SESSION ID: PNG-W04

Preventing and Disrupting National Security Cyber Threats

John P. Carlin

Assistant Attorney General for National Security
U.S. Department of Justice
@TheJusticeDept

David Sanger

Chief Washington Correspondent
New York Times
@SangerNYT

CHANGE

Challenge today's security thinking

The evolving cyber threat landscape

- ◆ **Threats:** Insiders, criminal organizations, terrorist groups, nation-states and their proxies
- ◆ **Motivations:** Financial gain, commercial advantage, favoring domestic industry, developing military technology, political coercion, and retaliation
- ◆ **Risks:** Significant financial loss; loss of sensitive business information, trade secrets, and competitive advantage; costly litigation; reputational damage with employees, customers, and investors; and physical damage

What you can do...

- ◆ **Establish C-Suite focus** on network security risk management, crisis management planning, and incident response.
- ◆ **Identify and prioritize what you are trying to protect**, and develop a layered security approach accordingly.
- ◆ **Integrate with others facing the same threats** – join or establish threat sharing relationships with others in your sector and with the USG; identify and implement best network defense practices.
- ◆ **Engage proactively with us when an incident does occur**, including through early notification and robust interaction to identify, disrupt and deter the attackers.
