NAME

CPANPLUS::Module::Author::Fake

SYNOPSIS

```
my $auth = CPANPLUS::Module::Author::Fake->new(
            author  => 'Foo Bar',
            email   => 'luser@foo.com',
            cpanid  => 'FOO',
            _id     => $cpan->id,
        );
```

DESCRIPTION

A class for creating fake author objects, for shortcut use internally by CPANPLUS.

Inherits from CPANPLUS::Module::Author.

METHODS

new(_id => DIGIT)

Creates a dummy author object. It can take the same options as
CPANPLUS::Module::Author->new, but will fill in default ones if none are provided. Only the _id
key is required.
