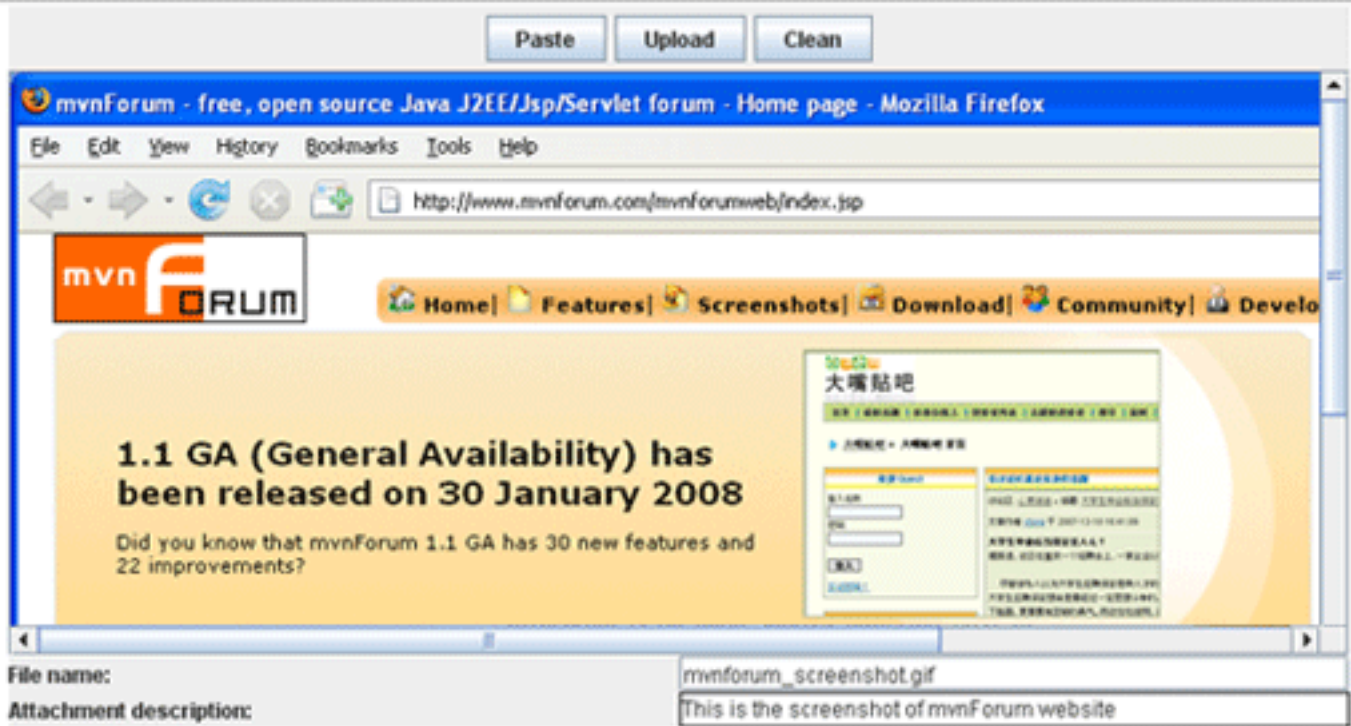

Forum Name/Description	Threads
Category 1 ⬆️ Watch	
Category 1 - A ⬆️ Watch	
Forum 1 - A	0
Category 1 - B ⬆️ Watch	
Forum 1- B	0
first category ⬆️ Watch	
test	

7 Multiple screenshot uploads with Applet

You would like your support team answer your customers quickly with help of several screenshots? Now your support team only needs to press key Print Screen, press Ctrl-V to paste the screenshot to the Applet and press upload. And the whole process is less than 5 seconds.

mvnForum » List all forums » Forum: first forum » Thread: thread with poll » Attach Picture to Post

- Choose Paste button to paste your screenshot. Then choose Upload button to upload your screenshot
- If you want to upload another image, you can choose Clean button to clean your screen then choose Paste button to paste your image.

8 Event Log Management

Your site has several moderators and administrators, and someone delete a favorite thread. Who delete? Now with Event Log Management, all important actions are recorded for you to trace the action back.

Sort by Order

Log Id	Login Name	Main Module	Sub Module	Action Name	Description	Action Level	From IP	Creation Time
20	admin	mvnForum	Admin	add forum	Add forum id=[6] in category id=[8]	Medium	127.0.0.1	Feb 25, 2008 4:30:51 PM
19	admin	mvnForum	Admin	add forum	Add forum id=[5] in category id=[7]	Medium	127.0.0.1	Feb 25, 2008 4:30:33 PM

16	admin	mvnForum	Admin	add category	Add category name=[Category 1]	Medium	127.0.0.1	Feb 25, 2008 4:29:16 PM

9 Statistics Report

A statistics report can tell you many things in just one minute. And besides viewing the reports on browser, you can download the Excel version to your PC. Presently mvnForum supports 5 types of most useful reports.

This page provides statistics information about active and disabled forums.
You can view it online or export information into CSV format.

10 Banned IP Management

Someone from an IP or IP range spam your site. You can ban that IP easily and immediately he cannot access forum any more.

[mvnForum](#) » [Admin Control Panel](#) » [Miscellaneous Tasks](#) » **Banned IP Address Management**

Banned IP Address Management will let you restrict IP address or IP range from accessing your system. You can ban a specific IP address by just entering *IP Address* or you can ban a range of IP by entering both *IP Address* and *IP Range*.

Add banned IP address

* IP Address	<input type="text"/>
IP Range	<input type="text"/>
* Note	<input type="text"/>
Expire Date (dd/mm/yyyy)	-- <input type="text"/> -- <input type="text"/> -- <input type="text"/>

IP Address	IP Range	Note	Expire Date	Edit	Delete
10.0.0.2		This IP spam a lot	Never Expired	Edit	Delete
10.0.0.10	10.0.0.20	These IP range did a DOS attack	Jan 1, 2009	Edit	Delete

11 Banned Email Management

You do not want your members using public emails to register? Or you do not allow some emails to register? This can be done quickly with Banned Email Managements

[mvnForum](#) » [Admin Control Panel](#) » [Miscellaneous Tasks](#) » **Banned Email Management**

Banned Email Management will let you restrict a guest to register an account using the banned email. Users that already have banned email still be able to login. You can use Regular Expression Language in Banned email. Example: if you want to ban all emails from exampledomain.com, please use: `(.*)@exampledomain.com`

Add banned email

* Banned email	<input type="text" value="abc@yahoo.com"/>
* Note	<input type="text" value="This email did a spam so we does not allow this e"/>
Expire Date (dd/mm/yyyy)	<input type="text" value="1"/> <input type="text" value="January"/> <input type="text" value="2009"/>
<input type="button" value="Add"/> <input type="button" value="Reset"/>	

Banned email	Note	Expire Date	Edit	Delete
<code>(.*)@exampledomain.com</code>	User from this domain should not be registered	Never Expired	Edit	Delete

12 Banned Word Management

No administrator wants vulgar or offensive content in forum, now Banned Word Management helps you to control it.

[mvnForum](#) » [Admin Control Panel](#) » [Miscellaneous Tasks](#) » **Banned Word Management**

Banned Word Management will let you filter the content of a post or other information that is entered by a user. The filtered word will be replaced by the *Replacement token*.

Add banned word

* Banned word :	<input type="text"/>
* Replacement token :	<input type="text"/>
* Note	<input type="text"/>
Expire Date (dd/mm/yyyy)	<input type="text" value="--"/> <input type="text" value="--"/> <input type="text" value="--"/>
<input type="button" value="Add"/> <input type="button" value="Reset"/>	

Banned word	Replacement token	Note	Expire Date	Edit	Delete
sex	s**	Bad word	Never Expired	Edit	Delete

13 Banned Username Management

Some username should be reserved for some purposes, and some usernames should not be used at all, then Banned Username Management is your answer.

[mvnForum](#) » [Admin Control Panel](#) » [Miscellaneous Tasks](#) » **Banned Username Management**

Banned Username Management will let you restrict a guest to register an account using the banned username (login name). User that already have banned username still be able to login.

Banned Username Management	
* Banned username	<input type="text" value="administrator"/>
* Note	<input type="text" value="This is a reserved username"/>
Expire Date (dd/mm/yyyy)	-- <input type="text"/> -- <input type="text"/> -- <input type="text"/>
<input type="button" value="Add"/> <input type="button" value="Reset"/>	

Banned username	Note	Expire Date	Edit	Delete
moderator	This is a reserved username and should not be used	Never Expired	Edit	Delete

14 Request Private Forum

Each user can request for his owned private forum and mvnForum enterprise processes the request automatically. Then the owner can decide who can see content, who can participate and who will be the moderator.

[mvnForum](#) » [My Profile](#) » [My Private Forums](#) » **Request a Private Forum**

Request a Private Forum:

From:	usermod@yahoo.com
Subject:	Request private forum from user usermod
* Forum Name:	<input type="text" value="Pet discussion forum"/>
* Forum Description:	<input type="text" value="This is the forum for people loving pets"/>
* User's comment:	<input type="text" value="Hi <u>admin</u>, I would like to open a private forum for people loving pets to discuss and make friends"/>
<input type="button" value="Preview"/> <input type="button" value="Send Mail"/> <input type="button" value="Reset"/>	

“We came into contact with MVNSoft when we were looking for a forum product. mvnForum proved to be what we were looking for. It’s a mature product which has been very stable and is being used by one of our clients. At the same time is it good to see that the product us still be developed further to keep it up to date.

The MVNSoft team has proven to be a software company we can rely on. We have enjoyed their services both in relationship to mvnForum and other products. The communication with project managers and the general management was fruitful and effective. Furthermore we were satisfied with the quality of the services delivered.”

*Jako Jellema
Managing Director of KiNcite B.V, The Netherlands*

Top 5 benefits to upgrade from opensource edition to enterprise edition

1 Source code access

With source code, you can customize the forum for your specific requirements

2 Documentation access

You can access documentations that are previously available to our partners and developer team only.

3 High priority supports

Get supports and expertise directly from developer team and understand the in and out of mvnForum.

4 High priority bug fixes

Found bugs, report and get the fixed version quickly.

5 Ensure your investment

You plan to migrate to Portal next year? All of your investment and data of mvnForum will be kept when you upgrade to the mvnForum portlet edition

We use mvnForum for an intranet site at Fortis, a Global Fortune 100 company.

... after evaluating several candidates, we chose mvnForum. We installed it and started using it about a month ago. It’s getting increasingly heavy use among the developers in I.T., and everyone loves it.

... we’ve never had a good discussion board until now, where all the developers can share tricks and tips and ideas with each other across the company.

*Robert Pappasa
FORTIS  Lead Developer - Fortis Inc. - USA*

Indra is the leading IT and Defense Company in Spain with more than 6500 employees.

... at the beginning of the project we had to decided among some Open Source tools and I have to say that the decision we took was completely right.

What I would like to say is that the architecture of the system is very clear and the application has been designed using the J2EE patterns recommended by Sun. That allows to make modifications or include new functionalities without many problems.

To end with, I would like to thank the people of mvnForum for their wonderful software and I will recommend this tool in each project we have to use a forum system.
