mvnForum Portlet Screenshots

1 Post new thread in BEA Web Logic Portal 8.1 Service Pack 5

The screenshot displays a Mozilla Firefox browser window titled "forumdesktop - Mozilla Firefox". The browser's address bar and menu bar are visible. The main content area features a banner for "AVITEK Inweb" with the tagline "A platform for Information Sharing". Below the banner, there are navigation links for "Desktops & Links", "Avitek Inweb", "My Page", and "Content Management". The central part of the page is the "UserForumPortlet", which includes a "mvnForum" logo, a search bar, and a navigation menu with options like "My Profile", "My Albums", "My Private Forums", and "Moderation". A tree view shows the forum structure: "mvnForum" > "Category: test12" > "Forum: test6" > "Post new thread". Below this is a "Quick Go" dropdown menu. The "Post new thread" form is active, with the "Post Topic" field containing the text "Test". The "Format" section has "Normal Mode" selected. The status bar at the bottom of the browser window shows "Done".

3 Misc Tasks on Jahia 5.0.3

The screenshot shows a Mozilla Firefox browser window titled "mvnforumadmin - Mozilla Firefox". The address bar contains "mvnforumadmin" and the page content is for the "mvnForum" administration interface. The page header includes the "ACME Corp." logo and a navigation menu with items like "mvnforumuser" and "mvnforumadmin". The main content area is titled "Admin" and contains a navigation bar with links: "Admin Index", "Miscellaneous Tasks", "Forum Management", "User Management", "Group Management", and "Send Email". The current page is "Miscellaneous Tasks", which is described as a place to administer other tasks in mvnForum. A list of tasks is provided, including "Test System Configuration", "Configuration File Management", "Log File Management", "Edit Email Templates", "Edit CSS", "Restore CSS", "List Event Logs", "Album Item Tag Management", and "Report Statistics". The browser status bar at the bottom shows "Done".

4 Test System Configuration on Liferay 4.2.1

The screenshot shows a Mozilla Firefox browser window displaying the Liferay 4.2.1 Admin Control Panel. The page title is "Liferay - adminmvnforum - Mozilla Firefox". The browser's address bar shows the URL "http://localhost:8080/adminmvnforum". The page content includes a navigation menu with "Home A1", "user mvnforum", "adminmvnforum", and "Add Page". The main content area is titled "mvnForum Administration" and features a "Welcome liferay.com.1" message. The "Admin Control Panel" is the central focus, with a breadcrumb trail: "Admin Control Panel » Miscellaneous Tasks » Test System Configuration". A message states: "This page tests your system to make sure that it meets the requirements to run properly." Below this, there are two sections: "System Information" and "Library Information". The "System Information" section contains a table with one row: "Support Image Processing" with a value of "Yes". The "Library Information" section contains a table with six rows, all with a value of "Yes": "Support JNDI", "Support Java Sql Ext", "Support Java Activation Framework", "Support Java Mail", "Support Jakarta Common IO", and "Support Jakarta Common Logging". The browser's status bar at the bottom shows "Done".

6 My Profile on Exo 1.1.4

The screenshot shows a Mozilla Firefox browser window displaying the 'Exo Portal' website. The browser's address bar shows 'Container: c2535725'. The page title is 'Portlet: mvnForum'. The user is logged in as 'exoadmin', with a 'Welcome exoadmin' message and a 'Last Login' timestamp of 'Jan 25, 2008 11:36:27 AM From IP 127.0.0.1'. The page features a navigation menu with links for 'My Profile', 'My Albums', 'My Private Forums', and 'Moderation'. A search bar is also present. The main content area is titled 'mvnForum » My Profile' and includes a 'My Profile' section with a 'No Photo' placeholder and several action links: 'Edit My Information', 'Change My Avatar', 'Change My Signature', 'Delete Cookie', and 'Activate My Account (Current Activation Status: Pending)'. Below this is a 'My Control Panel' section with links for 'My Watch', 'My Private Messages', 'My Private Forums', 'My Favorite Threads', and 'Find all my posts'. The 'My current information:' section displays user details in a table format.

7 Admin CP on Jetspeed 2.1

The screenshot shows a web browser window titled "Mvnforumadmin - Mozilla Firefox". The address bar shows the URL "http://localhost:8080/jetspeed2/". The page content includes a navigation menu with "Welcome to Jetspeed 2", "Mvnforum", "Mvnforumadmin", and "Registration". The main content area is titled "mvnForum Administration" and features the mvnForum logo, a "Welcome Guest" message, and an "Admin Control Panel" link. A top navigation bar contains links for "Admin Index", "Miscellaneous Tasks", "Forum Management", "User Management", "Group Management", and "Send Email". A central text box provides instructions for using the Admin Control Panel. Below this, a section titled "Choose below tasks to continue:" lists "Test System Configuration". A table displays the mvnForum Status as "On - Turn Off" with columns for Start Time, Now, and Up Time. At the bottom, an "mvnForum Information:" table shows the Product Name as "mvnForum Portlet" and the Description as "mvnForum Portlet 1.1 dev".

"We came into contact with MVNSoft when we were looking for a forum product. mvnForum proved to be what we were looking for. It's a mature product which has been very stable and is being used by one of our clients. At the same time is it good to see that the product us still be developed further to keep it up to date.

The MVNSoft team has proven to be a software company we can rely on. We have enjoyed their services both in relationship to mvnForum and other products. The communication with project managers and the general management was fruitful and effective. Furthermore we were satisfied with the quality of the services delivered."

*Jako Jellema
Managing Director of KiNcite B.V, The Netherlands*

Top 5 benefits if you use a portal

1 Personalization

User always wants to customize the application to best suited his own character. Portal is designed to solve this problem by provide out-of-the-box themes, built-in portlets and powerful layout manager.

2 Single point of access

Portal provides you a single point of access to all your organization's data, content, and information from both existing in-house applications (i.e., HR, CRM) and external sources. Single sign-on lets users log in once to access all their information needs and you do not have to remember passwords of 20 different web applications.

3 Do not have to reinvent the wheels

If your company have to implement functionalities such as member management, authentication management, authorization management, etc every time develop a new web application, portal is the cure for this time-waste issue.

4 No waste time in the training

With the consistent behaviors between portlets in a portal, you only need to train them once time only, instead of 20 times to train 20 different web applications.

5 Ensure your investment

Java Portal is based on standard JSR 168, with the industry support from big vendors such as Oracle, IBM, Sun, etc and opensource vendors such as Liferay, JBoss, Exo, etc make sure all of your investment in the years to come

We use mvnForum for an intranet site at Fortis, a Global Fortune 100 company.

... after evaluating several candidates, we chose mvnForum. We installed it and started using it about a month ago. It's getting increasingly heavy use among the developers in I.T., and everyone loves it.

... we've never had a good discussion board until now, where all the developers can share tricks and tips and ideas with each other across the company.

FORTIS  *Lead Developer - Fortis Inc. - USA*

Top 6 benefits of mvnForum Portlet Edition

1 Full features in mvnForum Enterprise Edition

Get all the features in mvnForum enterprise edition that has been developed since year 2002. Even if your portal provides a forum portlet, upgrade to full-feature, enterprise-level mvnForum portlet help strengthen and enrich your community.

2 Ensure your investment

mvnForum portlet edition is designed to natively support JSR 168, it means that you will get the updated version with new features when we release the new version of mvnForum enterprise edition. If you modify other Java forums to support JSR 168, you have to spend time for the re-work and testing when there is a new version.

3 Source code access

With source code, you can customize the forum for your specific requirements.

4 Documentation access

You can access documentations that are previously available to our partners and developer team only.

5 High priority supports

Get supports and expertise directly from developer team and understand the in and out of mvnForum.

6 High priority bug fixes

Found bugs, report and get the fixed version quickly.

Indra is the leading IT and Defense Company in Spain with more than 6500 employees.

... at the beginning of the project we had to decided among some Open Source tools and I have to say that the decision we took was completely right.

What I would like to say is that the architecture of the system is very clear and the application has been designed using the J2EE patterns recommended by Sun. That allows to make modifications or include new functionalities without many problems.

To end with, I would like to thank the people of mvnForum for their wonderful software and I will recommend this tool in each project we have to use a forum system.

Ignacio Puertolas
