

## Do We Have the Authority? Legal Issues in Protecting Government Networks

Security in  
knowledge

### Moderator:

Gib Sorebo  
SAIC

### Panelists:

Kevin Gronberg  
U.S. House of  
Representatives

Elliot Oxman  
U.S. Department of Energy

Roland Trope  
Trope and Schramm LLP

John Gregory  
Ministry of Attorney General  
Ontario, Canada

# Legal Limitations on Defenses

- ▶ Electronic Communications Privacy Act / Wiretap Act
- ▶ Two-party consent statutes
- ▶ Third-party services providers
- ▶ Civilian vs. law enforcement vs. military vs. intelligence activities
- ▶ General privacy restrictions (U.S. federal, states, international)
- ▶ Computer Fraud and Abuse Act

# Defense Scenarios – Government Employees and Unauthorized Actors

- ▶ Insider threat
  - ▶ Employee exfiltrating sensitive information
  - ▶ Committing financial fraud
- ▶ Denial of service attacks
  - ▶ At what level can agency block an attack?
  - ▶ What is needed to shut down or disconnect the offending node?
- ▶ Other investigations of waste, fraud, and abuse
  - ▶ What is needed to search employee work-provided computer?
  - ▶ What about personally owned mobile device with agency data and applications on it?
  - ▶ What about services provided by third-party cloud provider that agency pays for?

# Defense Scenarios – Citizens

- ▶ Insider threat (authorized citizen system users)
  - ▶ Exceeding authorization
  - ▶ Committing financial fraud
- ▶ Citizen interactions
  - ▶ Ability to monitor communications (“on the wire”)
  - ▶ Ability to search databases and stored communications for evidence of illegal activities
  - ▶ Private communications with agency employees
- ▶ Cross-border and foreign national interactions
  - ▶ Whose laws apply?
  - ▶ How was data obtained and under what conditions?

# Legal Reform – What's Needed?

- ▶ Monitoring clarifications
  - ▶ Who, what, when, where, why, and how
- ▶ When and how to “hack back”
- ▶ Information sharing
  - ▶ Privacy considerations
  - ▶ Classified data
  - ▶ Timeliness of information
  - ▶ Actionable with little or no interpretation

# Takeaways

- ▶ Don't assume that if it's on your network you can monitor it and act on the information obtained
- ▶ Ensure legal counsel has reviewed security operations plan, including monitoring and incident response
- ▶ Define policies that include and notify all stakeholders as explicitly as possible
  - ▶ Employees
  - ▶ Contractors
  - ▶ Service providers
  - ▶ Citizens
  - ▶ Foreign nationals
