Scorecards

The graphs below represent two types of scorecards. The first shows government-wide performance towards the Administration's Priority Cybersecurity Capabilities. The FY2013 FISMA metrics provides more details on the calculation of the government-wide score. The remaining scorecards show individual Federal department and agency performance towards the Administration's Priority Cybersecurity Capabilities. Note the FY2013 FISMA targets are different from the government-wide CAP targets for FY2014.

Government-wide performance towards the Administration's Priority Cybersecurity Capabilities as of FY13 Q1
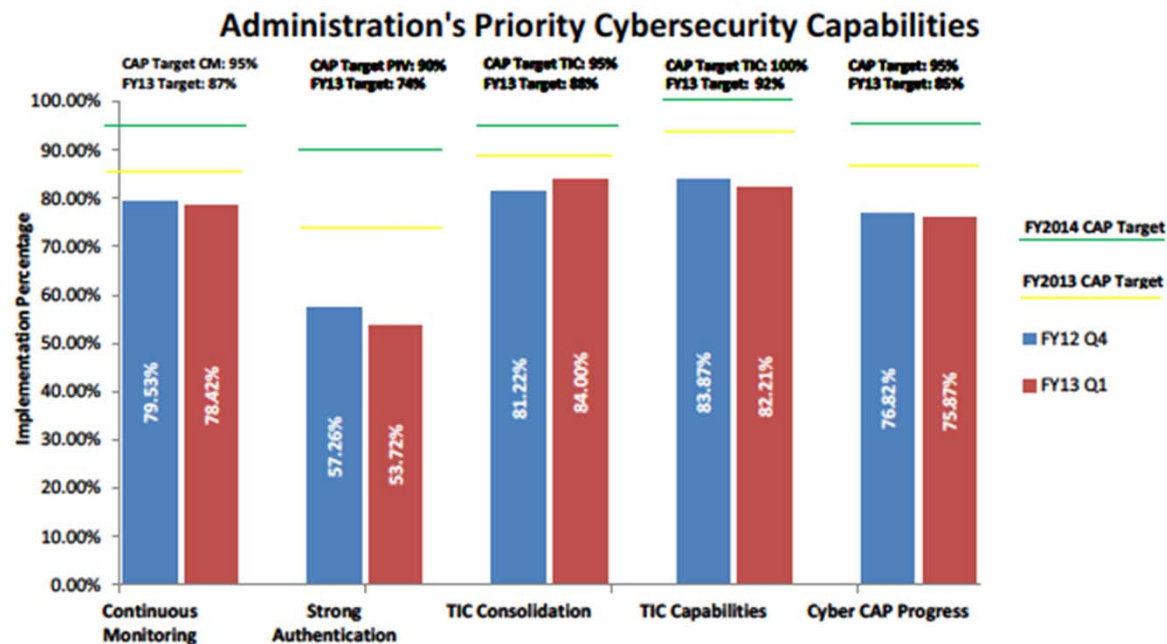

The Cyber CAP Progress is an overall measure that combines the individual metrics.
