Panelists:

Joy Pritts

HHS, Office of the National Coordinator for
Health Information Technology

Deborah Wolf

Booz Allen Hamilton

Deven McGraw

Center for Democracy & Technology

Session ID: GRC-R31

Session Classification: Intermediate

For Healthcare Data Security and Privacy to Fully Mature, Progress Is Needed in Key Pathways

- ▶ Government standards, oversight and enforcement are the foundation
- ▶ A culture shift toward embracing data security will foster demand for better security services
- ▶ Technology exists to achieve security and privacy goals, but it must be deployed more uniformly
- ▶ Rapid evolution in new devices creates vulnerabilities as well as opportunities for new solutions tailored to healthcare

As the Healthcare Industry Continues to Integrate IT into its Services, the Goals Remain the Same

- ▶ The Healthcare community needs IT that Enhances Care Delivery
- ▶ **Make it easy, make it seamless and it will be used**
