Chicago - My kind of town

The story after the fire

The story of the Great Chicago Fire of 1871 isn't really about the fire. It's about what happened next:

*A remarkable moment when the most brilliant engineers, architects and inventors **came together** to build a new city.*

Their innovations – born of passion and practical ingenuity – shaped not just Chicago, but the modern world. What started 140 years ago continues to this day.

Coming together .. Collaboration ... Open Source

The **Marble Track Hack attack** is all about a simple marble that must successfully travel the track from start to finish in no more than 1m 30 sec. The marble must cross:

- At least four towers, 2.5 feet high
- At least six drops from one track to another
- Start at cup on the top of a tower
- End in the cup on the table
- At least 1 elevator per tower
- And yes, it's OK to re-build anything !!

Cognitive Diversity - Welcome to Red Hat!

A banner for a Red Hat press release. The background is a dark, grayscale image of a road at night with streetlights. A red diagonal stripe runs from the top-left to the bottom-right. The Red Hat logo and 'redhat.' are in the top-left. Navigation links are at the top: 'Technologies', 'Services & support', 'Success stories', and 'About Red Hat' (which is underlined with a red bar). The text 'PRESS RELEASE' is in the top-left. The main headline is 'Red Hat Honors Instructors Who Champion Open Source Education in the U.S.' and the sub-headline is 'Twenty-one instructors recognized for incorporating open source into their academic work'.

What happens when 25 Middle School girls get together?

WHAT HAPPENS WHEN 25 MIDDLE SCHOOL GIRLS GET TOGETHER?

They tell stories

Good things happen when we come together to create something new. Connections are formed. Discoveries are made. Fresh ideas emerge. And obstacles are overcome. That's why we believe that creative collaboration is the best way to make the world a better place – and to forge lasting friendships.

So, in partnership with the City of Boston, Boston After School & Beyond, Sociedad Latina, and Boston University, we'll be teaching 25 of Boston's middle school girls about the value of collaboration. From a Red Hat mobile COLAB trailer stationed at Boston's City Hall Plaza, we'll teach them how to build and code a digital camera from a Raspberry Pi computer kit. Then, they'll take their cameras out to capture what collaboration means to them.
