

RED HAT
SUMMIT

Converging insightful, data-led applications with traditional web applications

Michael McCune
Senior Software Engineer

Steven Pousty
Lead Developer Evangelist, OpenShift Online

GOALS

- Brief introduction to how things have evolved
- Talk about what we have now
- Demo of this in practice
- Have fun!

ASSUMPTIONS

- You have written a web app at some point in your life
- You know some basics of Spark and such

WHERE ARE WE COMING FROM?

Log

Command ==>

<http://www.sas.com/service/techaup/intro.html>

Online Documentation/Manuals are available at URL:
<http://support.sas.com/onlinedoc/913/docMainpage.jsp>

NOTE: No options specified.

NOTE: 33554432 bytes were available above the line at initialization.

NOTE: 4259848 bytes were available below the line at initialization.

NOTE: 33038144 bytes were available above the line after adjustment for
MEMLEAVE=524288.

NOTE: The initialization phase used 8.88 CPU seconds and 9853K.

NOTE: The address space has used a maximum of 712K below the line and
18488K above the line.

WELCOME TO PARADISE

WE HAVE HAD SOME GREAT DEVELOPMENTS

- People figured out how to make commodity hardware do great things
- Distributed software has gotten better
- Programming languages have gotten easier
- CS has put effort into statistical libraries
- The browser has grown up

WHAT DOES CONVERGENCE LOOK LIKE?

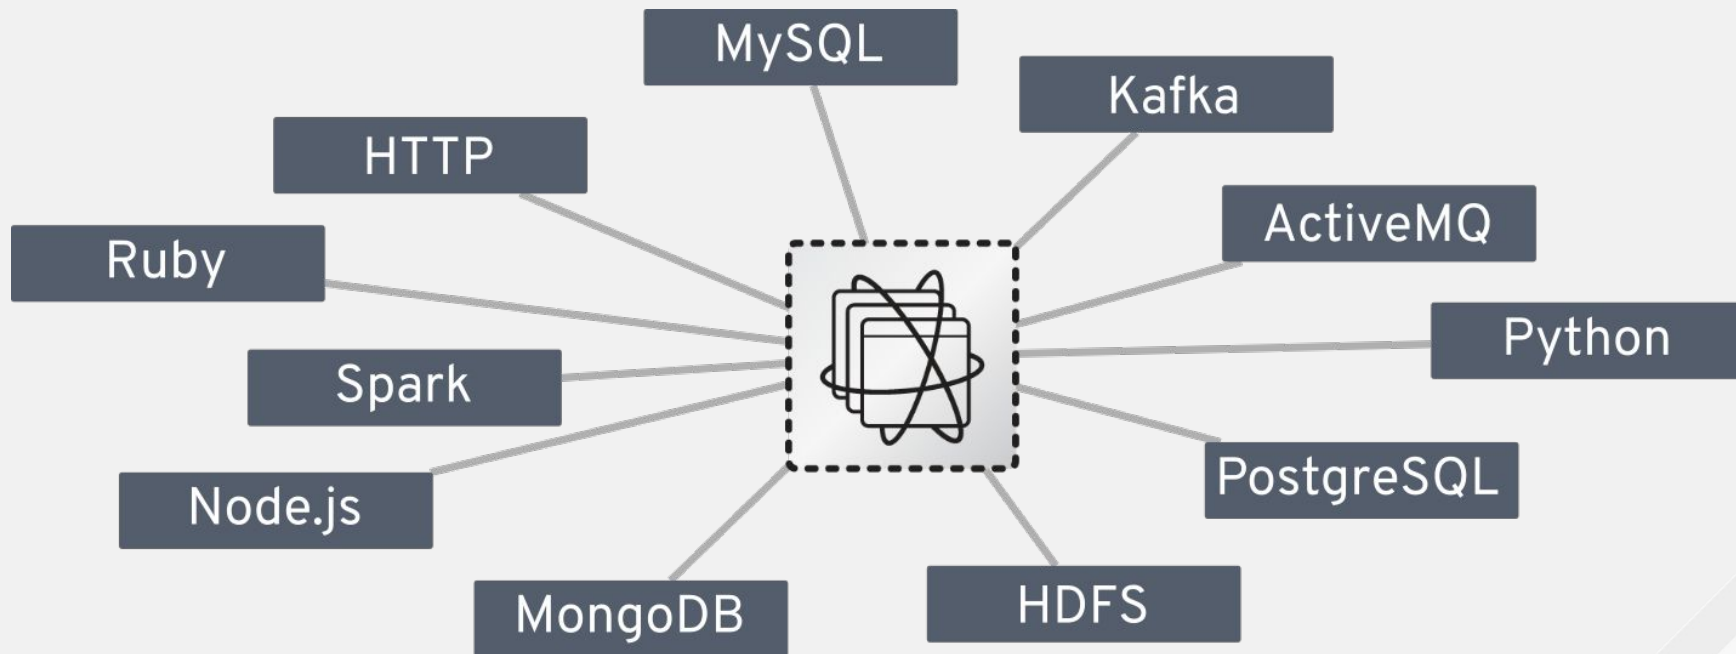

+

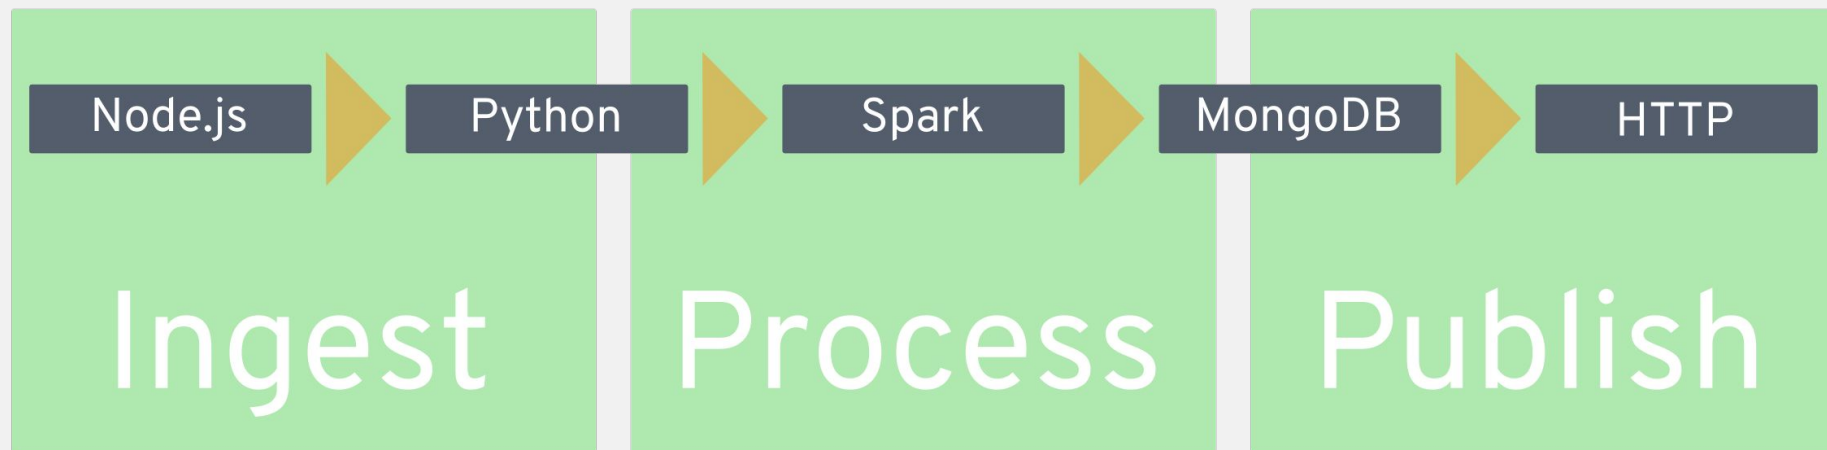

OPENS SHIFT

ARCHITECTING YOUR APPLICATION

HAMMERING YOUR APP INTO SHAPE

BUILDING AS A TEAM

Node.js

Python

Spark

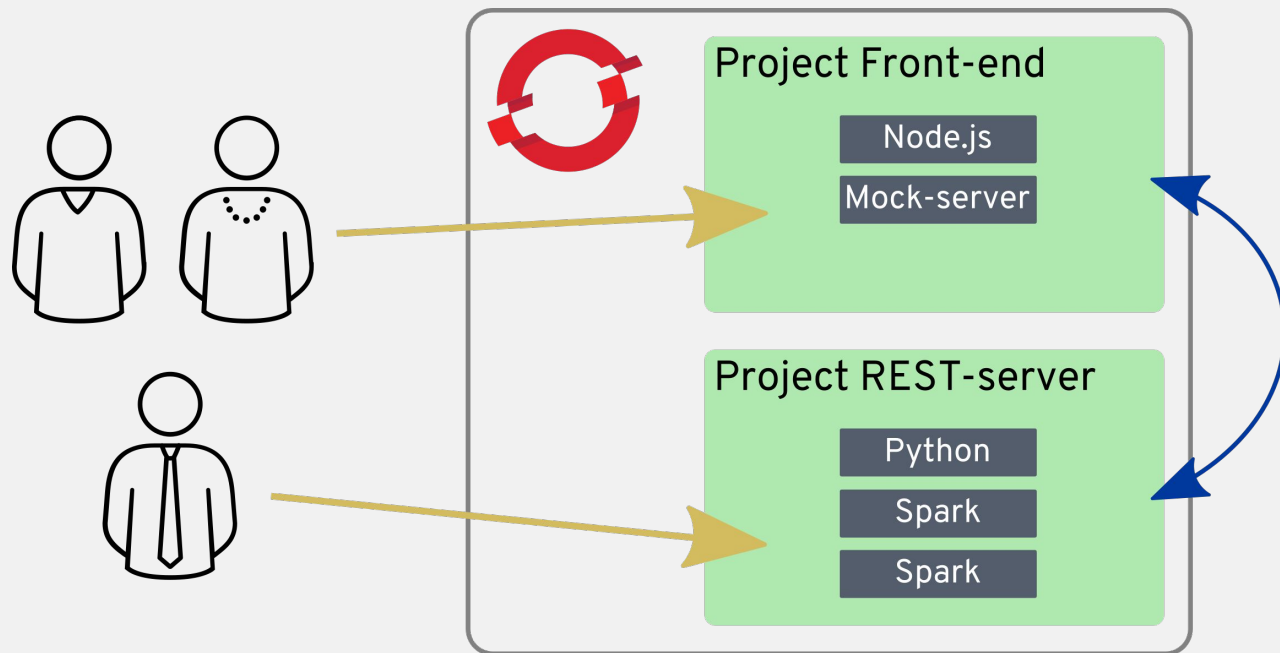

MongoDB

HTTP

TAKING IT TO THE NEXT LEVEL

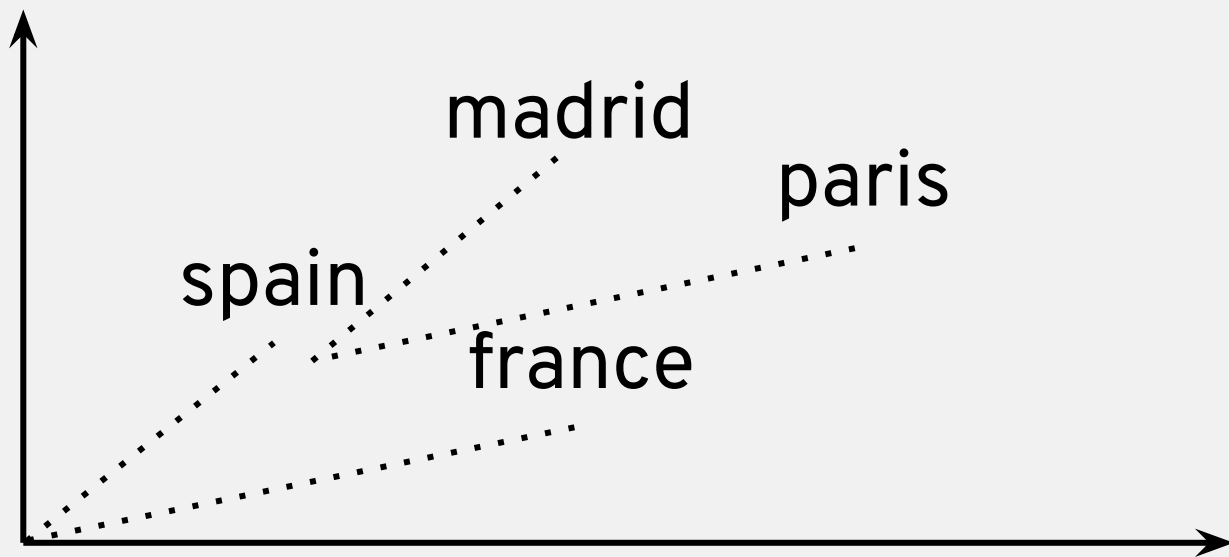

CASE STUDY: OPHICLEIDE

WHAT DOES IT DO?

WHAT IS WORD2VEC?

$$v(\text{"madrid"}) - v(\text{"spain"}) + v(\text{"france"}) \approx v(\text{"paris"})$$

DEMO

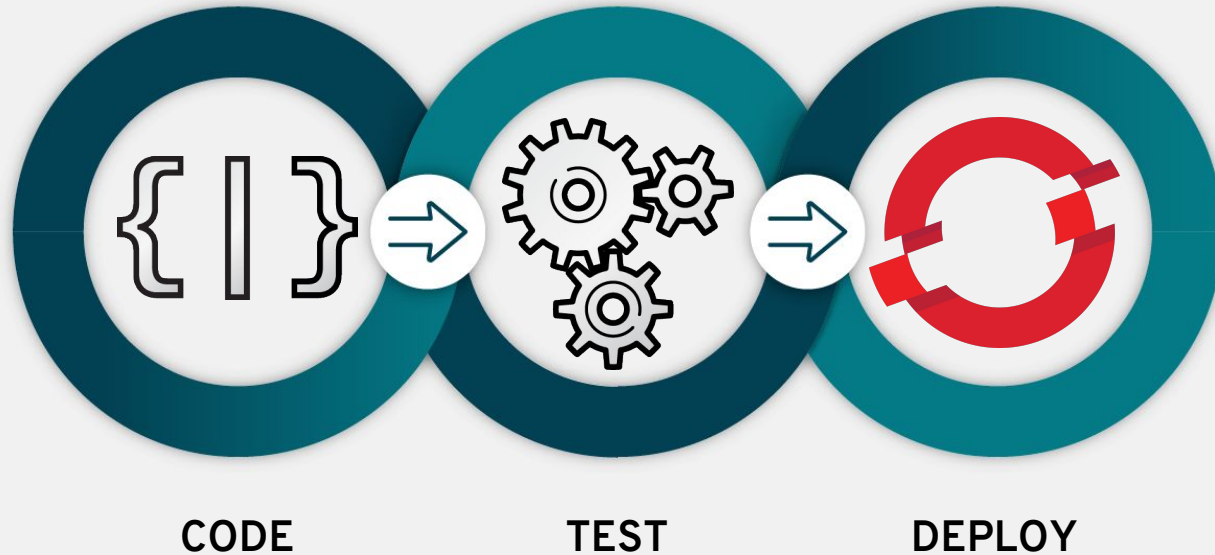

THINGS THAT HELPED OUR COLLABORATION

THINGS THAT REQUIRE GREATER COORDINATION

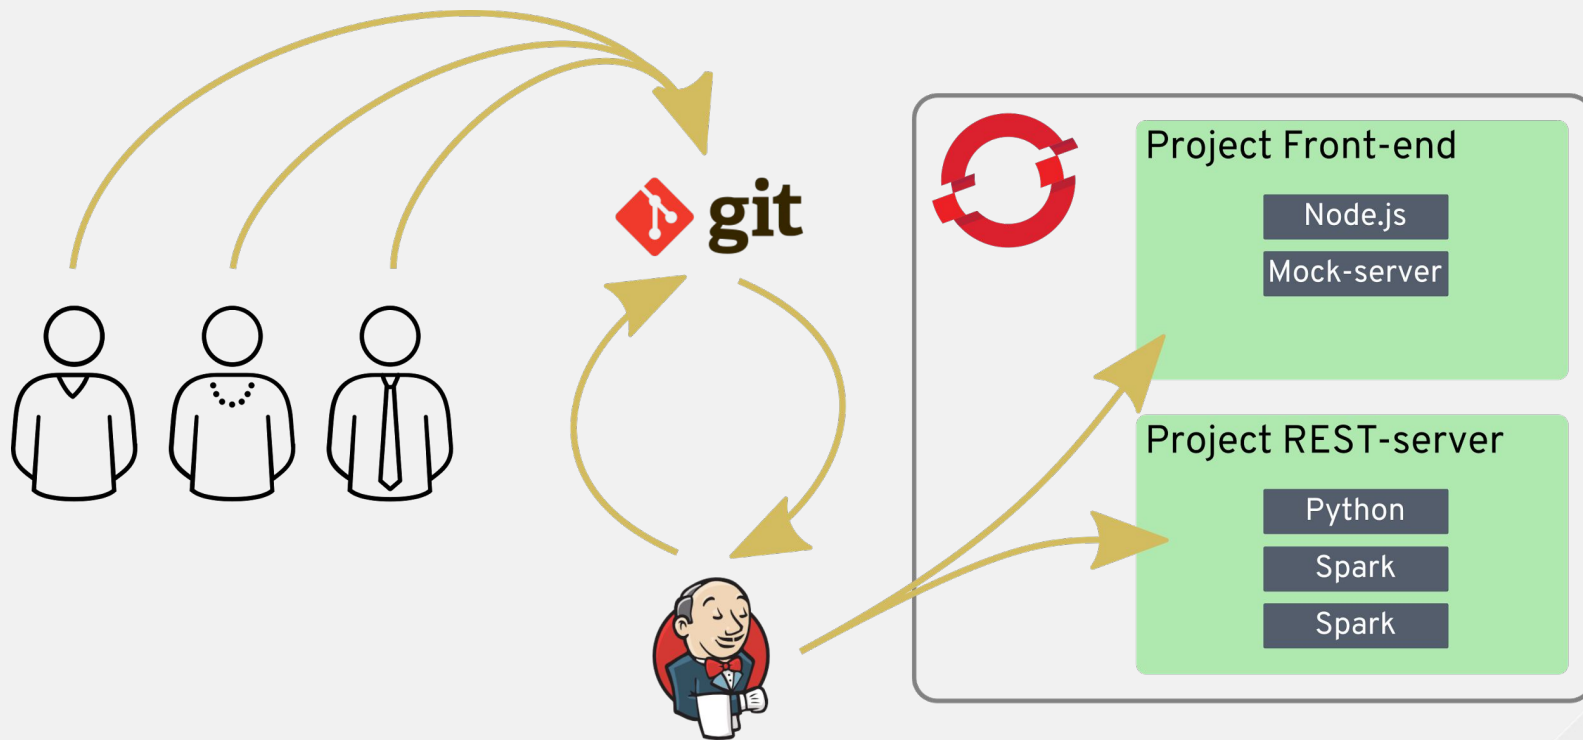

- API construction
- Compute resource affinity
- Persistent storage

WHAT ABOUT THE DEVOPS?

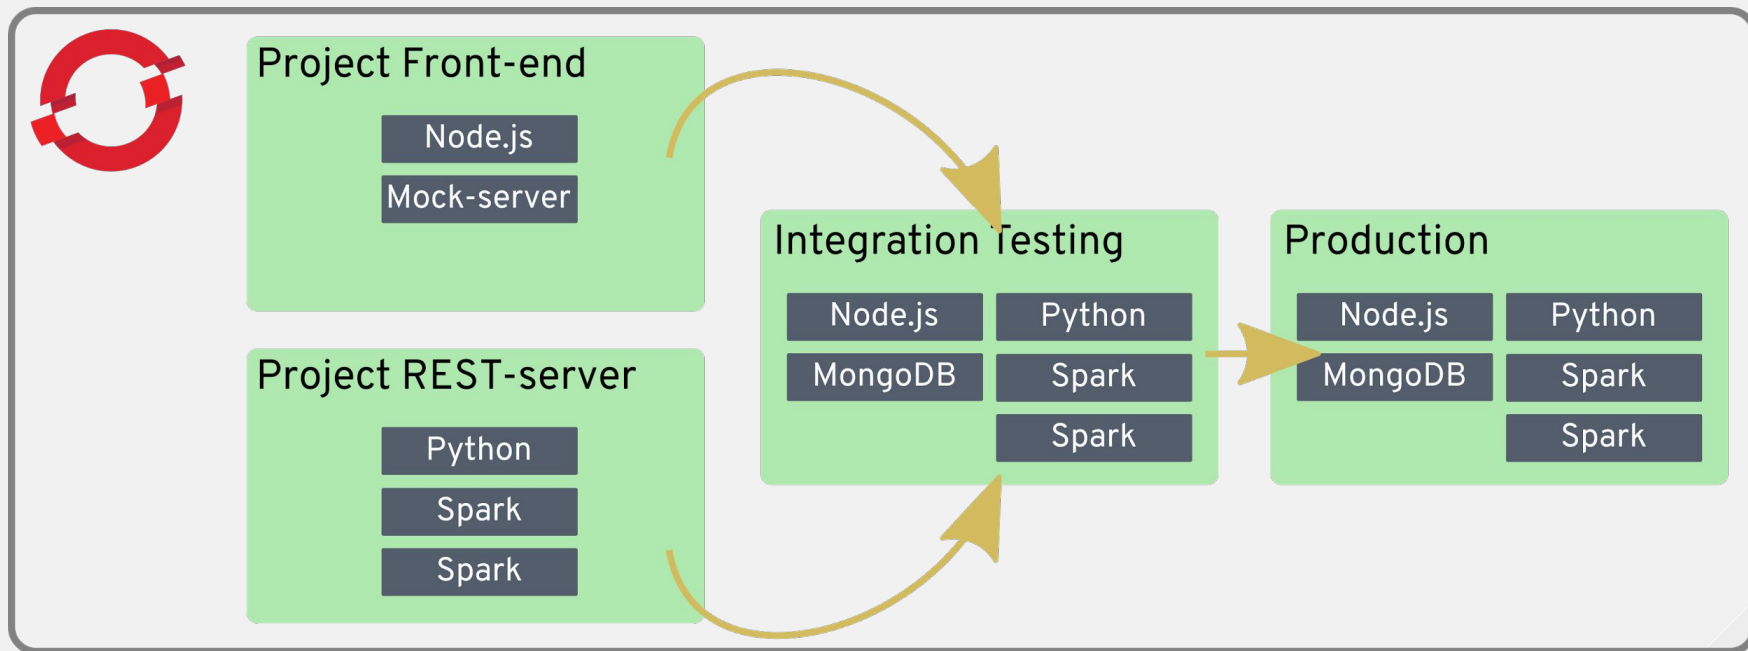

DEMO

IMPROVING THE PROCESS

FROM DEVELOPMENT TO PRODUCTION

TEST DRIVE IT!
