

Lowering the Barrier to Learning Programming

Pamela Fox

@pamelafox

We need more programming literacy.

(In the U.S.)

(In the U.S.)

<http://code.org/promote>

How can we increase those numbers more quickly?

How did I get into programming?

5 Computers

T1 Line

**Supportive
Parents**

I was lucky.

**We can't afford to
rely on luck anymore.**

We need to lower the barriers.

You can help.

Barrier #1: Access to a Computer

U.S. public schools:

<http://www.donorschoose.org/donors/search.html?keywords=%22computer%20science%22>

Spain/Europe:

<http://www.ticbeat.com/general/como-donar-viejo-ordenador/>

Barrier #2: Local Dev Setup

Many students struggle with setting up a local environment

Many students don't have their own computers.

Many students are using ChromeBooks/iPads/Phablets.

...therefore, we need more online programming environments

Online Programming Environments

JavaScript

Khan Academy

Block-based

Snap Scratch Blockly

Python

PyTutor CodeSkulptor

HTML/CSS/JS

JSBin

CodePen

Multi

JSFiddle

GA Dash

REPL.it

Codecademy

Thimble

Online Programming Environments

What are we missing?

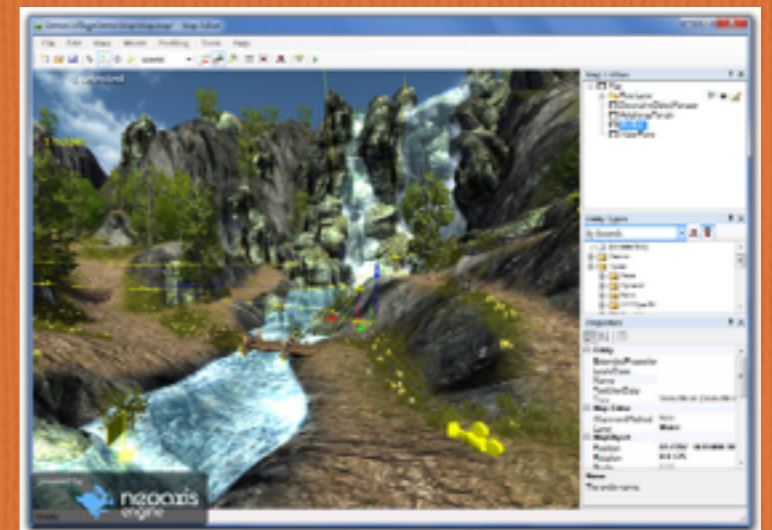

Hardware

Languages

Objective-C
Swift C++
Chuck
Fortran

Use Cases

Curriculum/Community

Barrier #3: CS Classes

In the U.S.

In 28 out of 50 states,
CS does **not** count
towards math/science
graduation requirements.

9 out of 10 high schools
don't offer CS classes.

<http://code.org/promote>

CS classes need teachers

In Madrid, students in secondary school now have programming as a requirement:

“La Comunidad calcula que en los próximos cinco años unos 240.000 alumnos habrán estudiado dos años de programación y otros 60.000 habrían cursado para entonces el programa completo.”

http://ccaa.elpais.com/ccaa/2014/09/03/madrid/1409772225_352560.html

...Who will teach them?

Coding Clubs

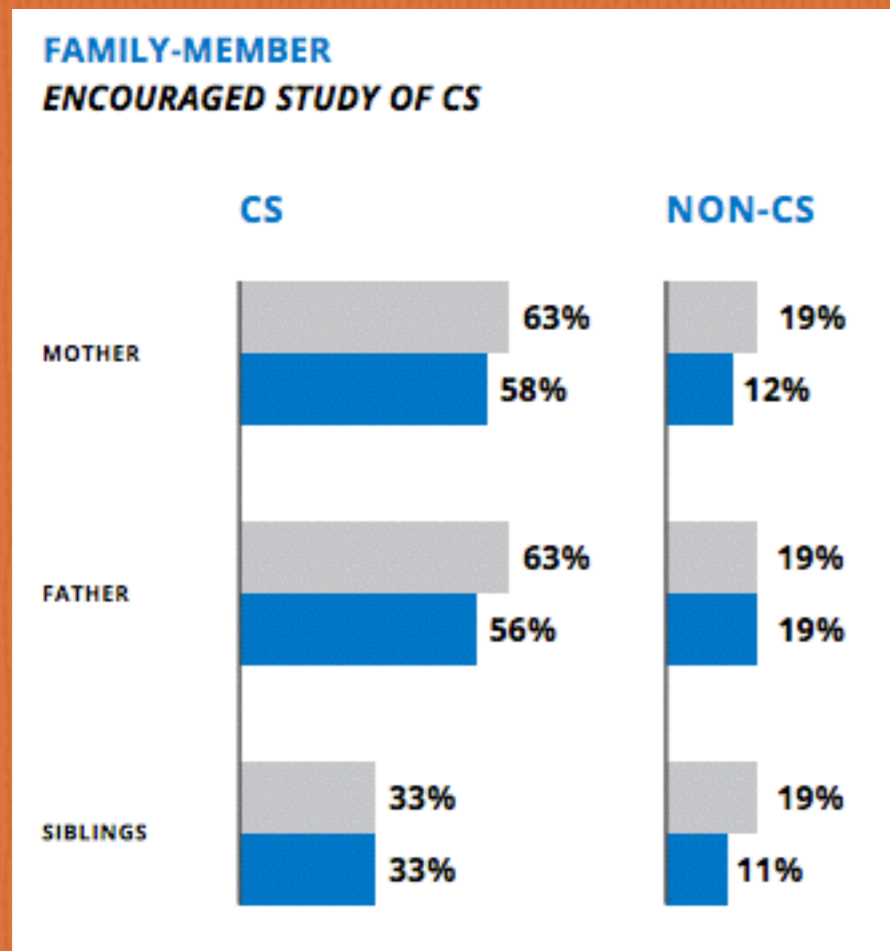

<http://www.coderdojooc.com/>

<https://www.flickr.com/photos/medialab-prado/>

<http://code.org/learn/local>

Barrier #4: Social encouragement

Most important forms of encouragement:

1. Parental encouragement (regardless of occupation)
2. Familial encouragement
3. Peer encouragement

Barrier #6: Career Misconceptions

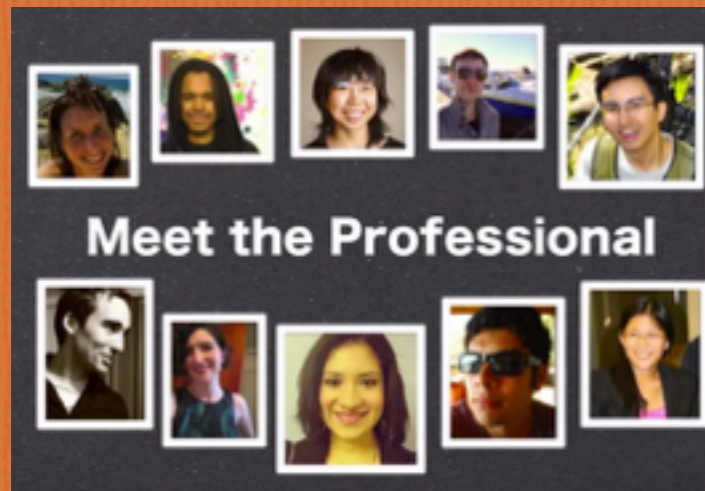

“Research reports that students finishing high school have a difficult time seeing themselves as computer scientists since they do not have a clear understanding of what computer science is and what a computer scientist does.”

<https://www.edsurge.com/n/2014-01-07-want-more-women-in-tech-fix-misperceptions-of-computer-science>

Especially true for females.

<http://static.googleusercontent.com/media/www.google.com/en/us/edu/pdf/women-who-choose-what-really.pdf>

Barrier #6: Career Misconceptions

Meet the Professional

- Welcome to "Meet the Professional!"
- Sarah Northway, Game Maker and Nomad
- Yann Dauphin, Researcher and Bass player
- Brenda Jin, Mobile Prototyper and DJ
- Tom Heinan, Mobile Developer, Pilot, and Zombie
- Amy Quispe, Data Liberator and Developer Relater
- Bill Mills, Physicist and Interdisciplinary Programmer

Lighting up the Pixar™ movies that light up the big screen.
Danielle Feinberg

Made With Code

www.madewithcode.com/mentors

That's not an exhaustive list.

There are many more barriers, and many vary based on demographic.

Your goal:

**lower the barrier for
one kid to learn to code.**
