2.2	Bug fixes.....	10

1 Release 3.1.1

1.1 Features

- 1) Board list filter has now a linear logic
- 2) My tasks gives more useful information
- 3) For projects set in time interval which does not include today, default focus of Gantt graph is on the center of the task interval
- 4) Additional costs are summed with two decimals (asked by Stefano Besseghini)
- 5) Extended System check with all system properties
- 6) Installer: now the update procedure does never overwrite `global.properties` and `twdb.properties`
- 7) Task search searches also in notes
- 8) Menu entry to move from Gantt back to editor

Issues:

- 1) issue list and task issue tab 100% faster
- 2) screenshots/images viewable from lists
- 3) gravity editable from lists and nicer editor

1.2 Bug fixes

- 1) SEVERE: on file storage you could break file security
- 2) Empty dates in task editor could give an exception (reported by Stefano Besseghini and Mikael Palmén)

- 3) 0 or negative values accepted in task duration
- 4) Worklog overflow was reminded too soon
- 5) Issue status reported in reminder was wrong
- 6) Link to assignments from overwork notification was wrong
- 7) Upgrade issue to task did not set area
- 8) "cancel" on alert "data alert will be lost" had problems on IE6-7
- 9) Worklog analysis: go to print page could crash if paged results
- 10) Worklog analysis: edit of selected resources was ignored
- 11) PUBLIC_SERVER_NAME if present and empty was considered anyway
- 12) Fixed a problem in the case the path to Tomcat on Linux is a link in the configuration (reported by Rafał Bałaga)
- 13) A bug in the warning when duration is empty and start is milestone
- 14) A bug on tooltip rollover on disabled fields
- 15) An my appointments portlet it did not show appointments not taken by myself
- 16) Made dynamic combos and menus support limit names that try to hack javascript like Pietro O'Polsinelli ">O'Hara"
- 17) News with "" in the description may crash
- 18) Hours on agenda on home were wrong
- 19) Delete of issues generated exception (but they were deleted anyway)
- 20) Sending using authenticated SMTP failed (reported by Rafał Bałaga)
- 21) Fixed bugs on chat part
- 22) On issue close event could not be notified (reported by Mauro Manetti)
- 23) Manager of a manager could not be set (reported by Dave Stanley)

- 24) Setting of currency in global.properties was not in UTF-8
- 25) More robust MS Project import
- 26) Area combo on resources did not get filtered by security (reported by "Brian")
- 27) Searching for people with login and then companies gave exception

2 Released in 3.1.2

2.1 Features

2.1.1 Configuration, installation and system integration

- 1) tested with JDK 6
- 2) upgraded to Hibernate 3.2; this fixes an occasional memory leak in certain Linux servers, and some set Boolean parameters in JDBC on certain databases
- 3) added the JBlooming platform with a native web test tool, released also in Teamwork
- 4) Installer in English, German, French, Italian.
 - 1) replaced Proxool connection pool with C3P0, which solves possible connection leaks, in particular on SQL Server (generating occasional)
 - 2) Upgrade from earlier version could fail on some Tomcat-MySql combinations (reported by Peter Caron)

2.1.2 Management

- 5) Resources: filter by “enabled”
- 6) The issue section has been generally revised and polished:
 - issues order factor can now be set by hand on task issue editor; very handy for those who use the SCRUM module
 - you can change gravity from lists
 - images can be inspected directly from lists
 - there is save and add also on top of the issues tab

issues: 119/165 dependencies: 0 documents: 2 subscriptions costs classification diary: 0 security

8) HTTP authentication supported (see Install guide, section 10.3.3), and hence indirect LDAP integration

9) Installer document extended and improved (thanks to Heikko Ellermaa, Daniel Norin among others) Page 8 Sec 1 8/31

10) MS Project import/export better documented (requested by Carlos Alonso)

import from MPX or Microsoft Project

MPX or Microsoft Project file to import:

Given the differences of the application uni model, not everything can be imported. In y dependencies will be imported only if set t brother tasks.
We strongly suggest to revise all the task : resources created after import.
Microsoft Project is (c) Microsoft Corporation.

Help - importing and exporting projects

Introduction
This module will satisfy people that use MS Project basically as a Gantt-drawing tool. MS Project power users (supposing there is used-to-pain being :-)), will never be satisfied, as the two application have a deeply different model; same for Teamwork power u

11) Clone tasks now has also clone dependencies and clone subscriptions option (requested by Michael Cannon)

projects / Laude

Choose an action:

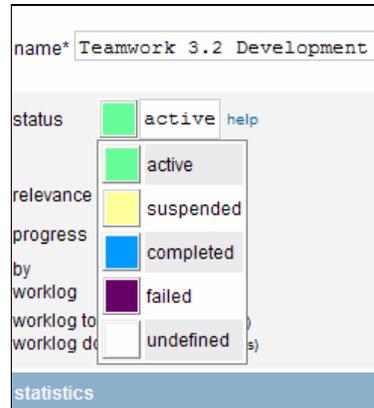

clone
 move

"Cloning" a task means creating a new task with similar features. First of a

new task code new task name*

copy codes copy names
 copy task tree structure
 copy the start and end times
 copy the assignments
 copy the "dependency" structure
 clone additional costs
 clone subscriptions

12) Introduced in various places the color combo, for more visibility

13) Task classifications shows description (requested by Vladimiro Cerni)

2.2 Bug fixes

- 1) Teamwork upgrade could fail on PostgreSQL
- 2) Add document of type content did not let browsing on new document
- 3) Print issues on separate pages fix
- 4) Scheduler job duplication fix
- 5) Log management page fix
- 6) Fix of issue print sometimes did not recover filters from list
- 7) Task custom forms all have totals
- 8) A task exported and re-imported caused exception (reported by John Rizzo)
- 9) Pressing delete task immediately after add caused exception (reported by Georges Saab)
- 10) Task progress update on worklog could fail on first worklog (reported by Monica De Barba)
- 11) Security hole in worklog analysis (reported by Monica De Barba)

- 12) Clone task without dates could cause exception (reported by John Rizzo)
- 13) Go into resource > persons with login
Click Search (Results are displayed)
In the header, select Companies instead of people (having login stay selected)
Click Search again
Generated error (reported by Regis Litre)
- 14) How do I submit dairy postings with only a subject line? (reported by Michael Cannon) -> now its possible
- 15) Issue manage: move issues had a strange behavior when merging searches
- 16) Issue manage: create assignment could fail in SCRUM configuration
