NAME

File::Spec::Epoc - methods for Epoc file specs

SYNOPSIS

```
require File::Spec::Epoc; # Done internally by File::Spec if needed
```

DESCRIPTION

See File::Spec::Unix for a documentation of the methods provided there. This package overrides the implementation of these methods, not the semantics.

This package is still work in progress ;-)

canonpath()

No physical check on the filesystem, but a logical cleanup of a path. On UNIX eliminated successive slashes and successive "/.".
