

RSA[®]Conference2015

San Francisco | April 20-24 | Moscone Center

SESSION ID: ASD-W04

Containers vs VMs for Secure Cloud Applications

CHANGE

Challenge today's security thinking

MODERATOR:

Simon Crosby

CTO @Bromium
@simoncrosby

PANELISTS:

Scott Johnston

SVP Product
Docker, Inc

Chris Hoff

VP & CTO Security
Juniper Networks
@beaker

Mark Russinovich

CTO Azure
Microsoft
@markrussinovich

This is an “Intermediate” Level Panel

- ◆ You know enough to be dangerous about
 - ◆ Docker/LXC, Windows, Linux, Virtualization
 - ◆ Private and Public Cloud Architectures
- ◆ Our goals
 1. Highlight security considerations / challenges for app delivery in VMs and containers on Public & Private Clouds
 2. Offer architectural guidelines to maximize containerized app security
 3. Spotlight security roadmap for Docker, Azure, Micro-Services & Micro-virtualization

VMs

vs

Containers

docker

Do services and apps interact appropriately?

Can I migrate smoothly and quickly

- Static website
- User DB
- Web frontend
- Queue
- Analytics DB

An engine that enables any payload to be encapsulated as a lightweight, portable, self-sufficient container...

...that can be manipulated using standard operations and run consistently on virtually any hardware platform

Multiplicity of Stacks

Multiplicity of hardware environments

- Development VM
- QA server
- Customer Data Center
- Public Cloud
- Production Cluster
- Contributor's laptop

VMs

Containers

**Cloud
Infrastructure**

**Container
Orchestration**

**App
Containers**

OS [VM]

What's the threat model?

Layered Multiplexing

VMs → Cloud

containers → VMs

YM PORTLAND
MONROVIA
IMO 9236535

Multiplexing = Shared Fate

Multiplexing = Shared Fate

Isolation = Protection

Apply What You Have Learned Today

- ◆ Get involved!
 - ◆ docker.com/resources/security
- ◆ If your organization is developing cloud apps using containers / VMs
 - ◆ Make security-first a design commitment
 - ◆ Understand the security differences & limitations of containers and VMs
 - ◆ Educate your dev-ops team on the security / compliance challenges of any shared infrastructure environment – even if it is a private cloud
 - ◆ Educate your team on the role of micro-services networking to help to secure cloud based applications
