Behind the Scenes
for those 23 days

“I was recently approached by a Defcon speaker to give a talk at the upcoming conference on the attacks CloudFlare witnessed directed at the LulzSecurity.com website. To properly cover the matter, there are some pieces of information that I would like to include that may be covered by our privacy policy. As such, I am seeking your permission before responding to Defcon.”

'All too often arrogance accompanies strength, and we must never assume that justice is on the side of the strong. The use of power must always be accompanied by moral choice.' – Theodore Bikel

As most of us are aware Lulzsec's webserver (www.lulzsecurity.com) is protected by Cloudflare, and as such when you do a WHOIS the IP you see **199.27.134.62** as the endpoint, which is assigned by CloudFlare, and not the actual IP of the server. On a side note: I am sure BTW that CloudFlare are enjoying the free yet dubious publicity and advertising they garner from Lulzsec using them to hide behind.

@LULZSEC

CLOUDFLARE®

Attacks We Saw

- Surprise: Actually quieter than a typical 3 week period for DDoS
- Some Layer7 attacks that were harmless
- Usual annoying Layer3/4 DDoS attacks that we mitigated

Anycast is your friend

Annoying Attacks

- Significant bandwidth hitting SJC
- Google ACK reflection
- Clever IP scan and attack on our router interfaces

LulzSec: Shetland teen charged over computer hacking claims

A man from the Shetland Islands has been charged with computer offences by police investigating hacking attacks.

Jake Davis, 18, a computer hacker, is charged with distributed denial of service attacks on the Serious Organised Crime Agency.

He faces five charges at Westminster Magistrates' Court, police said.

Police are investigating LulzSec.

Teenager charged with hacking offences

MARTIN WILLIAMS

Aug 2011

A TEENAGER from Shetland has been charged with computer offences by Scotland Yard detectives investigating hacking attacks.
Jake Davis, 18, who was arrested and taken to London, was charged with using a computer to commit an offence.
