How Gadgets Helped Mumbai Attackers

By Noah Shachtman 🖾 December 1, 2008 | 6:39 am | Categories: Gadgets and Gear, Terrorists, Guerillas, Pirates

The Mumbai terrorists used an array of commercial technologies — from Blackberries to GPS navigators to anonymous e-mail accounts — to pull off their heinous attacks.

For years, terrorists and insurgents around the world have used off-the-shelf hardware and software to stay ahead of bigger, better-funded authorities. In 2007, former U.S. Central Command chief Gen. John Abizaid complained that, with their Radio Shack

stockpile of communications gear, "this enemy is better networked than we are." The strikes that killed at least 174 appears to be another example of how wired today's "global guerrillas" can be.

As they approached Mumbai by boat, the terrorists "steered the vessel using GPS equipment," according to the Daily Mail. A satellite phone was later found aboard.

Once the coordinated attacks began, the terrorists were on their cell phones constantly. They used BlackBerries "to monitor international reaction to the atrocities, and to check on the police response via the internet," the *Courier Mail* reports.

The gunmen were able to trawl the internet for information after cable television feeds to the two luxury hotels and office block were cut by the authorities.

Mumbai attack: FBI helped decrypt GPS data

Ranjani Rajendra, TNN, 8 March 2009, 04:04AM IST

MUMBAI: It may come as a surprise that forensic labs in India did not have the technical wherewithal to analyze the most crucial piece of evidence linking Pakistan to the 26/11 attack - the GPS (global positioning system) handsets used by terrorists during the siege. The police was forced to send the sets to FBI to further its investigations and ultimately nail the Pakistani hand.

The terrorists were carrying five GPS phones with them and these contained a detailed account of the route they took to sail from Karachi to Mumbai. Thus when FBI's forensic labs gleaned the information from the handsets, it became clear how the attack on Mumbai was mounted from the sea by Lashkar-e-Taiba operatives.

A senior official from Mumbai's Forensic Sciences Laboratory at Kalina confirmed that the lab returned the GPS handsets used by the terrorists since they lacked the facilities to test them. The state-run lab has now ordered for software to study such GPS systems.

"The software helps investigate way points and identify the locations a person has visited apart from retrieving deleted data. However, the most important function of the software is to help form a correlation between different systems and GPS devices," said director of forensicguru.com, Sameer Dutt.

"The software also helps in decrypting data and tracing its origin. Even if three people using separate GPS devices go to different locations, they leave a trail leading to the single origin from where they all started," said former IPS officer Sanjay Pandey who runs an e-security firm.

Special: Samir Khan: I am proud to be a traitor to America | Exclusive: The New Mardin Declaration by al-Awlaki

All praise is due to Allāh, who created the Creation to worship Him alone, and ordered them to follow good and avoid evil, and forbade them from corruption on land and in the sea. As to what follows:

This is a message to the whole world about those who cause climate change and its dangers – intentionally or unintentionally – and what we must do. Talk of climate change isn't extravagant speculation: it is a tangible fact which is not diminished by its being muddled by some greedy heads of major corporations. The effect of global warming have spread to all continents of the world. Drought, desertification and sands are advancing on one front, while on another front, torrential floods

whom died of drowning.

In the same year in which [James E.] Hansen, NASA's senior expert, confirmed the seriousness of global warning, 140,000 died and 24 million were displaced in floods in Bangladesh alone; and the caravan of victims of climate change hasn't stopped since, so those behind it must be identified and a way of dealing with them specified. All industrialized countries, especially the major ones, bear responsibility for the global warning crisis, except that most of them have called on each other to commit to the Kyoto Protocol and have agreed to reduce emissions of harmful gases. However, Bush Junior – and prior to him Congress – rejected this agreement in order to

NEWS FLASH

In an effort to defame Prophet Muhammad (pbuh), Molly Norris of Seattle created a face-book page, Everybody draw Mohammed Day in which there are over 100,000 members, many of whom submitted insulting images.

Shaykh Abu Mustapha al-Yazid, the Amir of al-Qa'idah in Afghanistan was martyred in late May in an airstrike which also martyred his wife & 3 children. We ask Allah to accept them.

Alhamdullilah, Oil giant BP continues to lose billions of dollars with the oil spill. It is estimated that they have lost over \$20 billion in revenues. After many attempts, they are unable to contain the leakage which can now be seen in Florida.

THE **DUST** WILL NEVER SETTLE DOWN

FLEMMING ROSE CARSTEN JUSTE CARSTEN JUSTE SALMAN RUSHIDERS KURT WESTERGAARD AYAAN HIRSI ALI ULF JOHANNSON MOLLY NORRIS

E. Final preparation of the device:

- Pour some of the inflammable substance into the lamp. Do so gently in order not to tear the filament, which is very sensitive. The device would not explode if the filament is torn.
- 2. Insert the lamp into the pipe with the wires sticking out.
- 3. Fill in the pipe with the inflammable substance. Avoid having any of the substance on the treads of the pipe so that it won't ignite when closing the pipe.
- 4. Wrap tape around the pipe to close the hole which was drilled into the pipe only leaving the wires sticking out. The tape will surround the wires closing any gaps in the pipe hole and not be wrapped over them.

You may substitute the inflammable substance extracted from matches by gunpowder used in cartilages. You may

- Figure 1 displays the electric circuit in the clock when the hour arm hasn't touched the nail.
- 2. Figure 2 displays the electric circuit in the clock when the hour arm has touched the nail, lighting up the lamp.
- Now disconnect the test lamp from the circuit and connect instead of it the two wires coming out of the iron pipe. When the circuit is connected as in step two, the device would explode. You may hide the 9V battery inside the clock if you want to.

Take notice of the following:

- Make sure to cover all wires and also cover the battery in order to prevent any unwanted electric connections.
- Test the clock at least ten times on a test lamp to make sure it is working properly.
- It is better to use a small clock if concealment is important to you.

It is important to put a quantity of small nails on the surface of the iron pipe from the inside. You do that

by sticking them to the wall of the pipe by using glue. The pipe used here is a 2 inch one. The inflammable substance used to fill it was extracted from 80 match heads.

The explosion that

results from this device is a mechanical one. It results from the pressure caused by the gases and therefore it only works if contained in a high pressure environment. So you may use iron pipes, pressure cookers, fire extinguishers, or empty propane canisters. The point is that the inflammable substance needs to be

How to use Asrar al-Mujahideen: Sending & Receiving Encrypted Messages

Sending an important message in the old days only required a piece of paper, a writing utensil, and a trustworthy messenger that knows the location of the party you need to reach. Today, this is still an effective method if such a messenger is available and can get around without anyone stopping him. However, for the most part,

this method has slowly evaporated and is now replaced with the Internet. Its benefit is that if there is no messenger that exists, access to the other party is only a few clicks of a mouse button away. Its harm is that the spies are actively paying attention to the Emails, especially if you are an individual that is known to be jihādī-minded. So how does one go about sending important messages without it being noticed by the enemy? Following is one method and that is by using an encryption software.

One such software is a program created by our brothers called Asrar al-Mujahideen 2.0. Here, we will discuss how to use this program, how to create your key, how to send and receive the public key of the other party, and how to check if your version of the software is forfeited or not. There are many things you can do with this program besides sending and receiving encrypted messages; we will cover those aspects in later issue, In Shā'

TECHNICAL DETAILS

IKRIMAH AL-MUHAJIR EXPLOSIVES DEPARTMENT

Translated by al-Malahem Media

The most important aspect of preparing for the enemy is having the proper creed. All victory is from Allah and thus we need to have true faith in Him. After that we need to prepare the means that are needed to fight the enemy. In this article we will go through some of the technical aspects of the explosive packages.

Metal Detection Equipment:

We have been blessed by Allah to be able to sidestep the metal detection equipment and this is evident in the operation of Umar Farouk and the operation of Abul Khayr, may Allah accept him. That capability was a result of avoiding the use of metals altogether in our detonators. We have developed five such detonators.

Sniffers:

The first X-Ray machines where dual color followed by three colors and eventually six colors. Metals show up in three colors, organic material shows up in two colors and inorganic material in one color. The color depends on the atomic number of the scanned material. There are other types of machines that we have not mentioned here but we talked about in an article by the Explosives Department and published in the twelfth issue of Sada' al-Malahem.

So how did we succeed in sidestepping the X-Ray scanners?

We used a device that contains organic, non-organic material, and metals. The toner cartridge contains the toner which is carbon based and that is an organic material. The carbon's molecular number is close to that of PETN. We emptied the toner cartridge from its contents and filled it with 340 grams of PETN. We then

"The HP Printer toner cartridge contains the toner which is carbon based and that is an organic material. The carbon's molecular number is close to that of PETN. We emptied the toner cartridge from its contents and filled it with 340 grams of PETN.

We then inserted the detonator. We designed the detonator to be short so that it wouldn't be detected and we filled it with 4 grams of Lead Azide. We connected the wires from the circuit to the toner in a way that would raise no suspicions if inspected.

For the circuit we used a Nokia mobile phone. We removed the circuit board from the mobile and attached it next to a circuit board of the printer so if passed through a scanner the mobile circuit board would blend in with the circuit boards of the printer and even if opened it would not be recognized as a mobile since we used only the circuit board of the mobile."

```

فن إخفاء إلهلفات

و لنبدأ بشرح الخيارات في الملف النصى الآن.

3) الخيارات المتاحة

الخيارات المتاحة كثيرة و لكن سيتم هنا شرح الخيارات المهمة لنا:

أ) جدول المخفيات (Hidden Table):

و هنا في هذا القسم يتم وضع لائحة بأسماء الملفات التي نريد إخفاءها، وكذلك المجلدات. والإمكانيات المتاحة في هذا القسم هي كالآبق:

- إخفاء جميع الملفات والمجلدات التي تبدأ بكلمة معينة. كمثال على ذلك لو أردنا إخفاء جميع الملفات التي تحتوي على كلمة جهاد نكتب الآتي: *jehad ، وهذه تخفي كل الملفات التي تحتوي على كلمة جهاد في أولها أو آخرها أو في وسطها.
- إخفاء ملف محدد في مكان محدد مثل c:\fajr\abomosab.jpg ، وهنا إما أن نقوم بإخفاء المجلد كله، أو إخفاء اسم الملف إذا كان الاسم فريداً.
 - 3. إخفاء مجلد ما بما فيه مثل C:\fajr

طبعا يجب ملاحظة هنا أنه بالإضافة للملفات التي نريد إخفاءها فإننا بجب أيضاً أن نقـــوم بإخفــــاء ملـــف الرووت كت, وهو في هذا المثال اسمه hxdef100.exe.

و مثال على هذا القسم من الملف يكون كالآتي:

[Hidden Table]

*hxdef
rcmd.exe
jehad*
abomosab.jpg
fajr

How to use Asrar al-Mujahideen: Sending & Receiving Encrypted Messages

Sending an important message in the old days only required a piece of paper, a writing utensil, and a trustworthy messenger that knows the location of the party you need to reach. Today, this is still an effective method if such a messenger is available and can get around without anyone stopping him. However, for the most part,

this method has slowly evaporated and is now replaced with the internet. Its benefit is that if there is no messenger that exists, access to the other party is only a few clicks of a mouse button away, its harm is that the spies are actively paying attention to the Emails, especially if you are an individual that is known to be jihādi-minded. So how does one go about sending important messages without it being noticed by the enemy? Following is one method and that is by using an encryption software.

One such software is a program created by our brothers called Asrar al-Mujahideen 2.0. Here, we will discuss how to use this program, how to create your key, how to send and receive the public key of the other party, and how to check if your version of the software is forfeited or not. There are many things you can do with this program besides sending and receiving encrypted messages; we will cover those aspects in later issue, in Shift Allah.

I. CREATING YOUR KEY

After you download Asrar and open the program, you will see the main interface as is:

The first thing you need to do is create a key for yourself. So go ahead and click on Keys Manager on the left hand side menu. You will get a small pop-up menu looking like the image to the left. Go ahead and click on 'Generate Keys' towards the bottom. You will get a pop-up looking like the image on the right:

SECURE COMMISSION THREE

In the first field, you type in your username that you would like to use; it has to be at least 5 characters. If you would like to use Arabic, you just have to click on the button to the far right to change the language. Then for the passphrase, enter in a password that is easy for you to remember, but difficult for anyone to figure out; it has to be at least 8 characters. Afterwards, click on 'Generate Now' at the bottom. This will take some time to create, so be patient. Mines took 10 minutes, so don't be surprised if it's longer.

Afterwards, click 'Close', Now you are back to the previous pop-up. Click on 'Import Key' and import both the public and private keys. When you do that, it should look like what I have below. When finished, click 'Close',

el-Casts' documentary.)

The problem of the Jurgo is not a religious problem. It is a problem concerning the floodant of women, the disprity of women. The laugh is not a religious symbol but a sign of subservience, if abavement, I want to say solemnly that it is not welcome on the territory of the French Republic. We carried accept in our country women who are prisoners belond a grid, out off from all social life, deprived of any identity. This is get the french Republich keep about the dignity of women.

This bush fresher will have been an having

Gengel Inchurch

Hear the World...

It is with no doubt that we today Muslams, followers of Islam, are attacked and occupied by foreign infide! forces. The Crusade has already scarted against Islam and Muslams with Carpoons about our beloved Prophet as war drums. Procedul protest have achieved nothing. A fighter who gives his life to Allah can never doobey vis commands; friends with peaceful protest, can you sell me a way to save the appressor? You would have to agree to the fact that there's a force out there thans, fighting the West, and is delivaring them.

(Raisel Shahzaid, VK Times Square bunder is an e-mail)

You're seeing individuals who have been radicalted and who hold American charmship who have been willing to undertake these measons against us. And it's pretty clear that people like Awleki in himmen and others see any kind of an atrack impler the United States, even if it's a small scale atrack, compared, Say, to the Whole States Center, the lowers, who see that in a success for them. So that makes the challenge for the FBI and the intelligence agencies and the Department of Justice and local publics that much temphers. Sectione you may not have a big, complex pilot or whoing a let of people that might be easier to detect. 36.5 Sportals of Delvius, Rebert Gared.

In the book, Decision Points, he will reveal all the bad decisions and matakes that George Bush made as President. This is volume one. The bush made as president to the president of the point bush new manual.

in a sense, They're princy), buy lights for angiving jihadists. They're got an aeti-Western, arri-Jorophotese, or ri-loss, proal-Queda missage, which shallow howstorof intelligence howers, 60% belong about the seams thrown Secret years to MCS.

But also to be able to reach out to other faths and find the common humanity that brings is all together hand his wines such as taiving tolerance for other faths, and five said that tolerance is such as eggly word, and is shouldn't be tolerance, it should be acceptance, we need to accept each other revide of Islam as Christianing fid with the different faths and we should be able to reach out to other faths in acceptance and not just tolerance. [Ring 'Adultal' I of Instance, or a his bits intension, openity accepting when Risa has reported.

TESTIMONY

Is Al Qaeda's Internet Strategy Working?

BRIAN MICHAEL JENKINS

CT-371

December 2011

Testimony presented before the House Homeland Security Committee, Subcommittee on Counterterrorism and Intelligence on December 6, 2011

This product is part of the RAND Corporation testimony series. RAND testimonies record testimony presented by RAND associates to federal, state, or local legislative committees; government-oppointed commissions and panels; and private review and oversight bodies. The RAND Corporation is a nonprofit research organization providing objective analysis and effective solutions that address the challenges facing the public and private sectors around the world. RAND's publications do not necessarily reflect the opinions of its research clients and sponsors. RAND® is a registered trademark.

Takeaways

- Not all extremists are uneducated villagers riding a camel
- These guys know how to use Photoshop.
- And Final Cut Pro. And Apache. And PGP.
- They release their own public-key crypto tools
- We should not underestimate them.
