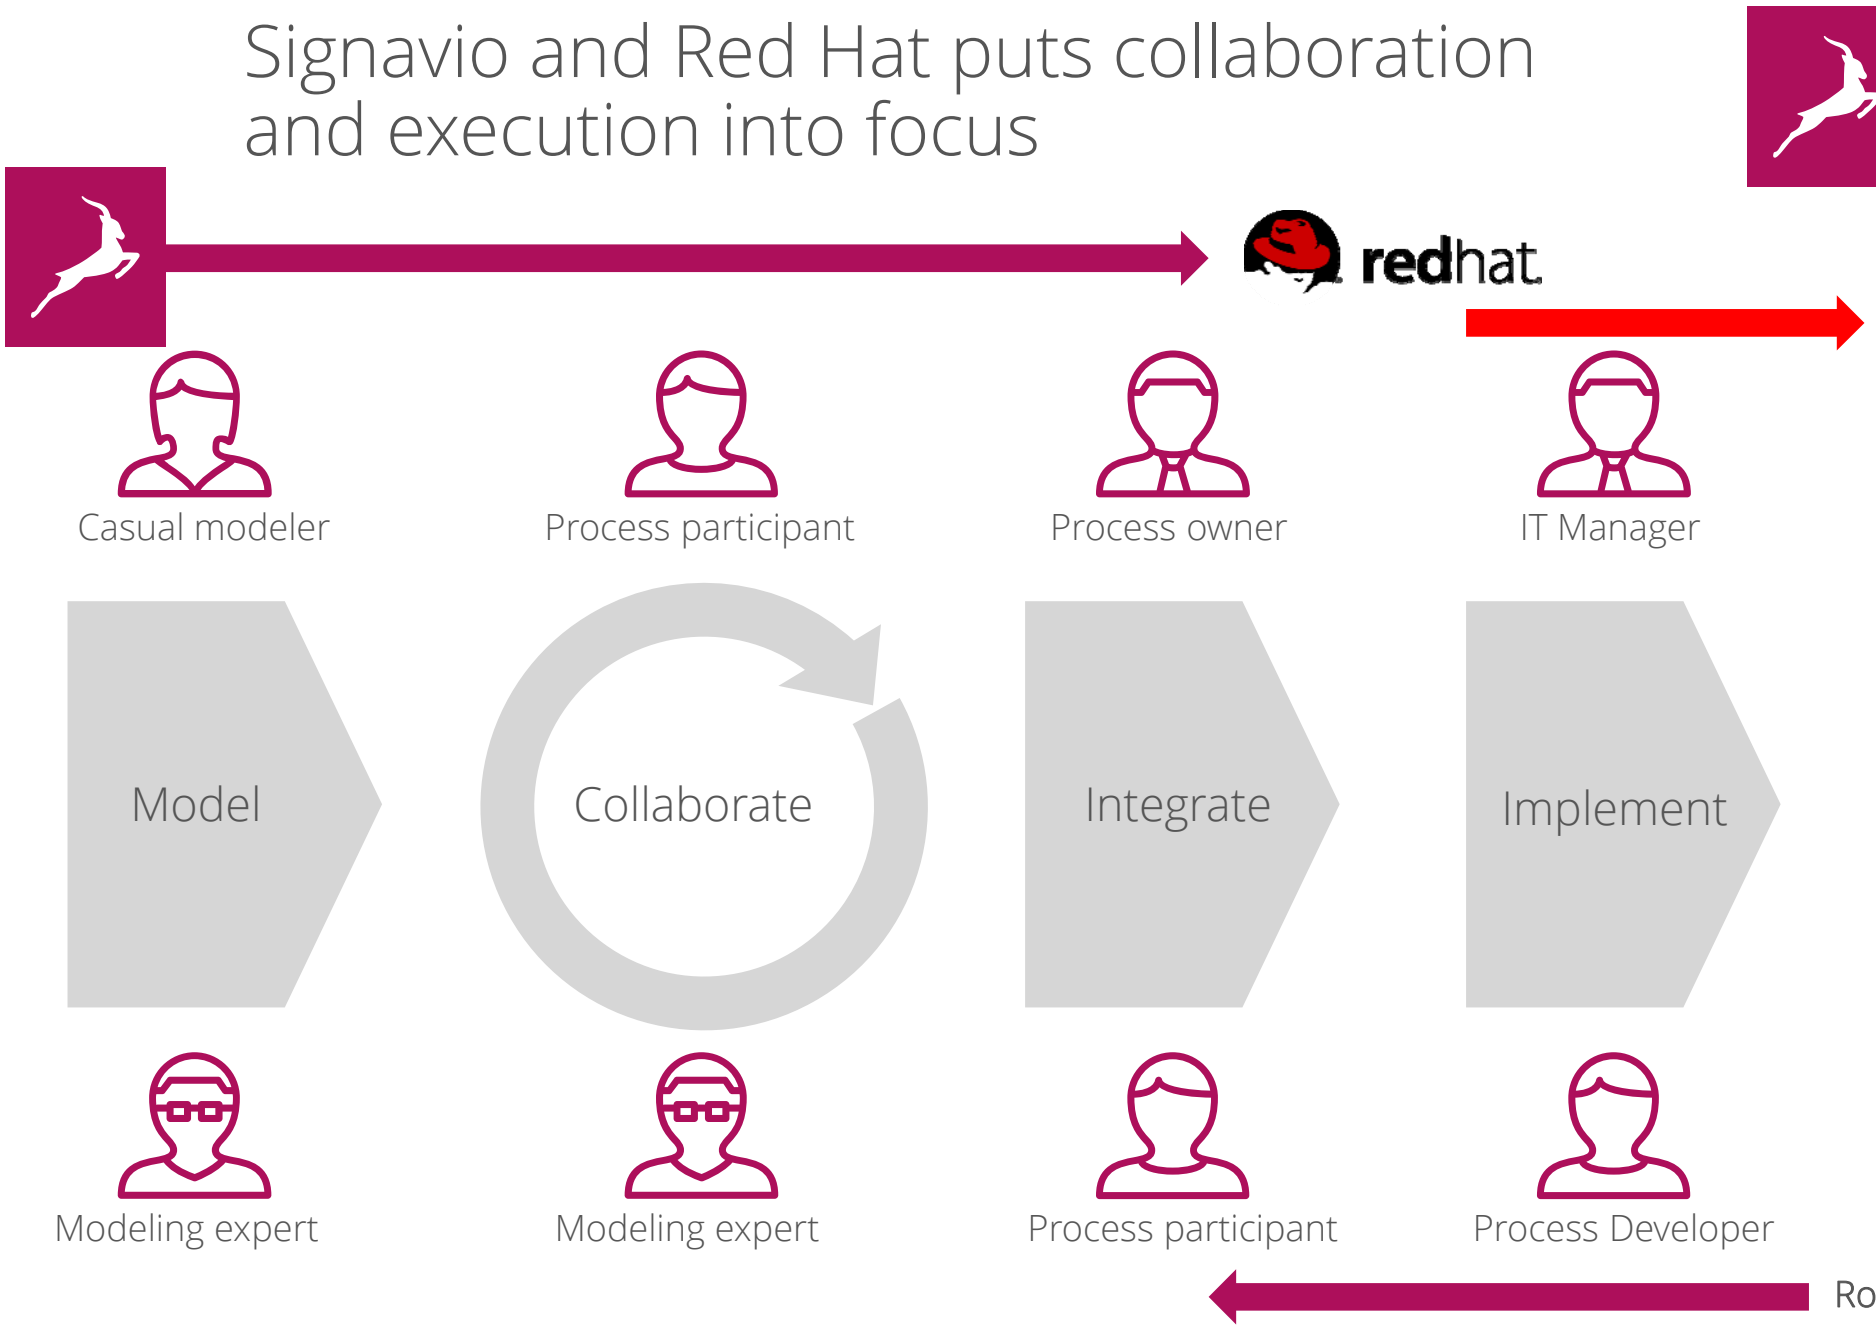
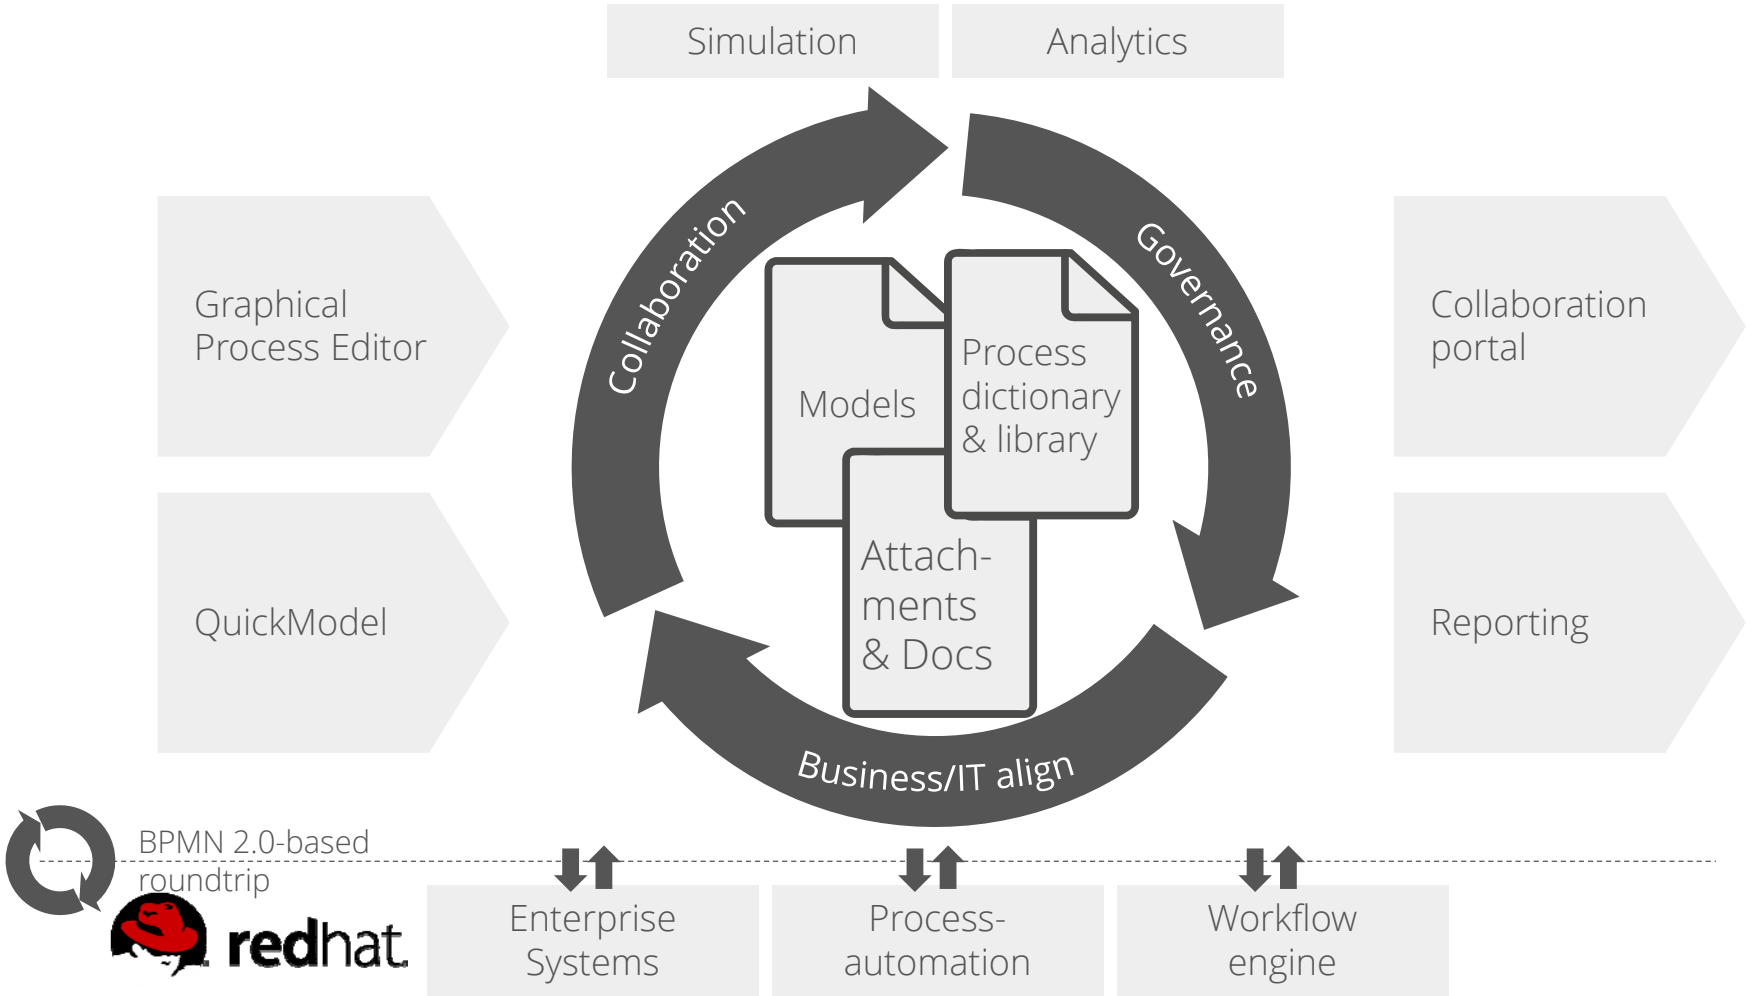
Documenting Processes	Knowledge Management, QM, Compliance and Risk Management

Signavio and Red Hat puts collaboration and execution into focus



The Signavio Process Editor



Decision in Signavio Process Manager and JBOSS BRMS

Organizations can improve how they make decisions

Human decisions

- Unclear rules
- Inconsistent decisions
- Bad decisions
- Decision making only by highly qualified / senior people

Automated decisions

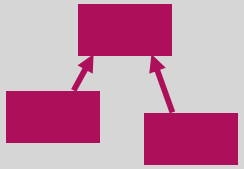
- Low business owner engagement during rules definition
- Slow implementation
- Automation potential not leveraged

Business Decision Management as essential tool for the digital era

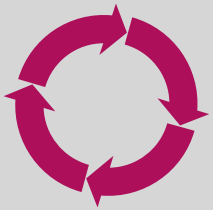
Drivers

- Digitalization
- Regulation

BDM principles



Decisions as first-class citizen



End-to-end decision mgmt

Benefits

- Increased compliance
- Improved operations
- Reduced risk

The Signavio Decision Manager

- **Combines processes & decisions**
- End-to-end decision management
- Easy to use, social collaboration
- Intuitive decision simulation
- DMN 1.1 support
- Cloud or On-Premise
- Direct Execution in the JBOSS BRMS Environment
