Modernizing your Apps and Cloud Transformation

Prepare yourself for the Digital Enterprise

What does “Going Digital” really mean?

The drive to digital is a powerful business transformation, forcing enterprises to reshape the fundamentals of their businesses to extend, defend, create, and disrupt the ecosystem where...

Different Starting Points, Different Needs

- Functionality needs to be developed
- No baggage
- Innovate, innovate, innovate
- Use latest technologies
 - Containers
 - Microservices
 - NoSQL databases
 - Etc.
- Look for integrated development environment (CloudFoundry, OpenShift, Azure PaaS...)

Cloud Native

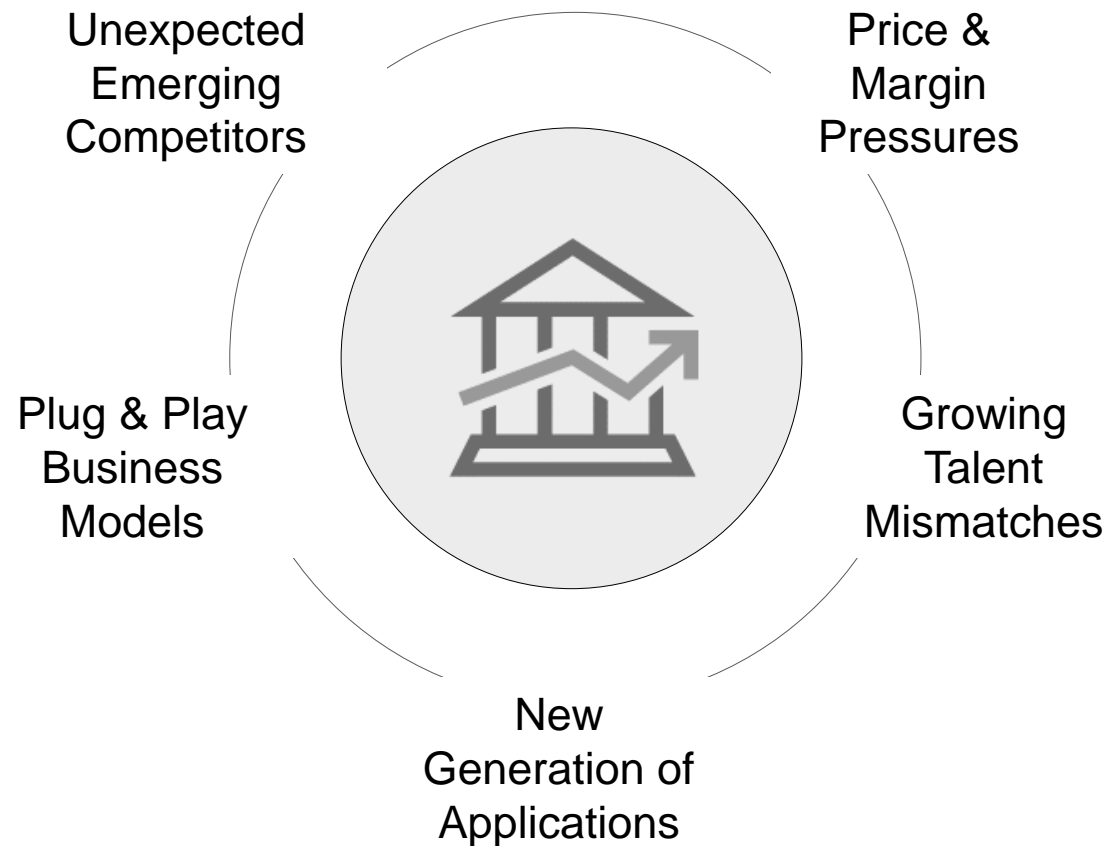

- A lot of functionality (digital assets)
- A lot of experience
- Transform, transform, transform
- Build on available technologies and evolve them to address the business needs:
 - Virtualization
 - Cloud/Hybrid
 - Etc.
- Look for responsive development environment (Agile, DevOps)

Cloud Migrant

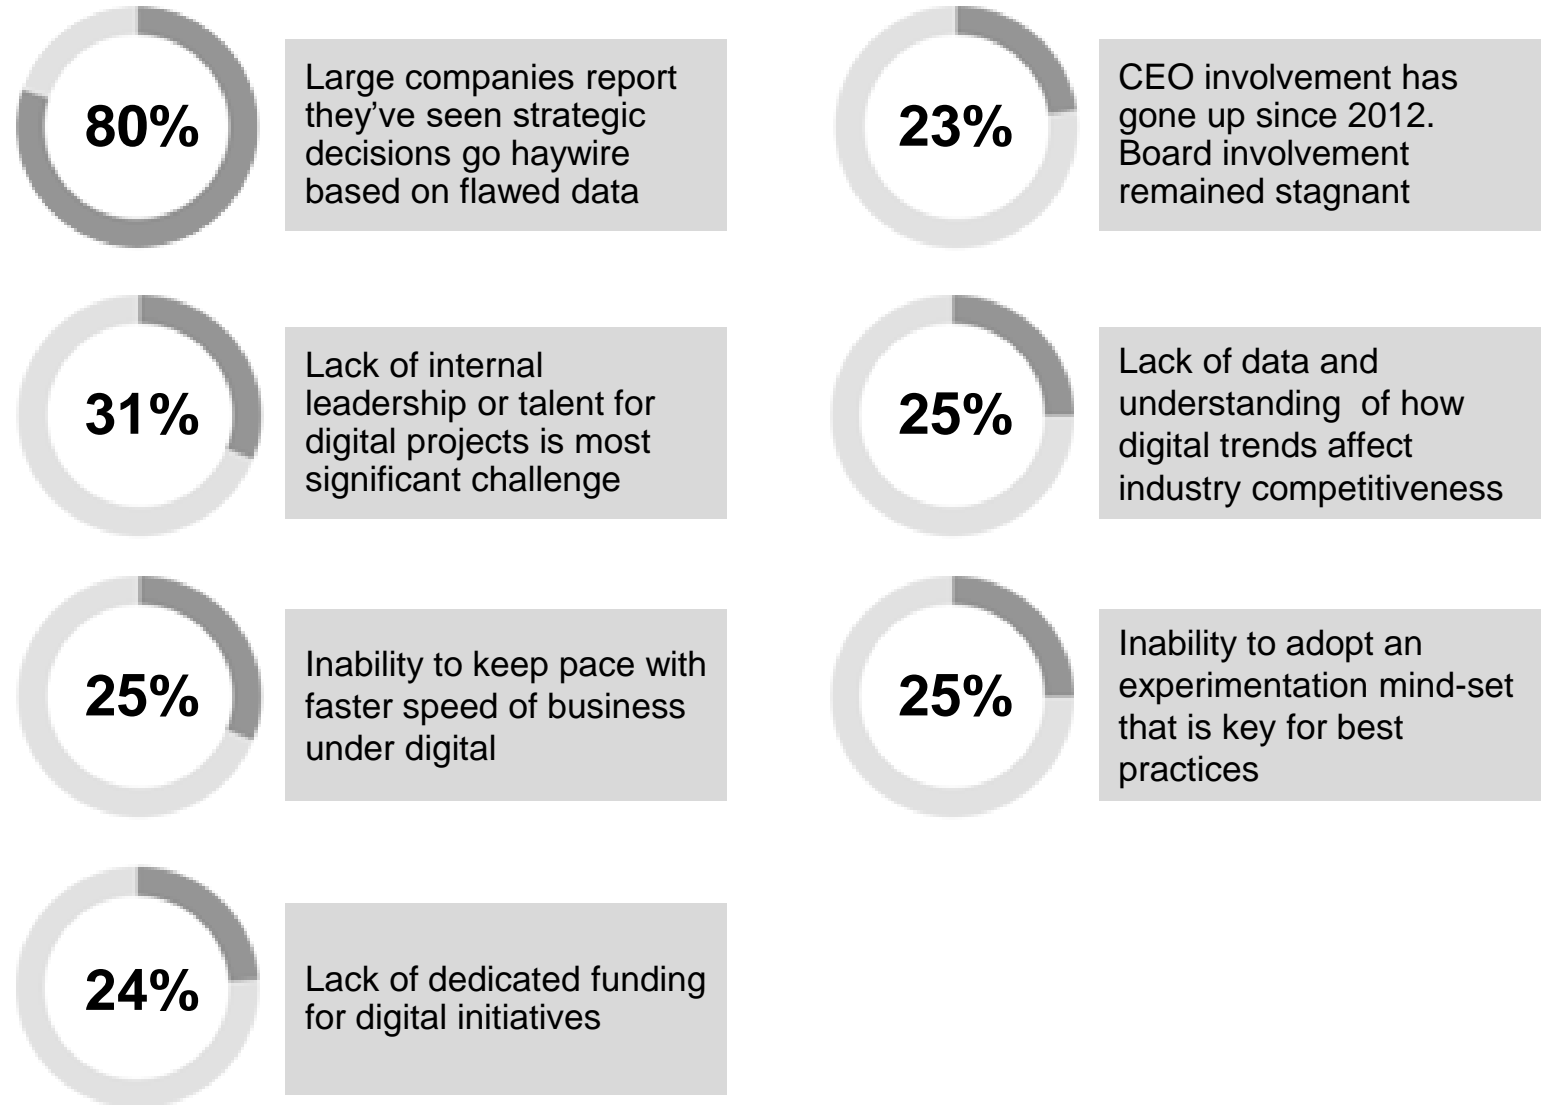

THERE ARE FORCES AT WORK

Creating opportunities and threats

Executives evidently see major obstacles

Re-use existing assets in building new processes and business approaches

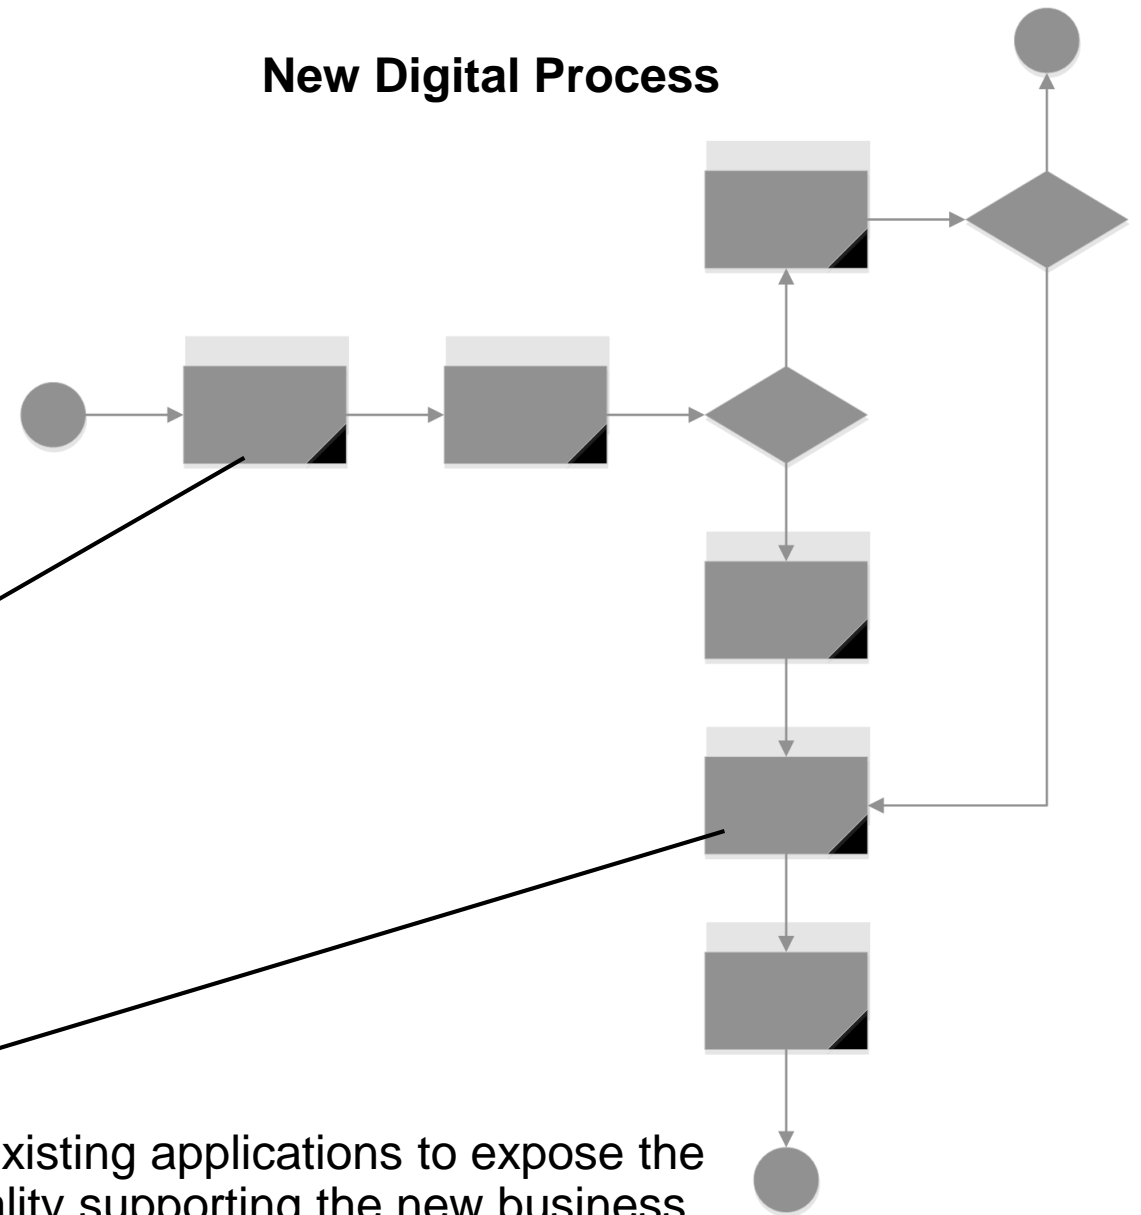

Application Portfolio supporting existing Business Processes

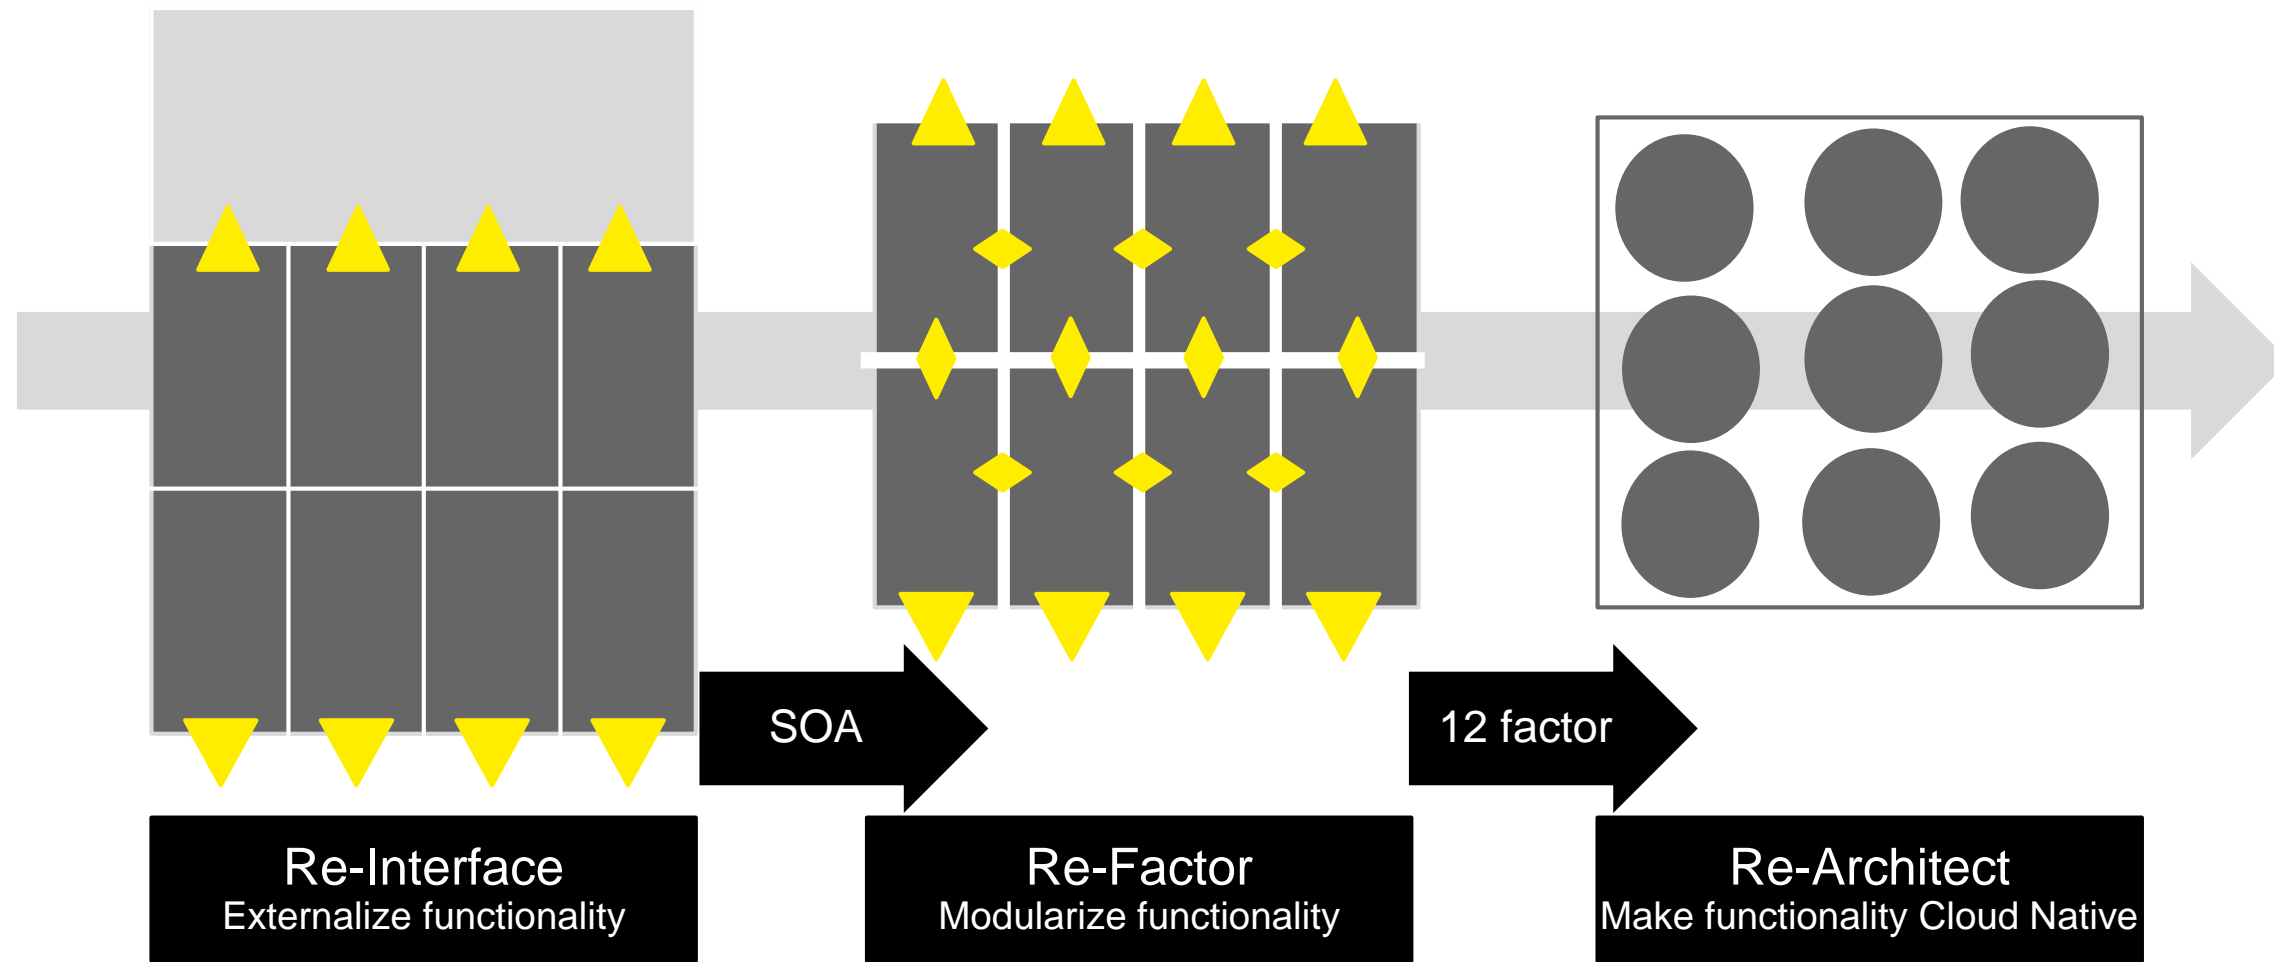

Enable existing applications to expose the functionality supporting the new business processes addressing the digital transformation

New Digital Process

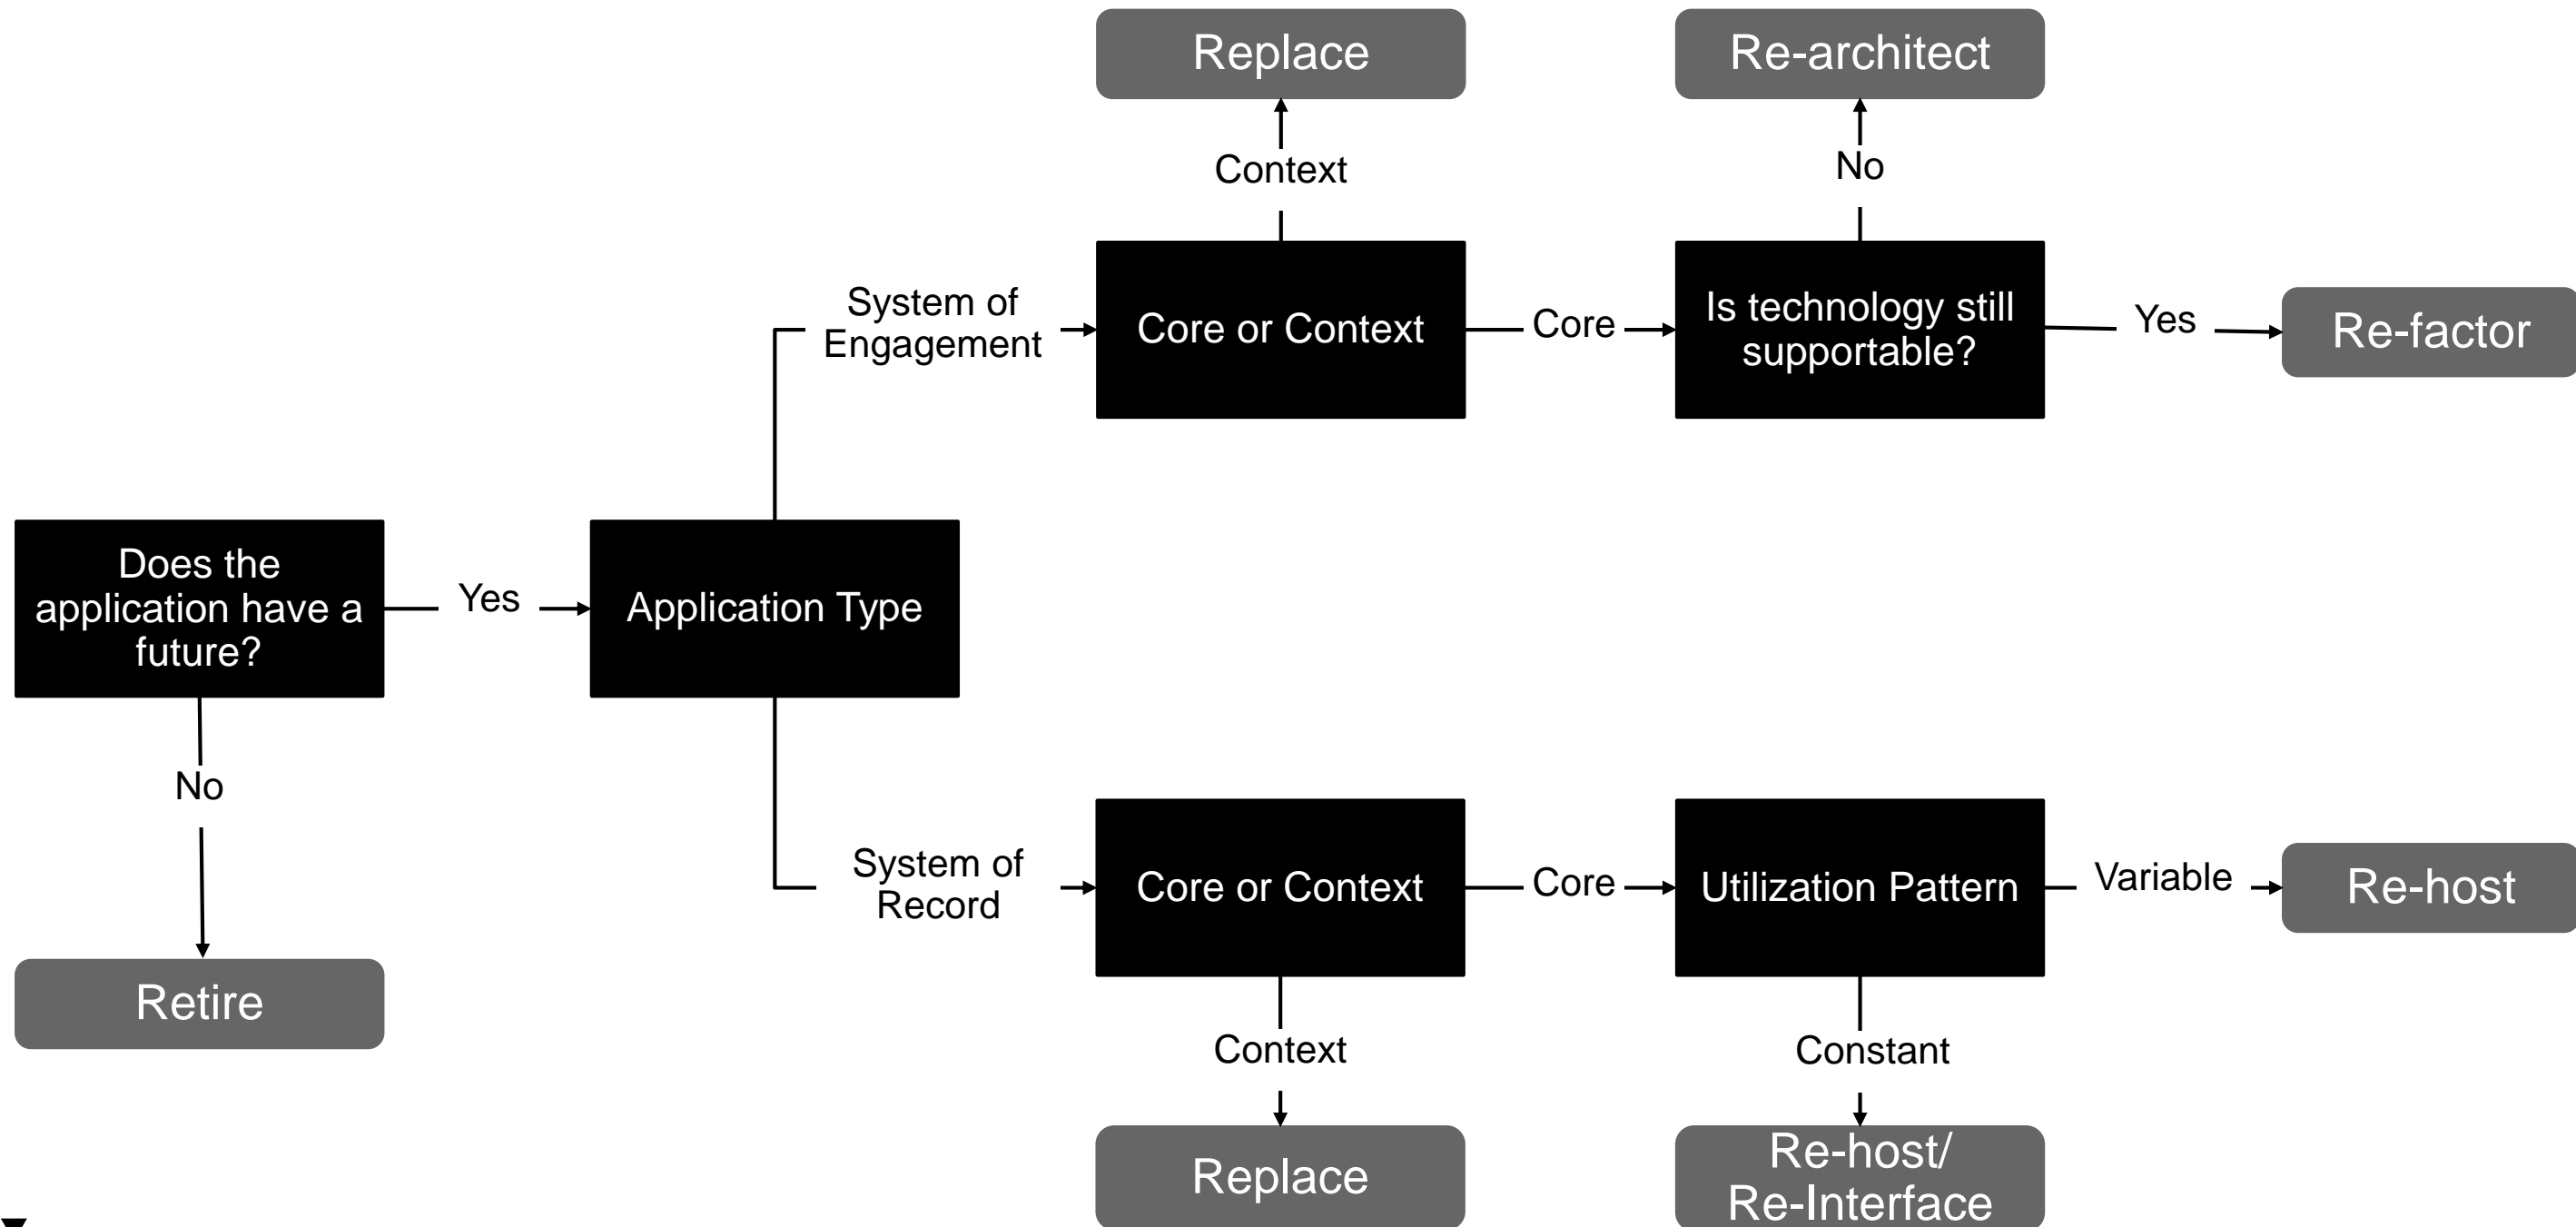

Transform your applications

Take advantage of Microservices, but how far do you go?

How important is this application to you?

Deciding where your application belongs

Sys Admin Enterprise CRM Mobile Apps Oracle Content Management
 Non-Production & Q-A App Dev. Sage Data Mining & Analytics Low-performance Media Sharing
 Microsoft Dynamics File Print Web Services SharePoint SAP Hosted E-mail

Requirements Filter

Availability Regulatory / compliance Workload and infrastructure complexity Demand / seasonality Workload transformation and cloud stack managed services Proprietary vs. open architecture

Build to Specification (CAPEX)

Dedicated

Virtual

Configure to Need (OPEX)

AWS, Azure, etc... (OPEX)

Leading our clients' digital transformations

DXC Technology Corporate Overview

Thrive on change

DXC Technology is the world's leading independent, end-to-end IT services company. We guide clients on their **digital** transformation journeys, **multiply** their capabilities, and help them harness the power of innovation to **thrive on change**.

CSC and HPE Enterprise Services brought innovation to clients for 60+ years

Together, we serve nearly 6,000 private and public sector enterprises across 70 countries

Our clients benefit from our technology independence, global talent, expertise and extensive partner network

We are uniquely positioned to lead digital transformations, creating greater value for our people, clients and partners

Industry-focused services and solutions

Insurance

We're the No. 1 provider of core insurance software and services globally. We support growth, speed to market and efficiency through digital insurance solutions and business process services.

Healthcare & Life Sciences

We provide industry-leading software and business process services to providers, payers, government health and life sciences firms. We focus on clinical care and operational efficiency with digital care transformation solutions.

Travel & Transportation

With 40+ years of industry experience, we support mission-critical systems for top airline, consumer travel, freight and logistics, and railway firms. Our services help clients support growth and transform operations.

Public Sector

We're one of the world's leading independent IT services providers to all levels of government agencies. We provide secure, 24x7 support to mission-critical systems and operations.

Energy

We've supported more than 400 energy businesses worldwide over 20+ years. Our solutions help clients rapidly seize market opportunities, gain competitive advantage and evolve with new business models.

Banking & Capital Markets

A leading provider of banking software and front-office managed trading solutions, we support banking and capital markets clients with 30+ years of industry experience, specialized services and resources to make transformation happen.

Manufacturing

A leading IT services provider to automotive, aerospace and defense, industrial, high tech and chemical firms, we combine deep expertise in manufacturing, connected products, analytics and security to help clients drive innovation.

Consumer Products & Retail

We help the world's leading consumer packaged goods and retail firms focus on consumer experience and help clients seize opportunities in the face of disruptive digital trends.

Communications, Media & Entertainment

We provide innovative business solutions to the world's leading communications, media and entertainment firms to transform their business, redefine the customer experience and capitalize on digital convergence.

Aerospace & Defense

A leading IT services provider to A&D firms, we help clients shorten time to market, gain insight from data and adopt digital technologies to accelerate innovation across manufacturing and supply chains.

9 global offering families

Cloud, Workload, Platforms & ITO

We help clients maximize their private cloud, public cloud and legacy infrastructure, as well as securely manage their hybrid environments.

Security

Our security solutions help predict attacks, proactively respond to threats, ensure compliance and protect data, applications, infrastructure and endpoints.

Enterprise & Cloud Apps

We provide industry, business process, systems integration and technical delivery experience to maximize value from enterprise application portfolios.

Workplace & Mobility

Our workplace, mobility and IoT services help clients embrace new ways of working and build a secure, user-centric, digital workplace.

Application Services

Our comprehensive services help clients develop, manage and modernize their apps.

Consulting

We help clients accelerate their digital transformations and business results with industry, business, technology and complex integration services.

Analytics

Our portfolio of analytics services and robust partner ecosystem help clients gain rapid insights and accelerate their digital transformation journeys.

Business Process Services

We provide seamless digital integration of front and back offices. The result: unlimited business outcomes.

Industry Solutions & Services

Our industry-specific solutions enable businesses to quickly integrate technology, transform their operations and develop new ways of doing business.

The industry-leading DXC Partner Network

Strategic Partners

Deep, comprehensive, global partnerships with joint business objectives and a drive to continuously solve complex, critical client challenges

Solution Partners

Regional, industry, offering or frontier relationships with specialized expertise to exceed our clients' expectations

Channel Sales Partners

Ability to scale globally and market and resell DXC offerings and services through experienced sales teams

Supplier/Reseller Partners

The essential components that complete DXC solution offerings with consistent and replicatable outcomes for each client

Note: Partner list not exhaustive

“Our clients are facing major disruptive changes. We’re meeting these challenges with highly talented people, an experienced hand and an independent view of technology solutions — so our clients can seize new opportunities and thrive on change.”

Mike Lawrie

Chairman, President and CEO of DXC Technology

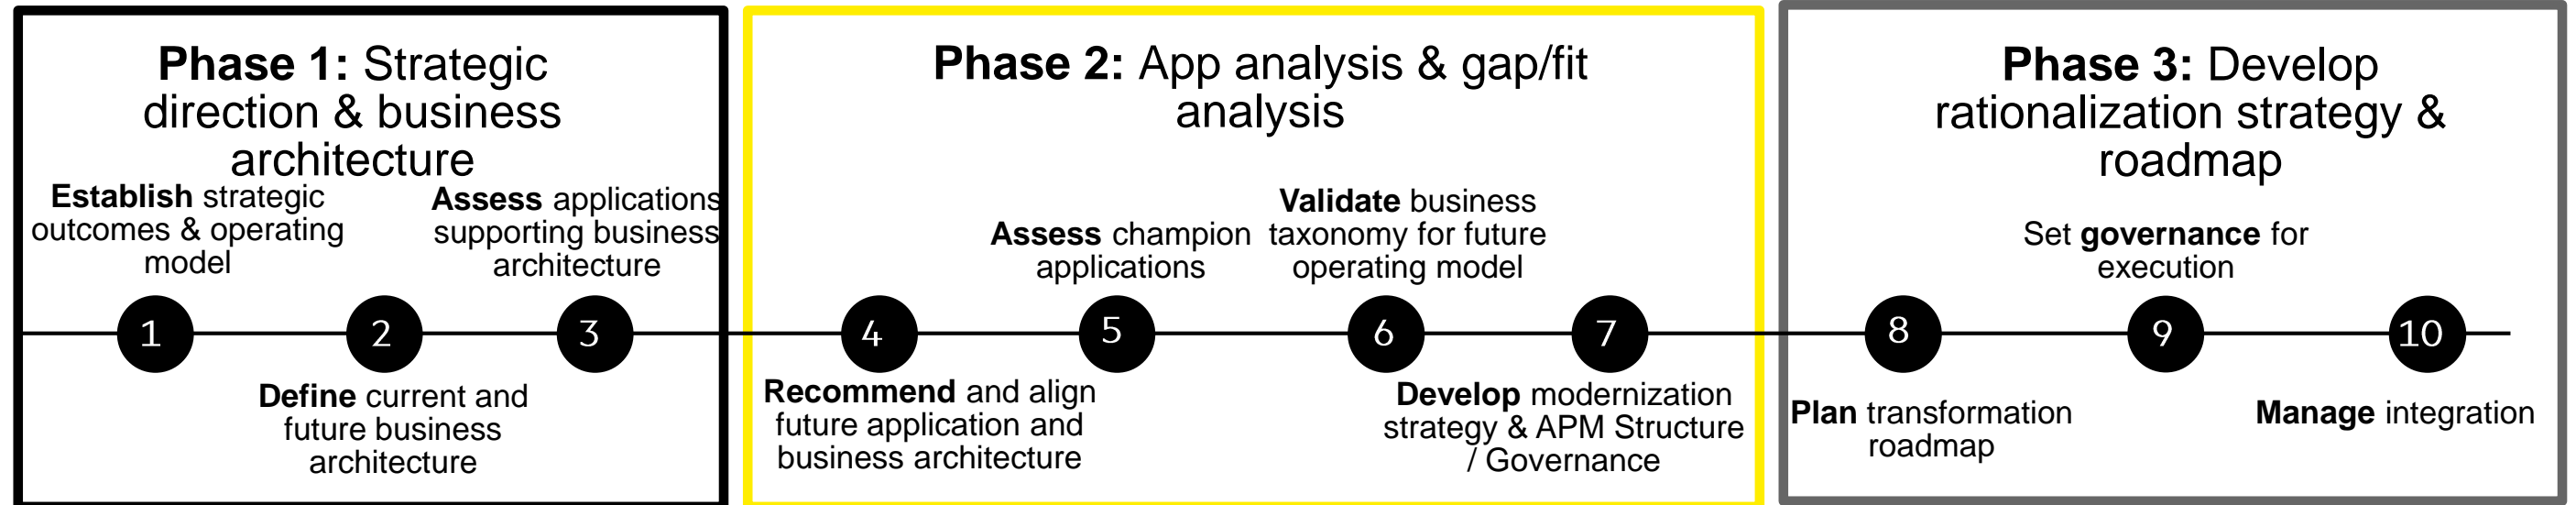

Transform your application

How does this work?

Transformation is a journey

General principles

Some clients ...

... Are thinking about transformation but are unsure where to start

- Want to know all the roles that would be involved
- Interested in reducing program risk
- Need a better understanding all the phases

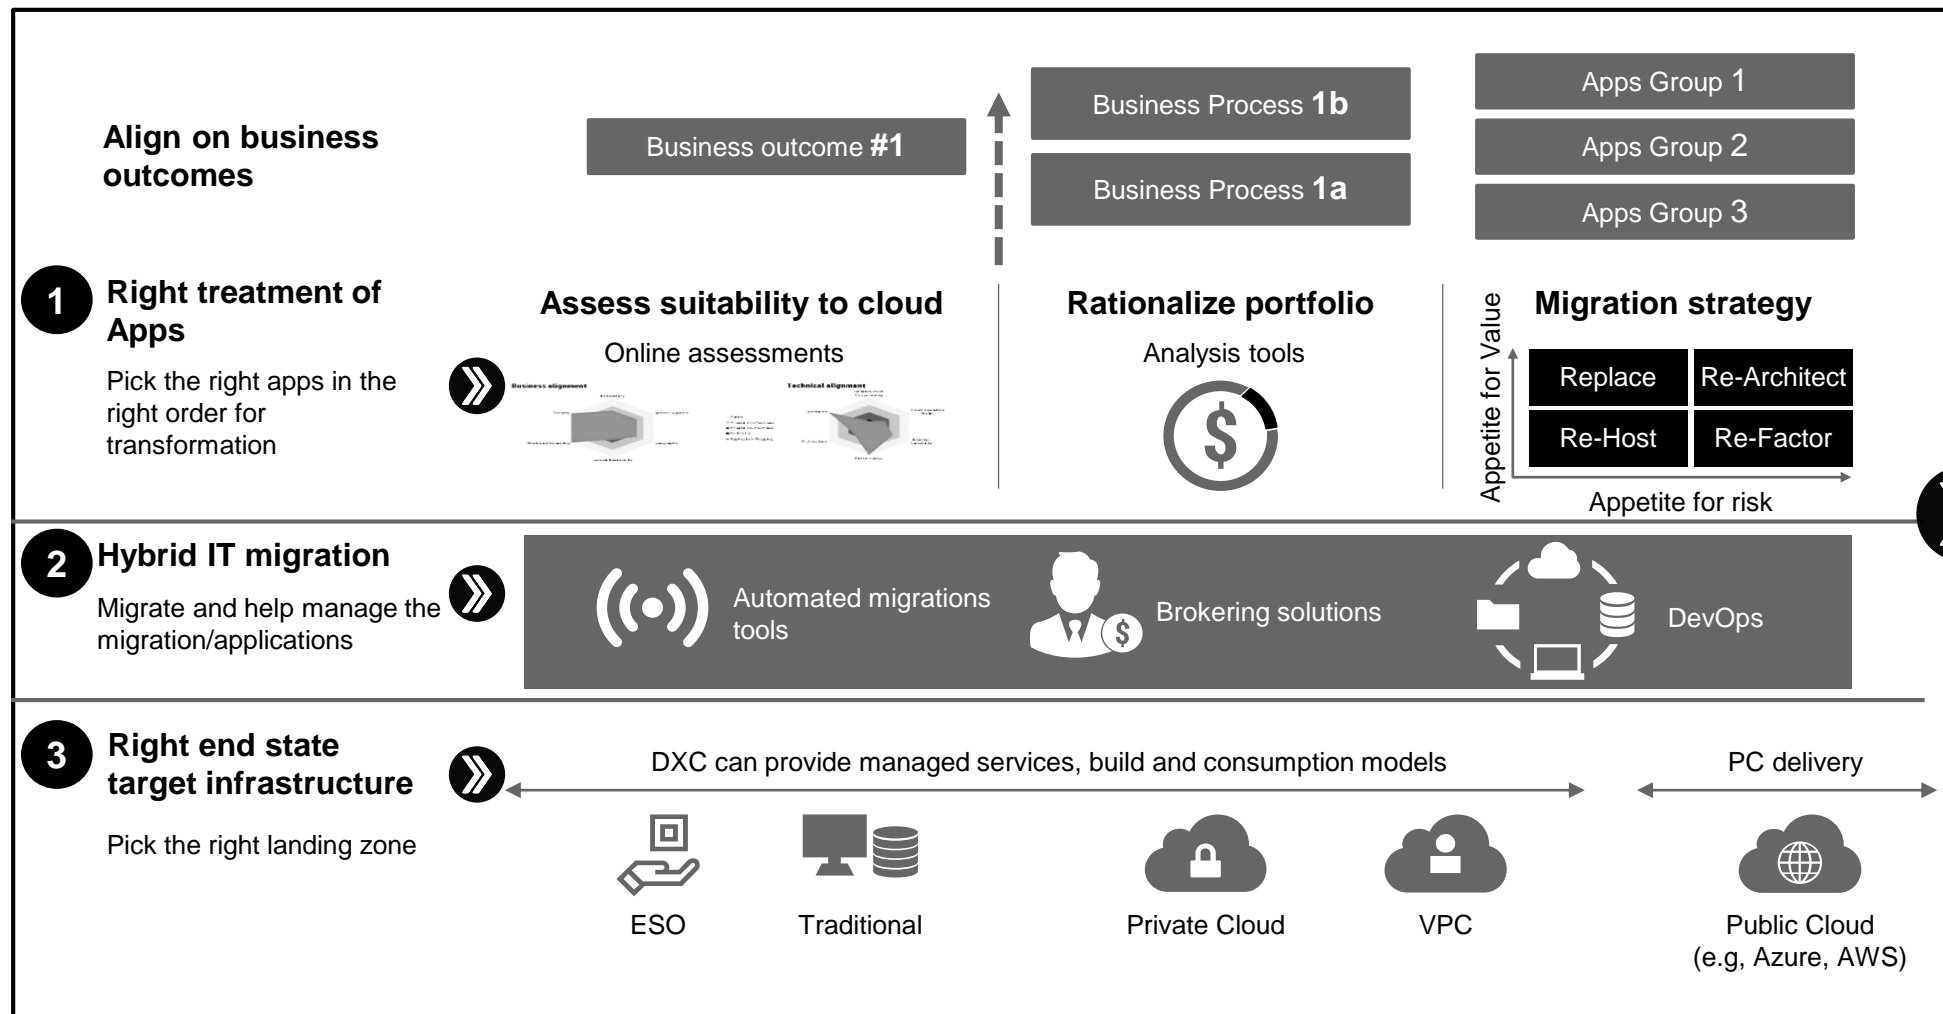

... Have tried (and failed) at transformation before

- Need to understand what they missed, or
- Want to complete the transformation they started
- Were unable to develop a business plan ... or get it approved

... Are stuck

- And need a **roadmap** to get them back on track

A proven approach to moving apps to the cloud while overcoming challenges and meeting business objectives

Reduce costs 15-30%
Pick the right apps that has the greatest value in moving

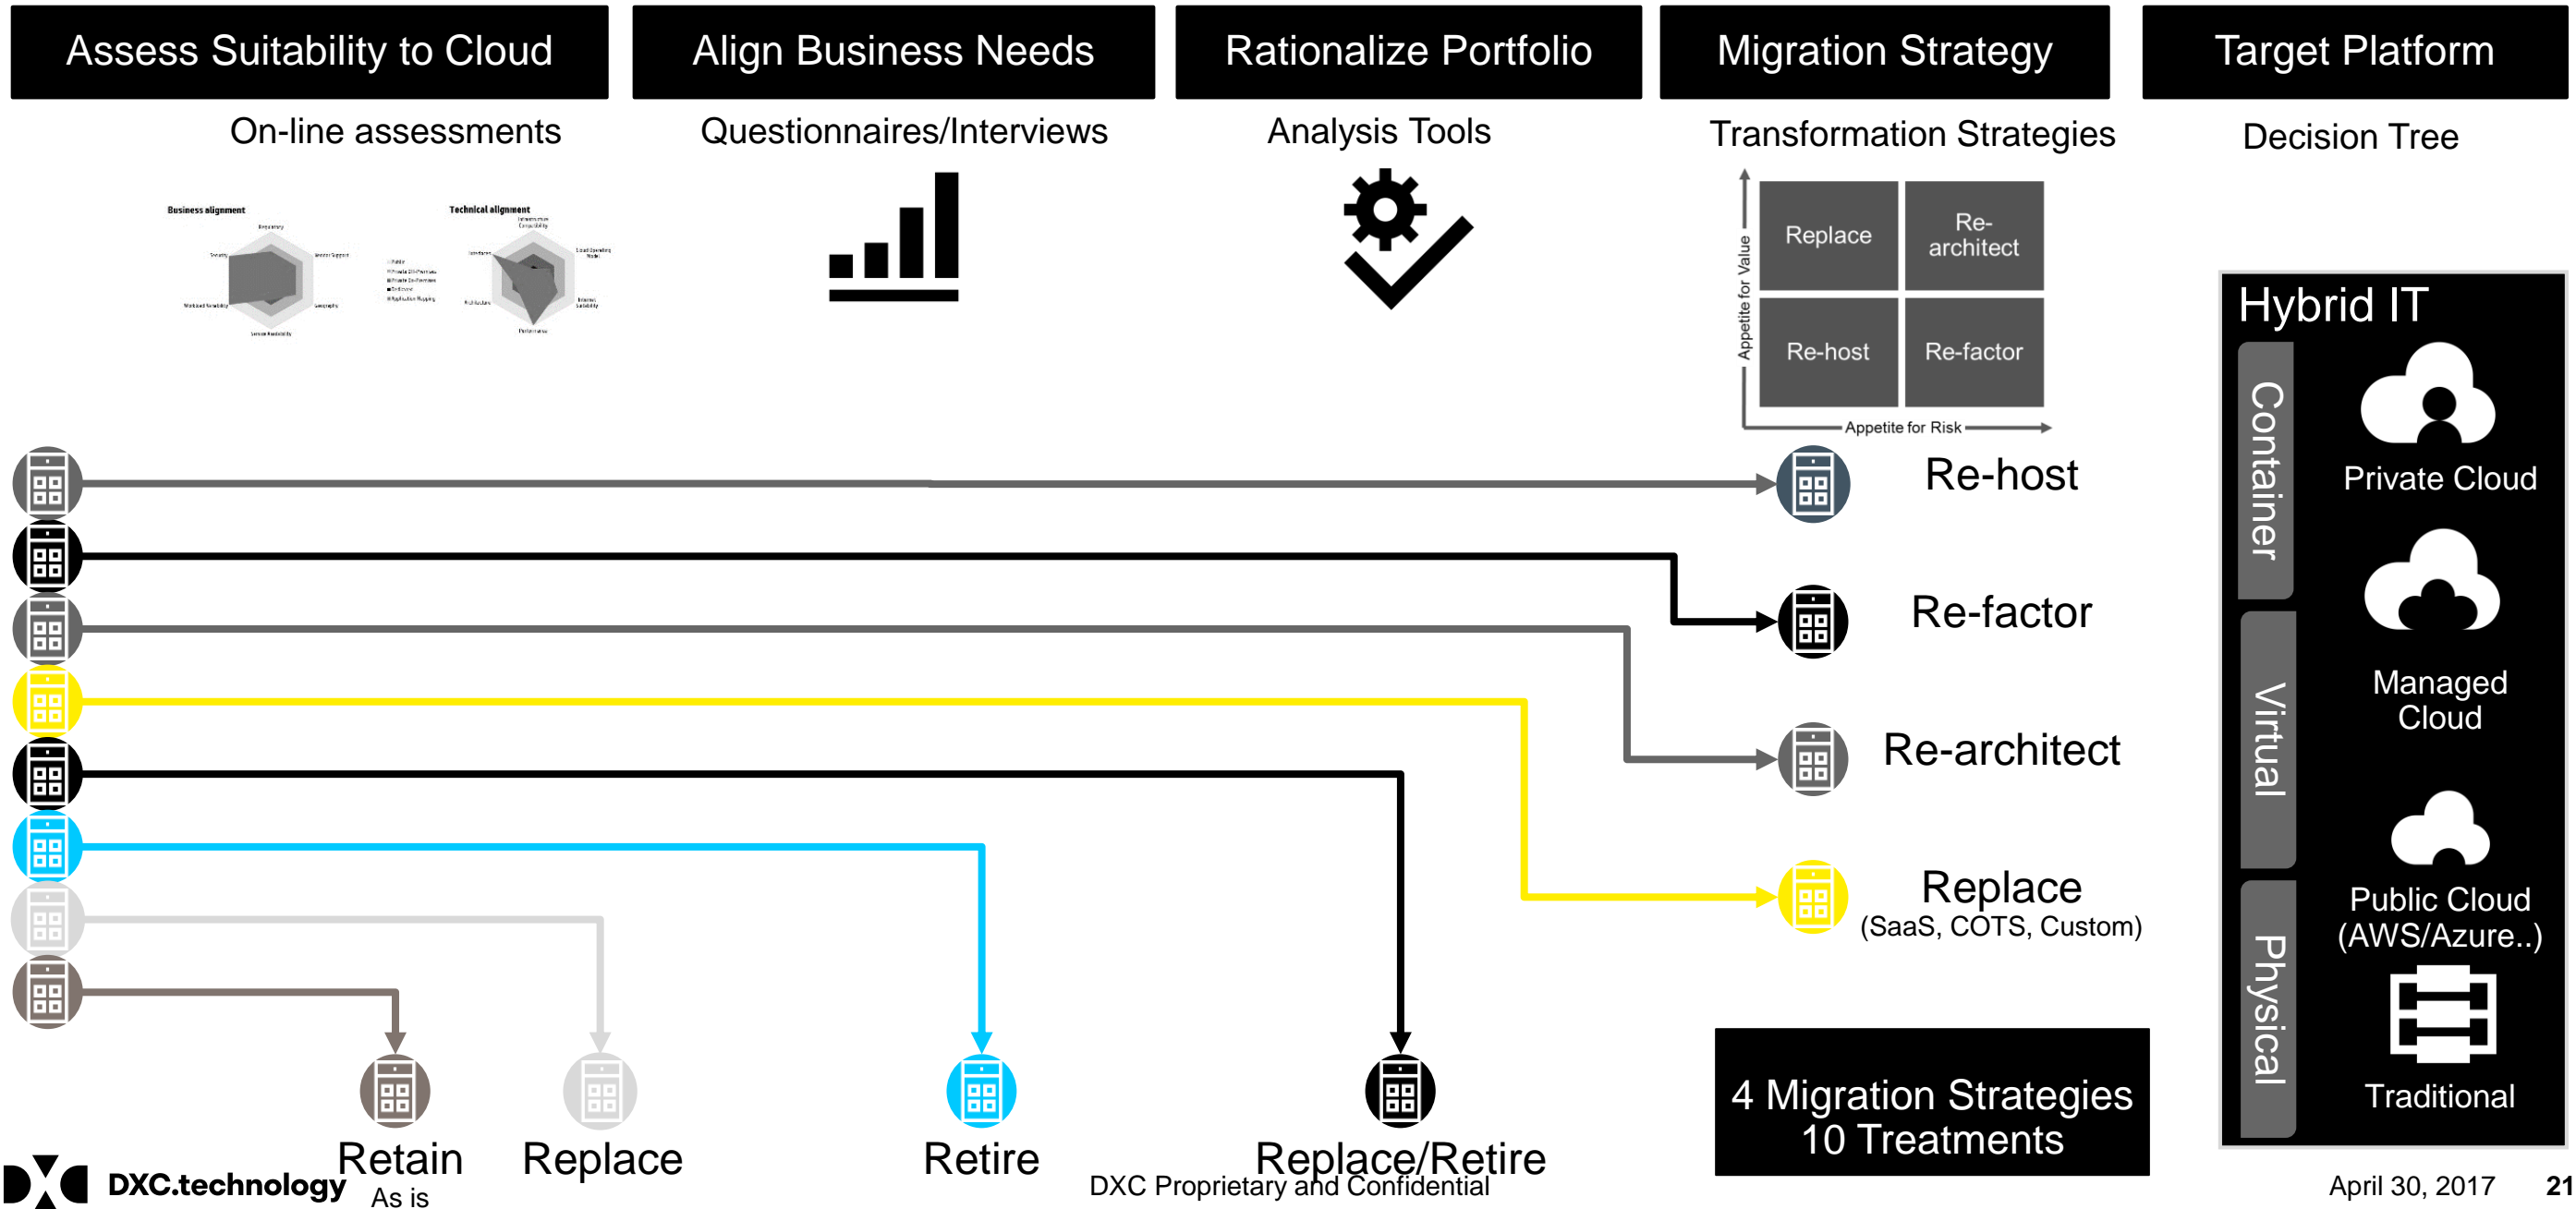

Reduce risks
Capex to Opex models, smooth transition through automation and without re-platforming for VPC

Speed to market 15-20%
Move from traditional to digital

Improve top line 4x rev over cost
Fund innovation vs. 'keeping the lights on IT'

Prepare your transformation

Proven methodology, experienced consultants and robust tools

Execute the Transformation

Governance

- Future Application Landscape
- Business Requirements
- Technologies
- Wave Planning
- Etc..

Assess

- Future IT environment
- Security
- Networking
- Operations
- Brokering
- Etc.

Design

- Review Application
- Define required activities
- Identify change patterns

Transform Application

- “Re-learn” application
- Perform appropriate treatment
- Update Operations Documentation
- Etc.

Migrate Data

Transform Infrastructure

- Build new environment
- Set-up new identity management
- Configure network & switches
- Establish security perimeters
- Etc.

Integrate

- IP-Address update
- Firewall rules request
- Domain connectivity
- Check App Integration
- Agents installation
- Etc.

Test

- Smoke Test
- UAT and Integration tests performed by client

Deploy

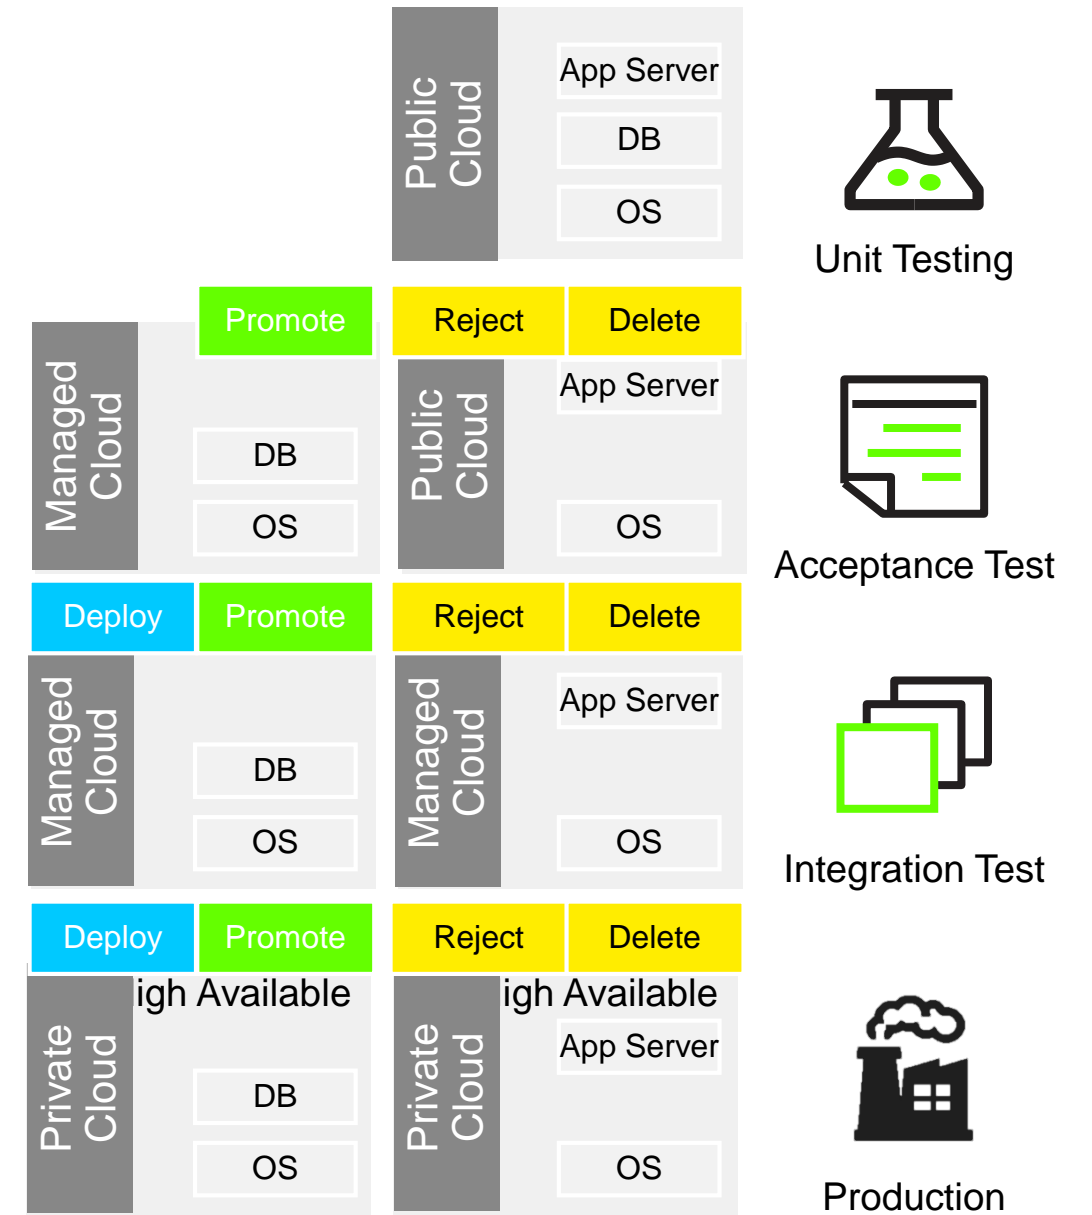

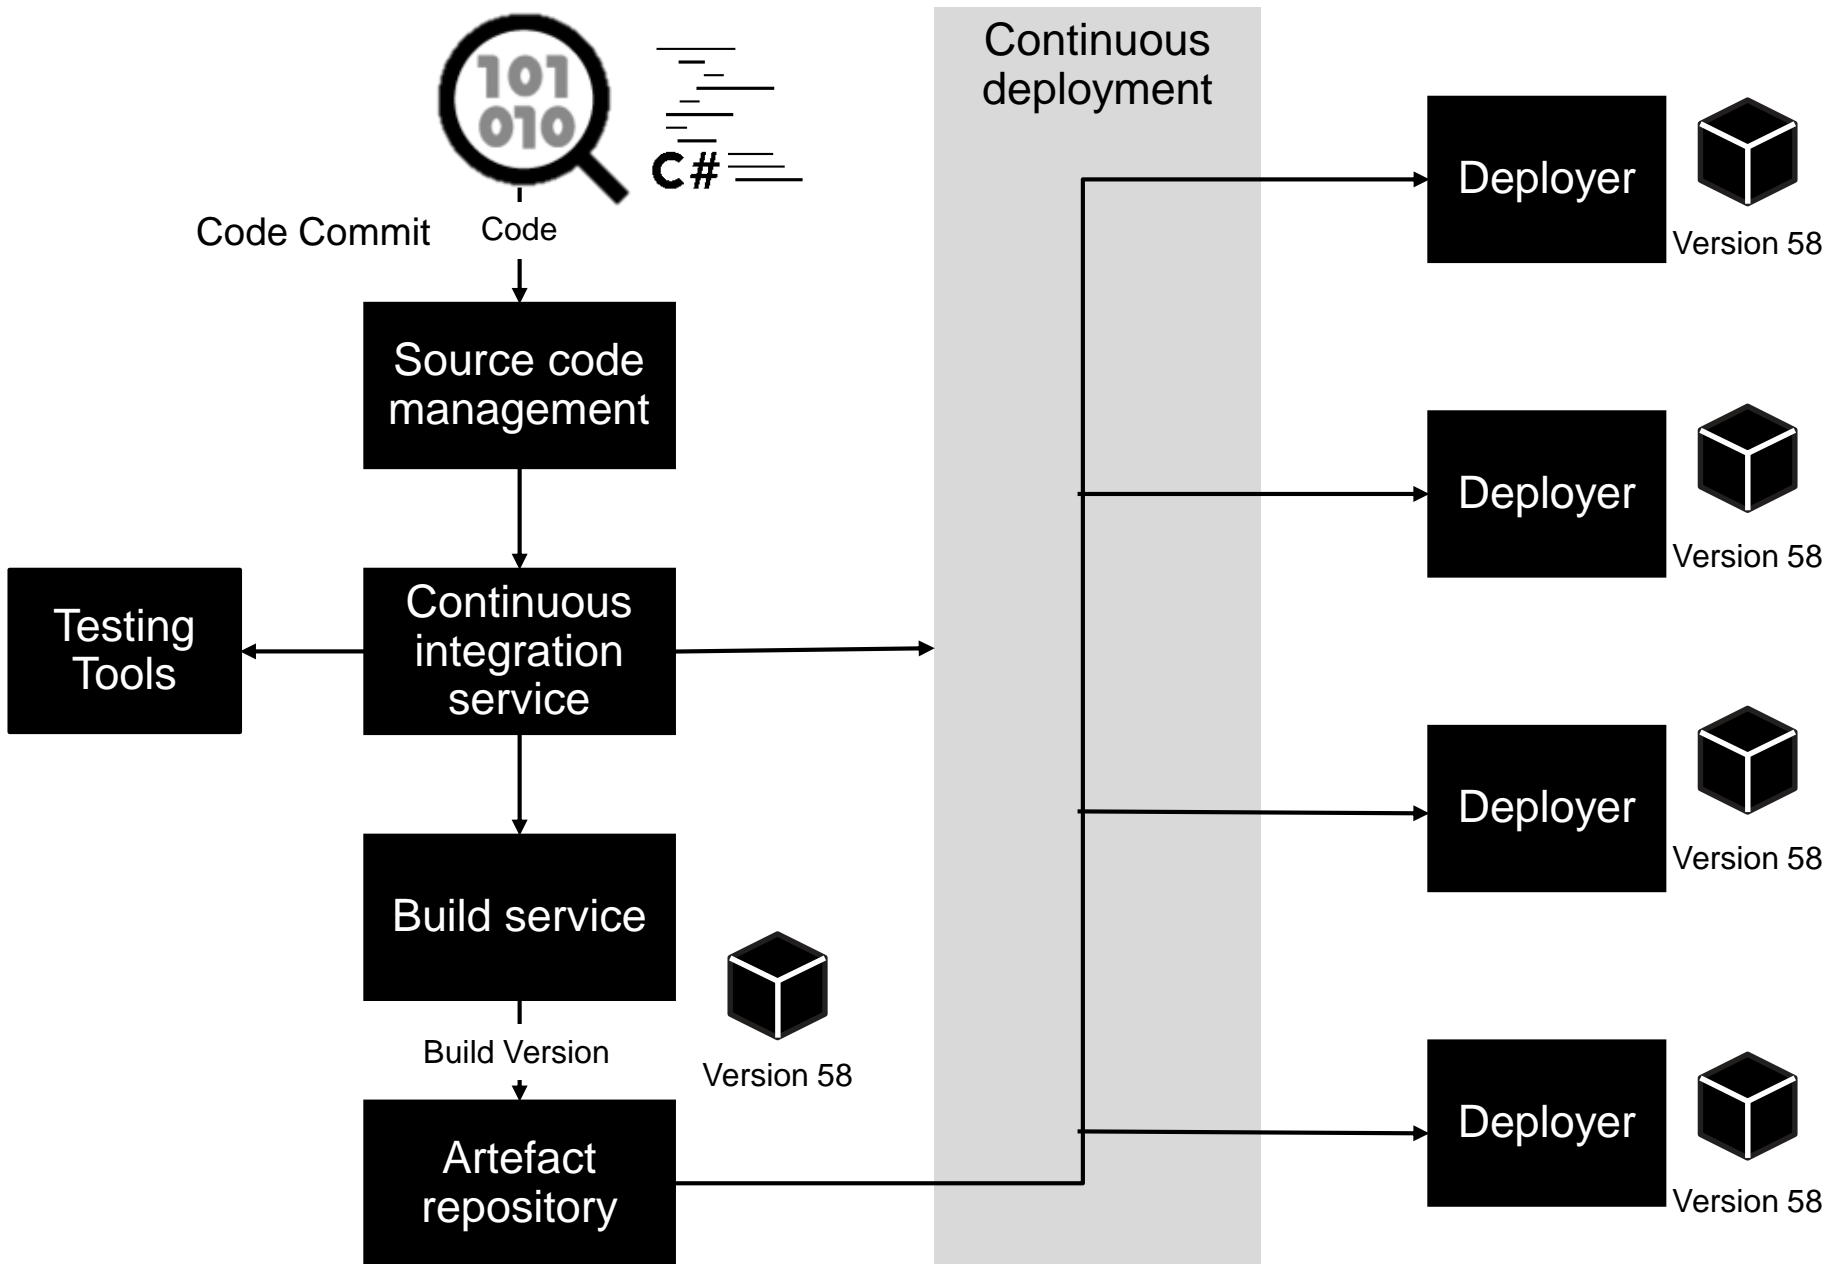

- Hand-over to Operations for actual deployment in release process

Establish and use automation

Beyond Transformation, Automation

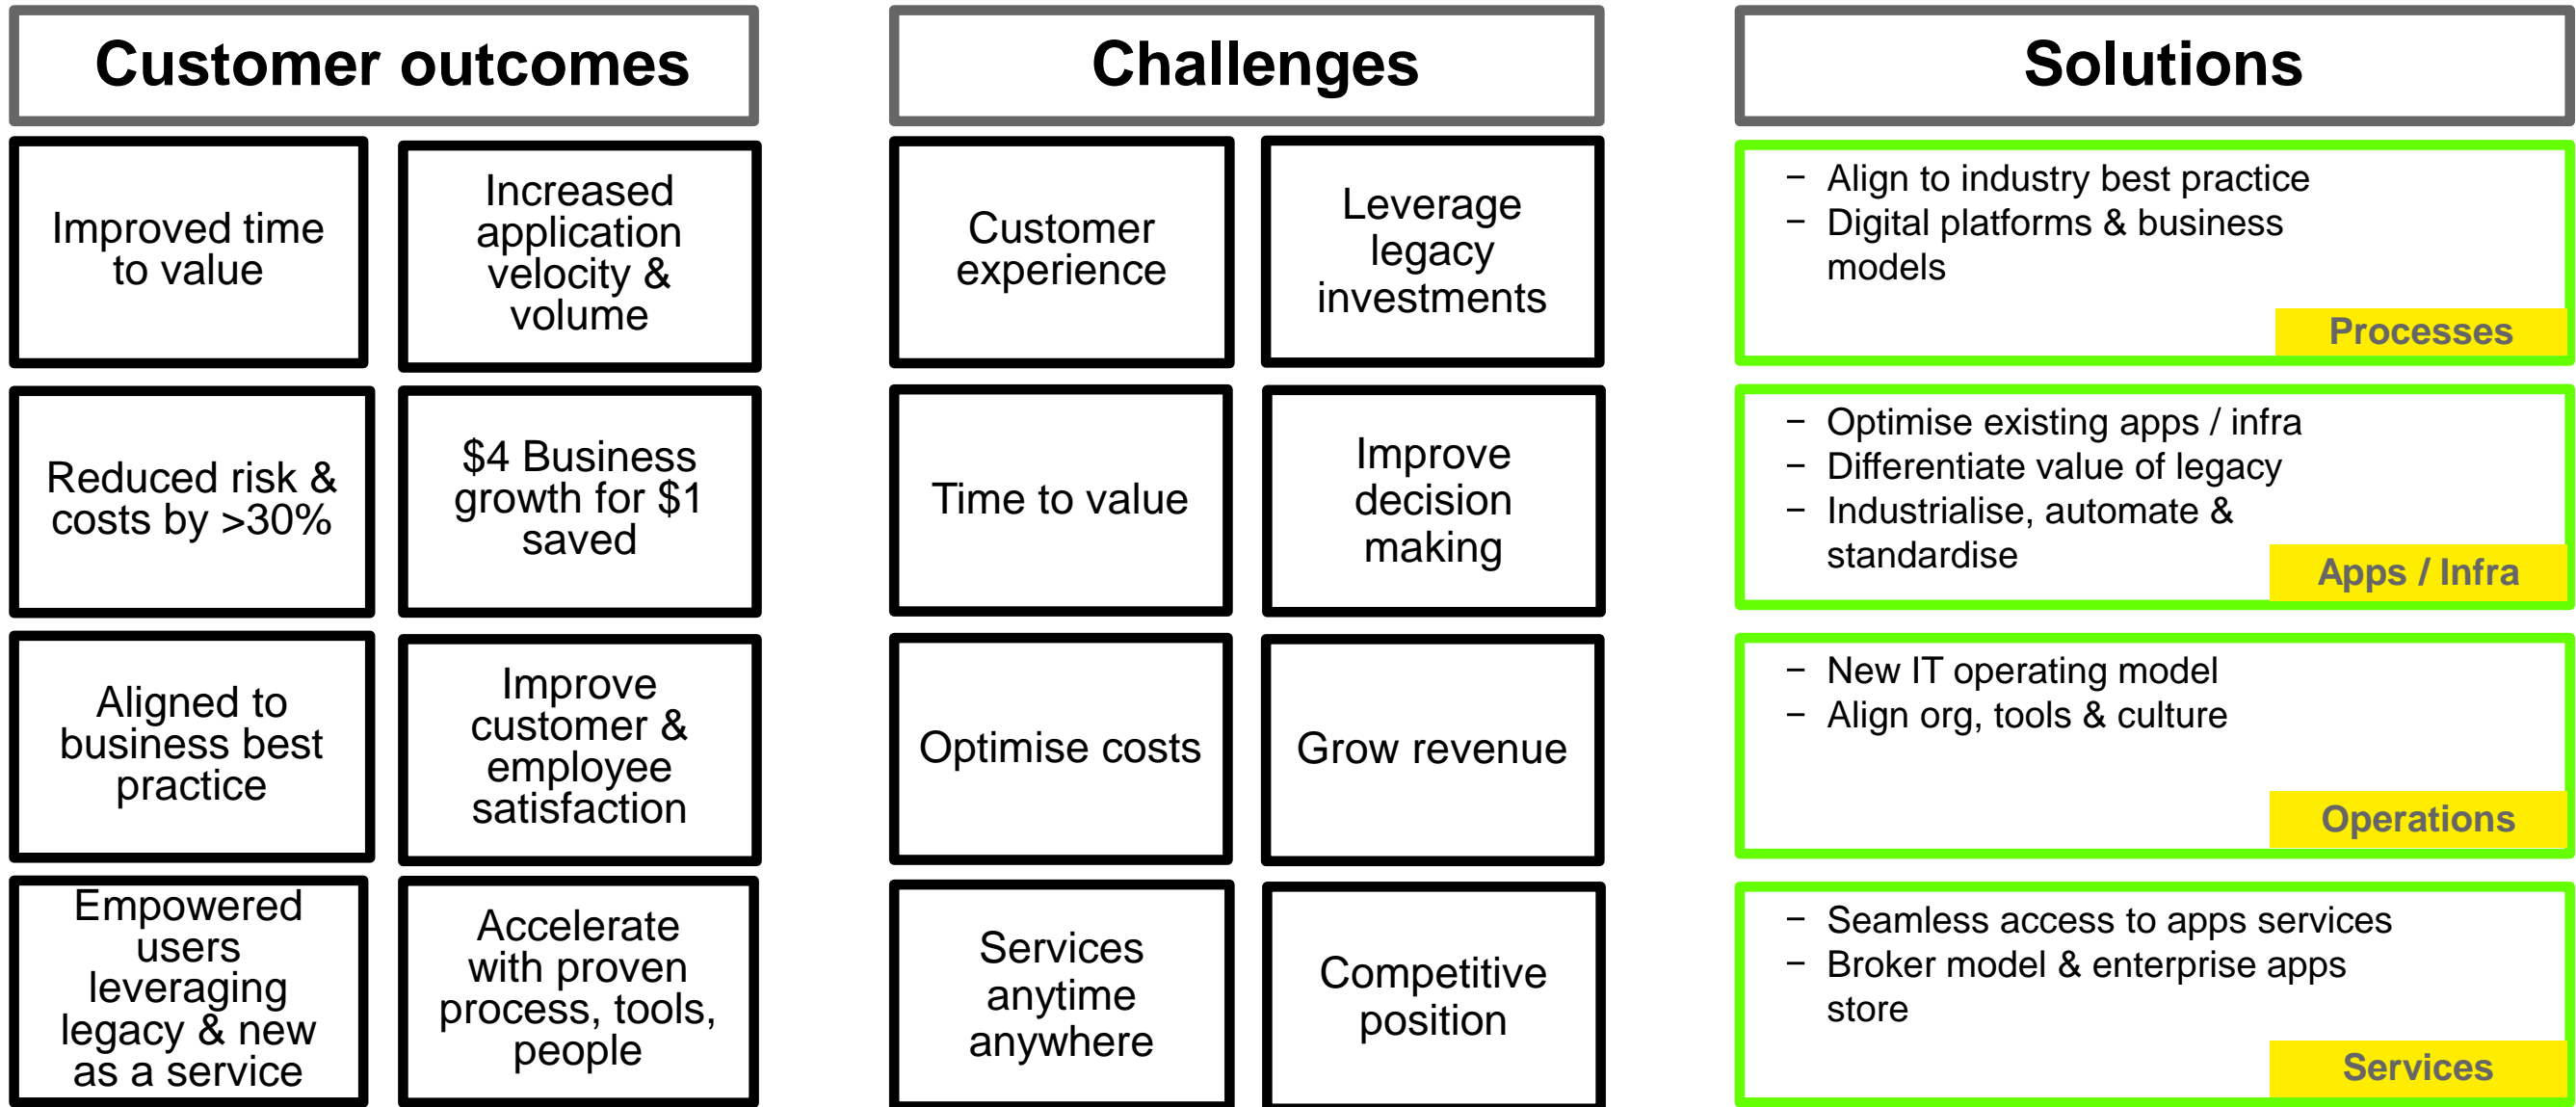

Improve responsiveness while reducing cost

What if...

The purpose of application transformation

Achieve desired business outcomes

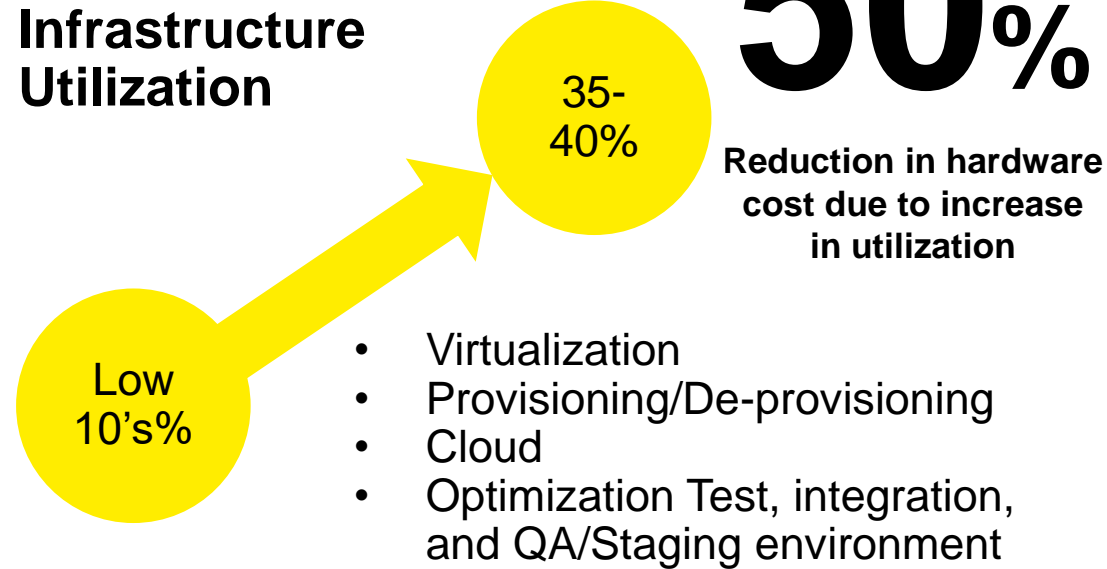

APPLICATION AND INFRASTRUCTURE MIGRATION

Different options - Levers

Area	Benefit Attainment (Return on Effort and Speed to Value)	Key Highlights
“Pure” Lift and Shift (physical move)	<p>Return on effort: 0% to 100% scale with a yellow slider at approximately 30%.</p> <p>Speed to value: 0% to 100% scale with a green slider at approximately 80%.</p>	<ul style="list-style-type: none"> ▪ Quick ▪ “Easy” to plan ▪ Simplified Execution
Simple Application Migration to FMO infrastructure (MPC) (Re-host Image Migration)	<p>Return on effort: 0% to 100% scale with a yellow slider at approximately 50%.</p> <p>Speed to value: 0% to 100% scale with a green slider at approximately 60%.</p>	<ul style="list-style-type: none"> ▪ Requires consistent environments ▪ Dependent on relative integration references (no hard-coded IP addresses) ▪ Rebuilds DC in MPC environment
Full Application Migration (Re-host)	<p>Return on effort: 0% to 100% scale with a yellow slider at approximately 70%.</p> <p>Speed to value: 0% to 100% scale with a green slider at approximately 40%.</p>	<ul style="list-style-type: none"> ▪ Needs application analysis ▪ Caters for environment upgrades and standardization ▪ Runs native on the new environment – more efficient use of infrastructure
Application Transformation (including Automation) (Re-host, Re-factor & Re-Architect)	<p>Return on effort: 0% to 100% scale with a yellow slider at approximately 80%.</p> <p>Speed to value: 0% to 100% scale with a green slider at approximately 30%.</p>	<ul style="list-style-type: none"> ▪ Addresses business strategies and requirements ▪ Automates provisioning and deployment ▪ Enables to take full advantage of cloud capabilities for applications where it makes sense
Portfolio Rationalization (Including DevOps) (Re-host, Re-factor, Re-Architect, Retire, Replace)	<p>Return on effort: 0% to 100% scale with a yellow slider at approximately 90%.</p> <p>Speed to value: 0% to 100% scale with a green slider at approximately 10%.</p>	<ul style="list-style-type: none"> ▪ Simplifies application landscape ▪ Reduces number of applications ▪ Enables automated provisioning and deployment ▪ Addresses business needs for responsiveness and agility

Potential Benefits

Infrastructure Utilization

10%

Reduction in operations due to standardization of platforms

Application Operations

5%

Reduction in licenses and support due to modern platforms

3x

lower change failure rate

Agile

Cloud

DevOps

200x

more frequent deployments

22%

less time on unplanned work & re-work

40%

Reduction in cost to run tests due to automation

60x

Reduction in deployment costs

Application Transformation, Development, Testing & Deployment

10%

Reduction in remediation effort due to automation of testing

15%

Reduction in number of tickets and incidents

24x

Faster failure recovery

Application Management

Thank you.
