## Medicare Summary

## Patient Reviews

"I was extremely happy with them, I received a lot of physical therapy and it made a huge difference in my recovery. Staff works together and it really made a difference."  
- Previous Patient

"A very positive experience. Staff was friendly and engaging. Felt like everyone really cared."  
- Previous Patient

"My mom it has had absolutely fabulous care, it's one of the most caring facilities I've ever been a part of. They have wonderful care and the employees have worked here for many many years. I would highly recommend it, it's like a family here."  
- Previous Patient

"Finding a facility that I felt comfortable with was definitely a challenge, but after reading some of the previous comments I felt more comfortable with my choice, and it was definitely the right one."  
- Previous Patient

## Services

- Skilled Nursing Care
- Physical Therapy
- Occupational Therapy
- Speech Therapy
- Social Worker

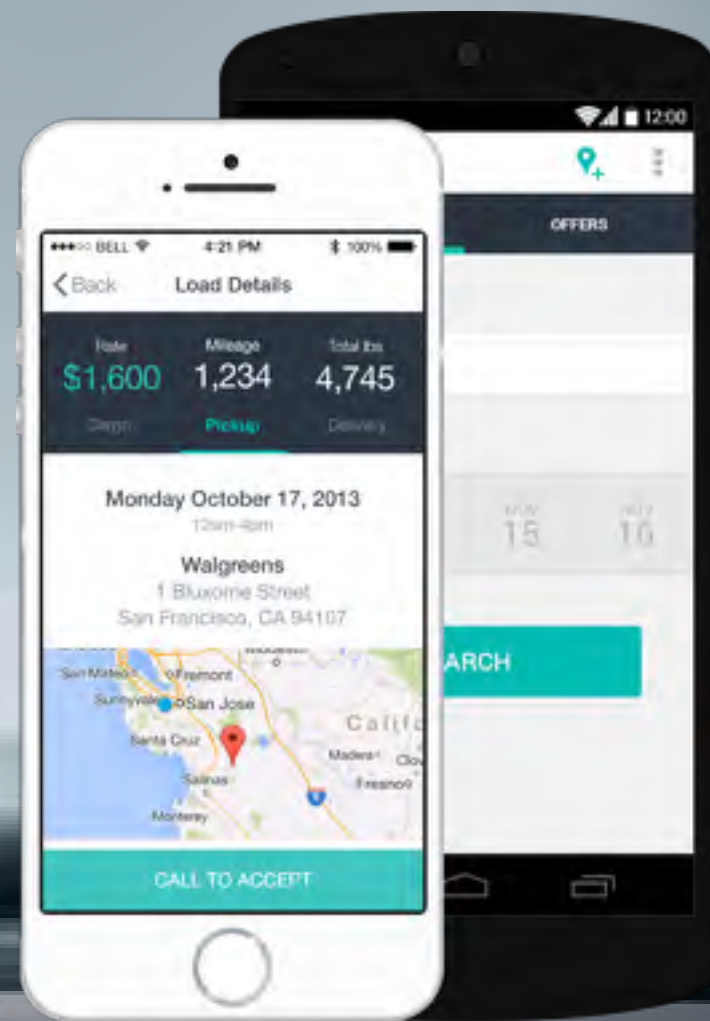

## A Note from this Provider

For 110 years, our facility has been a mission-driven not-for-profit in its care for older adults. We rank as one of the area's most experienced sub-acute care providers and offer clinical, therapeutic and specialty programs. We meet high standards of care for the elderly, while preserving dignity, independence and quality of life.

# LOW / NO-COST OPERATIONAL CHANGES COULD DOUBLE ENERGY EFFICIENCY IN COMMERCIAL BUILDINGS

RETROFIT VS. OPERATIONAL SAVINGS POTENTIAL SPLIT

↑ EACH BAR REPRESENTS A BUILDING  
● 50% OF RETROFIT SAVINGS  
● 50% OF OPERATIONAL SAVINGS

## FIRSTFUEL SAMPLE BUILDING PORTFOLIO (60M SQFT)

51 percent of all energy efficiency savings in commercial buildings are achievable through low / no-cost operational improvements. The portfolio above represents a \$12M in operational savings potential, with a substantial return on investment.

**FIRSTFUEL**  
BUILDING ENERGY ANALYTICS

## MOST COMMON OPERATIONAL SAVINGS

Can be implemented immediately by building operators (overlooked) — often at little cost and few payback periods.

### HVAC SCHEDULING

60% of sampled buildings were ready for occupancy at 7:00 or more outside people arrive and after they leave.

### EQUIPMENT SEQUENCING

Over 60% of sampled buildings had equipment that was improperly sequenced, running less efficiently than when not required.

### SIMULTANEOUS HEATING & COOLING

Many buildings use heating systems during 70+ degree outside temperatures, with cooling systems still being in venting to conserve.
