Tools for Intensional Views

Frédéric Pluquet
Université Libre de Bruxelles

Intensional Model

Document actively a source code

With a set of intensional views and relations

- View :

  - set of elements described by an intension

  - calculated at the request of the user

- Relation

Intensional Model

— Document actively a source code

— With a set of intensional views and relations

- View

- Relation :

  - Link between two views

  - Example : All methods of a view must call at least a method of a second view

Intensional Model

- Views and relations coherence can be checked at each moment

- The incoherences between documentation and real code appear

Demonstration
