# SERVOY: WHAT IS?

- Application Development Framework
- GUI/Screen Designer
- Application Server

# BASED ON?

- Written in Java.
- JavaScript as Primary Language.
- Plug-Ins in Java.
- Any JDBC Database as Back-End.

# PORTABLE. NO, REALLY.

- Windows / OS X / Linux GUIs.
- Any JDBC DB for Backend.
- Web Client That Doesn't Suck.
- SaaS Tools That Don't Suck.
- Everything the Client Needs is in the DB.

# THINK OF IT AS

- FileMaker, only...
  - Scalable
  - Programmable
  - Database-Agnostic
  - Generally Doesn't Suck

# BEFORE SERVOY 5.2...

- Proprietary Product.
- Not Cheap.
- Installed Sybase Anywhere as Default Database
- Many Customers Never Moved Off

# AS OF SERVOY 5.2...

- Open Source!
- AGPL (or a proprietary license, if that's your thing)
- AND...

# INSTALLS POSTGRESQL!

- PostgreSQL will be the default development database.
- Multiplatform Installer being developed by Servoy
- Conversion Path for Existing Sybase Customers
- June-July Release

# SERVOY AND POSTGRESQL
